Scott Comments on Hospital Week Hospitals Have Larger Role, Declares Lincoln's Director

Sample Feature Story
The doctor's little black bag, the traditional symbol of American medicine follows a different path today than it did 50 years ago. Then it made most of its trips between the doctor's office and the patient's home; today it travels most frequently between the office and the hospital.

"The little black bag's altered path illustrates the changing patterns of medical practice - the trend toward centralizing medical care in the hospital," according to T. W. Scott, administrator of Lincoln Hospital.

Medical care has shifted from the home to the hospital, and with the shift, a new ingredient has been added to patient care - the highly technical methods resulting from the scientific revolution of the 20th century, he said.

The combination of science and individual patient care is the theme of National Hospital Week, May 6-12. This observance, originally celebrated as National Hospital Day, has been marked annually since 1953. Sponsored by the American Hospital Association, it is held each year during the week of Florence Nightingale's birthday (May 12).

The contents of the doctor's little black bag have changed only slightly in the last 50 years, but the changes again illustrate the trend toward the hospital, Scott said. Added to the bag are

some new drugs - particularly antibiotics and stimulants for starting stopped hearts. Subtracted are the equipment and instruments the doctor used at the patient's home for surgery, obstetrics and emergency treatment of injuries.
