Big Attendance Predicted For Youth Meeting

WASHINGTON, D. C.—According to an extensive trip made by Alexander Barnes, director, Public Relations Department AMEZ Church, the forthcoming General Convention on Christian Education and General Assembly and National Christian Youth Council, which opens at Livingstone College, Salisbury, August 5, will attract the largest group of youth ever to attend such a meet.

He just completed a trip that took him from New England to Key West, Florida, and from Virginia to Columbus, Ohio. He reports that chartered buses, autos, with trains and planes will bring people from all over. Word from California is that it will send many delegates to the six-day meeting.

The meeting is not confined to members of the denomination. Persons interested in broadening their knowledge in Christian education are invited to attend. The planners have invited speakers to discuss every phase of human endeavor, from making a decision for Christ to saving money, buying life insurance, registering and voting.

Experts in all these fields will address the delegates. Government was not overlooked and it will be well represented.

Persons who have not registered are asked to write Miss Julia B. Duncan, Livingstone College, Salisbury.

Dangers of Weed Growth Cited

GREENSBORO — Don't be fooled by the sweet odor of honeysuckle that's only a "come on". This plant, if allowed to continue, could very well make, literal desert of several states on the Atlantic seaboard.

That is the firm conviction of a professor at A. and T. College, who is conducting a one-man campaign to have the plant outlawed in this country. He hates the stuff and a mere mention of the plant causes his hair to bristle.

The man is Richard C. Ward, botanist and a full time faculty member at nearby Guilford College, who is teaching at the A. and T. Summer Institute for Biology Teachers.

The real danger, he believes, is that the honeysuckle, as it continues to wind about our trees, climb up our mountainsides and cover low growing plants, will eventually strangle much of vegetation, especially varieties which grow wild in Atlantic seaboard states from Delaware through Georgia. Worst of all, once it gets started, it's very difficult to eradicate.

"It's a frightening thought," says Ward, "but even the unconcerned observer can see the damage being wrought by this villain in wooded areas in this section."

Professor Ward is serious about outlawing this plant which is doing a lot of damage with even bigger threats.

"We should seek legislation against planting and growing Japanese honeysuckle, encourage federal aid to protect landowners heavily afflicted with the weed, and send a plant pathologist to Japan to seek natural enemy insects of the plant for introduction into the United States," he said.

Ward is strong in his advocacy of the use of insects to destroy the weed. While the average layman believes that all insects are pests, many species have been introduced for the exclusive purpose of biological control of weeds or harmful insects in this and other countries.

S. C. State Alumni Offer 6 Scholarships

ORANGEBURG, S. C. — Six \$125 alumni scholarship grants are now available to promising high school graduates who plan to enter South Carolina State College next fall. The grants may be renewed annually at the college for a four-year total of \$500.

The General Alumni Association of the college hopes to attract capable high school graduates who might need some financial assistance to further their education.

These scholarships are competitive, and aspiring high school graduates should contact the Alumni Scholarship Committee at the college early as applications are now being accepted.

Alumni serving on the committee include Mrs. Edith W. Vaughn, registrar at the college as chairman; Carl W. Fields principal of W. A. Perry Junior High School in Columbia; and Dr. Lewis C. Roache of the department of natural sciences at the college and former president of the Alumni Association.

White CORE Member Judged 'Sane' By Ky.

LOUISVILLE, Ky. — Paul Duffy moved from hospital to jail to freedom this week. The white CORE member was found "sane" after 20 days in Central State Hospital.

Originally, Duffy was charged with breach of the peace after refusing to move quickly enough in the discriminatory West end Theatre.

After his release from the Hospital, Police Court Judge Pound ruled that the time spent in the hospital did not apply to his 18 day sentence. After protests from national and Louisville CORE, Duffy was released from jail without explanation. Judge Pound, in ordering the mental test, said that anyone, particularly a white person, who would act as Duffy did must be insane.

CORE Breaks Color Bar at High Point Pool

HIGH POINT — CORE members moved on three fronts this week in this Carolina furniture city.

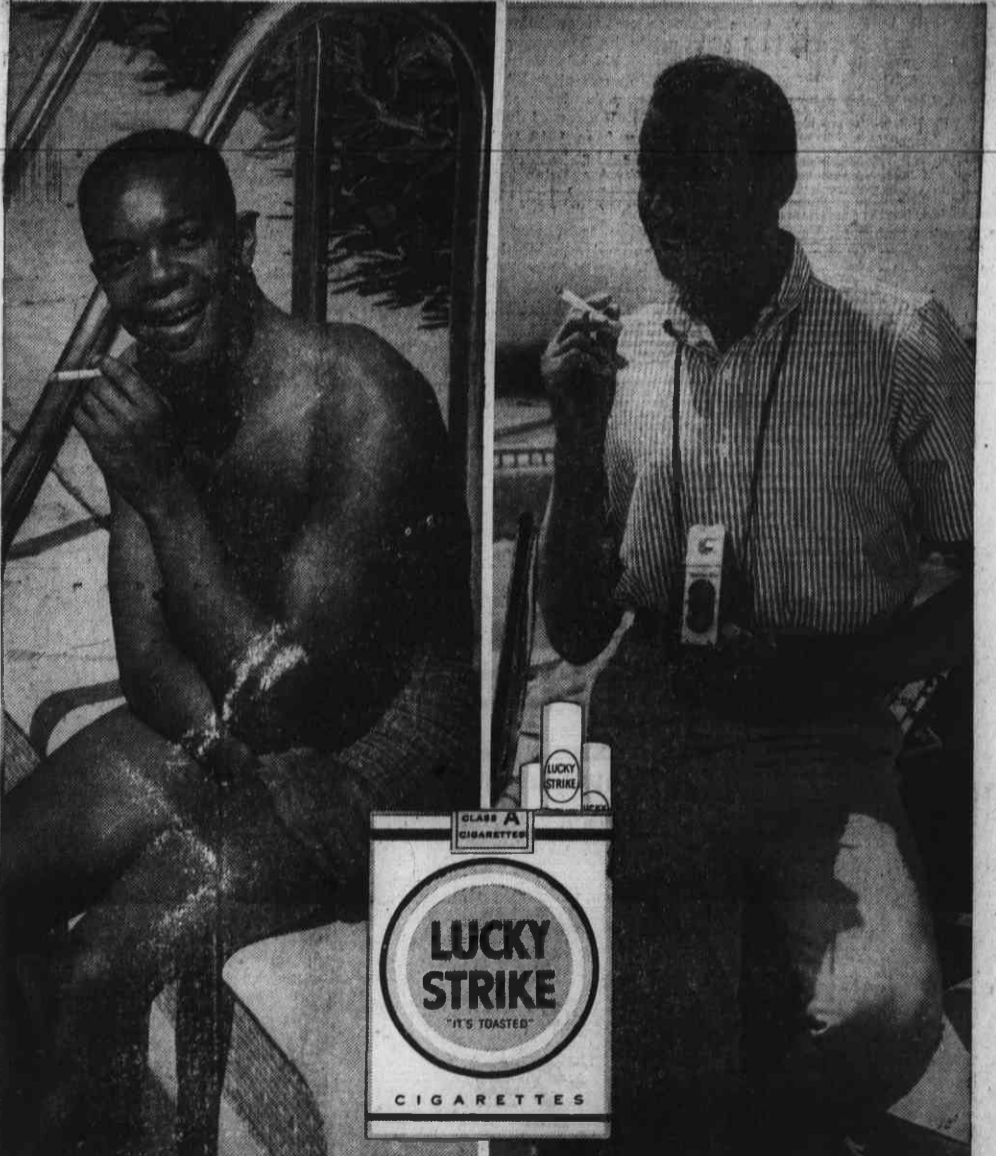

Three CORE members broke the color bar at City Lake Park municipal swimming pool. The white swimmers continued to use the facilities as the girls swam. There was no real difficulty.

Two couples attended services at white churches for the first time. Again, there was no problem. The churches were the First Baptist and the Friends Meeting.

Meanwhile, CORE field secretary B. Elton Cox asked the school board to adopt a firm school integration policy.
