Church Sends Food to Hungry In Delta Area

GREENVILLE, Miss.—Thirty thousand pounds of food for distribution to hungry Negroes in the Mississippi Delta have been sent to the Delta Ministry by the fifth district of the African Methodist Church.

On hand when the shipment arrived in Greenville was Bishop H. Thomas Primm, Nashville, Tenn., presiding bishop of the fifth district. Bishop Primm also gave the Delta Ministry \$5,000 contributed by members of his district to help in buying food stamps for families without incomes.

The Delta Ministry is a three-year old project of the National Council of Churches working with the poor and dispossessed Negroes of the Mississippi Delta in the areas of community and economic development.

Representatives of the National Council of Churches, the U.S. Department of Agriculture and other A.M.E. officials were in Greenville when the food shipment arrived last week. The Delta Ministry will cooperate with local A.M.E. churches in distribution of the food and money.

Contributions totaling more than \$13,000 for food stamps have been received by the Delta Ministry since April when the near-starvation conditions of thousands of Mississippi Negroes began to receive national attention. Money, food and clothing to help no-income families have come from 34 states and Canada.

In response to this increase in aid available, the Delta Ministry has extensively expanded its welfare and relief program in eight Delta Counties in Mississippi—Washington, Bolivar, Tallahatchie, Sunflower, Humphreys, Yazoo, Sharkey and Issaquena. It has been able to assist 3,000 no-income persons in purchasing food stamps.

Donated food and clothing are used in emergency relief situations while families are awaiting enrollment in the food stamp and welfare programs or acquisition of job training and employment.

Introduction this year of the federal minimum wage has increased the number of unemployed agriculture workers to a new high. In August, traditionally a month of high employment for seasonal labor, 13,000 persons were added to food assistance programs in Mississippi. Observers close to the situation indicate that the number of unemployed families without incomes will steadily increase through the winter.

AVCO COMPANY IS FIRST MAJOR EMPLOYER IN NEW JOB PROGRAM

WASHINGTON—The Avco Corporation has become the first major employer to participate in the President's Test Program for Job Development, a new program which offers private employers a broad range of Federal assistance to encourage and help them hire the hard-core unemployed.

The announcement was made at a joint press conference conducted by Secretary of Labor Willard Wirtz, Secretary of Commerce Alexander Trowbridge, and Avco President James R. Kerr.

Avco will participate in the new project by building a printing plant in Boston's Roxbury area which will give work to over 200 hard-core unemployed.

Secretary Wirtz and Mr. Kerr signed a contract providing Avco with up to \$1,148,000 in Labor Department funds to help defray the cost of training workers for jobs at the new plant.

Additionally, General Services Administration will provide training equipment from available government excess supplies. The materials will come through the Labor Department.

Secretary Wirtz commended Avco on its participation in the program, stating that "the jobs that you are providing for the unemployed in Boston's Roxbury area are the live ammunition in the war on poverty."

He added, "The problem of unemployment will be met if private industry follows your example."

So far twenty-one other major corporations have expressed support for the Test Program for Job Development, which was announced by President Johnson six weeks ago. These corporations are in the process of formulating plans to establish new facilities to hire the hard-core unemployed or to add hard-core unemployed to existing operations.

Boston is one of the first five target cities for the test program. Others are Chicago, Los Angeles, San Antonio and Washington, D. C.
