### League Pledges Fight for Negro Businesses

WASHINGTON, D. C.—Berkeley G. Burrell, Washington Businessman, has been elected to serve a second term as president of the National Business League. The sixty-six year old organization was founded by Booker T. Washington with the hope that through unity Negroes could become an integral part of the American Economy. It continues in this tradition.

The Nat'l Business League with its sixty-six year history, will continue to fight through its local units all over America, for a deeper commitment on the part of the administration to lift Negro businessmen from their position of economic obscurity. "It's a natural for the Small Business Administration but only a few Negroes can qualify who already have the experience and who could grow if given financial assistance. They currently have no program to fit Negroes already in business and this must be changed."

## 45 Companies Expected At Insurance Convention

### Association To Hold Sessions In NCM New Building

The new optimism among Negro-owned life insurance companies is reflected in the theme of the National Insurance Association's 46th Annual Convention, scheduled for Durham, July 18-21.

Designs for Success — Planning, Product, Service, is the word framework against which 350 executives and sales leaders of 45 companies will share their ideas and experiences, in the four-day meeting.

The theme represents a right angle turn from the mood of a decade ago, when the Negro firms were concerned with questions of survival. The mood of uncertainty had been brought on by literally hundreds of new company formations by whites, and a new general policy by major white companies, of accepting Negro risks.

The Durham convention will hear a major report by H. A. Gilliam, senior vice president of the highly successful Universal Life Insurance Co. of Memphis, and retiring president of NIA.

In addition to Gilliam, the convention will be addressed by Floyd Bragg, vice president of Prudential Life Insurance Co., Burkett Huey, executive

TIGER IN TANK! NEW YORK—Cries of "black power" have put a tiger in the civil rights movement's tank—and the result is a threatened explosion within the movement and the entire nation, as well. Everyone was getting into the act. While Dr. Martin Luther King, Jr., was assailing "black power" advocates as impractical and foolish, Dr. King's own non-violence policy was being attacked.
