Epidemic Passes Peak At NCC

Dr. Charles D. Watts, director of Student Health Services at North Carolina College, said here last week he believed the crest of the outbreak of influenza cases has passed.

"Our census is about normal and we are now using only our usual number of staff members including nurses," Dr. Watts said.

At the peak of the outbreak on the NCC campus, more than 40 students were confined to the infirmary that normally accommodates only 20. Some six additional nurses were employed during the peak period.

Boy Scouts Celebrate 43rd Birthday

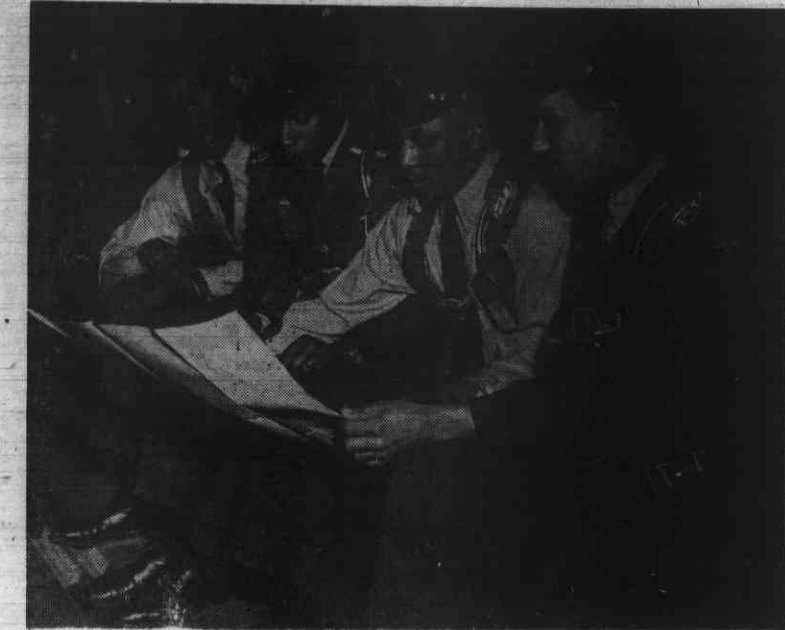

Official Boy Scout Week Poster

Boy Scout Week, Feb. 7 to 13, marking the 43rd anniversary of the Boy Scouts of America, will be observed throughout the nation by more than 3,250,000 boys and adult leaders. Since 1910, more than 20,200,000 boys and men have been members.

"Forward on Liberty's Team" is the birthday theme and the emphasis is on "The Scout Family" of programs meeting the interests of boys in three age groups: Cub Scouting for boys 8, 9 and 10; Boy Scouting for those 11, 12 and 13 and Exploring for boys 14 and up.

The high point of Scouting in 1953 will be the third National Jamboree. More than 50,000 Boy Scouts will camp at a 3,000-acre tent city on the Irvine Ranch in the Newport Harbor area of southern California next July 17 to 23.

At the time of the first outbreak, Dr. Watts and NCC authorities huddled and decided to isolate as many cases as possible to prevent the spread of the "virus" that swept through many parts of the world and that is believed to be mild influenza.

Collar the Clock!

PUTTING a collar on the average kitchen timepiece will brighten up the clock wall and make it both attractive and more useful.

Lay the clock on a piece of paper and trace its outline. Transfer the drawing, by means of carbon paper, to a panel of Masonite Tempered Plywood one-eighth inch thick. The material should be large enough to allow for the sawing of a "collar" to fit around the clock.

The center of the "collar" may be cut out with a coping or similar-type saw. To get the blade started, insert it in a hole bored near and inside the line marking the outline of the clock.

Shape of the clock will determine whether the outer edge of the "collar" is round, square or hexagonal. The distance between the clock and the outer edge of the Plywood should range from four to six inches, depending on the size of the clock and the amount of wall space available.

Friction ordinarily will keep the "collar" in position, flat against the wall at the back of the clock, but if the sawing has been irregular and the border is loose, insert small pieces of wood to take up the slack.

Arranged in clockwise order around the clock's new border may be glued the leaves from a small calendar.

The ingenious homemaker can decorate the clock in various ways.

Participants included Mrs. Rosemary Funderburg, case worker, Family Service Society, Durham; Dr. Floyd Hunter, professor of sociology, Duke University, Durham; Dr. Clarence Schettler, professor of sociology, Duke University, and Dr. Joseph S. Himes, Jr., of NCC.

Dr. Himes served as moderator of the panel.

In the final presentation on February 2, Dr. Himes again served as chairman when the group discussed "Careers in Social Work."

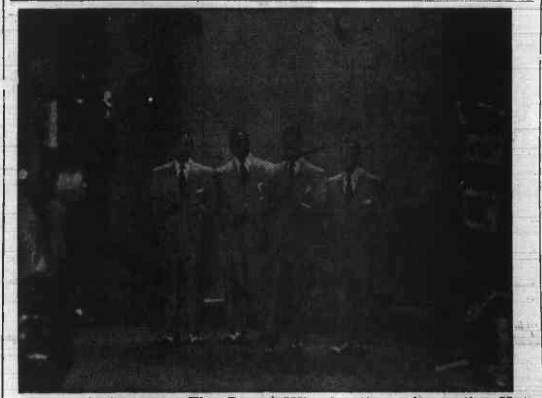

The NCC meetings and exhibit are open to the public.
