Stokes Urges Blacks, Whites To Work for Better America

ORANGEBURG, S. C. — Cleveland Mayor Carl B. Stokes said here Sunday the problems of America are not going to be solved by "black and white people walking away from one another."

Stokes, one of the first Negroes elected mayor of a major U. S. city, spoke before more than 2,800 persons gathered here for S. C. State College's 75th anniversary celebration convocation.

"The economic and power dimensions of the problems facing us are not just simply race," Stokes said. "If you meet it just on the racial basis you lost the struggle."

"For those who call for black separatism or white separatism — they are wrong," he said.

Stokes said the country could well be "at a cross-

roads", with "chaos instead of concern, drift instead of decision, and hate instead of hope." He criticized the Nixon administration, saying there appeared to be a "crisis of confidence" in the quality of national leadership.

Stokes did, however, praise Nixon for introducing to Congress bills for family assistance and a proposal for revenue-sharing.

Stokes, a democrat, said, "There must be a minimum level at which everyone is entitled to live in a state of decency and minimum nutrition."

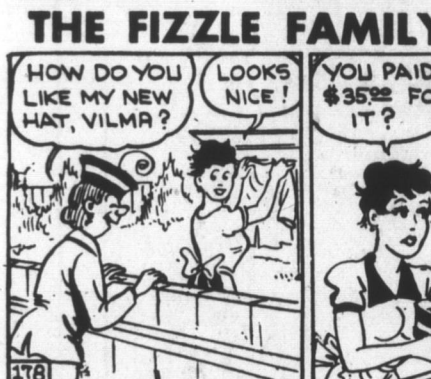

"Although that has been Democratic rhetoric for more than ten years, no Democratic President ever proposed it to Congress."

HONEYWELL GRANTS \$3,000 TO A&T—Dr. Reginald Amory, dean of the School of Engineering at A&T State University (left) receives \$3,000 check for program from Charles E. Bailey, associate in college relations at Honeywell, Inc. Funds will be used for scholarships and for the University's urban affairs chair.

PUGGY

When a man found out that a surplus of algae in Lake Erie was a problem, he had a "brilliant" idea: since algae can't live without phosphates in the water, and since phosphates are the main cleaning agents in detergents, pass a law putting an extra tax on housewives unless they use either no detergents or detergents without the phosphates!

Would it work? No. There are already enough phosphates in Lake Erie to support the algae for the next 100 years. We have to get rid of some other nutrient that algae needs. And since fish need algae for food, the total elimination of all algae from Lake Erie would lead to the death of millions of fish! And can you imagine 50 million American housewives scrubbing clothes by hand with soap?

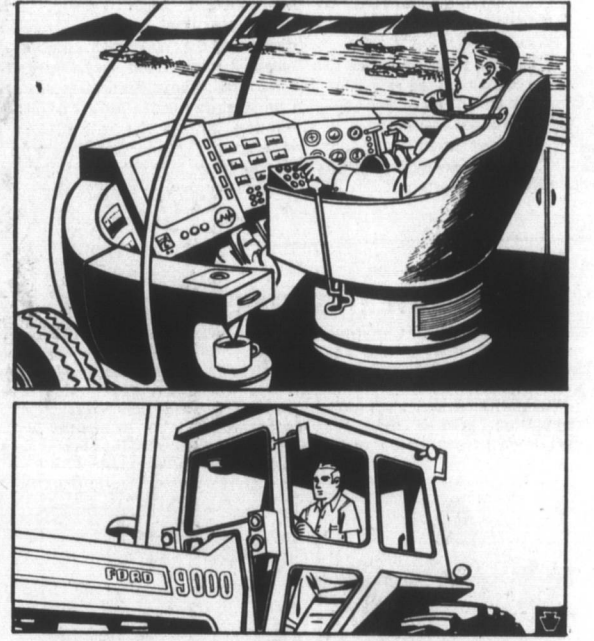

NAACP Files Brief Supporting for 18-Year-Olds

WASHINGTON, D. C. — In a friend-of-the-court brief, filed Sept. 10, in the Supreme Court of the United States, the National Association for the Advancement of Colored People argues that Congress, under its national defense powers, has the right to enact the statute lowering the voting age to 18 years.

The brief, filed in the name of the Association's department of armed services and veterans affairs, cites Article I, Section 8 of the Constitution which defines the "war powers" of the Congress. "The national defense needs and conditions that exist in the nation can reasonably be held to warrant the exercise of congressional power to grant the vote to 18-year-olds," the brief contends.

The NAACP brief supports the Federal Government's argument upholding the constitutionality of the act in the case of "State of Oregon v. John N. Mitchell, Attorney General of the United States" and was submitted to the Court by NAACP Attorneys Nathaniel R. Jones, Clarence Mitchell and J. Francis Pohlhaus.

World of Tomorrow

Farm tractor cabs in the year 2000 (top) will have all the comforts of home, and some will serve as control centers for other smaller, operatorless tractors, Ford Motor Company farm machinery experts predict. The interior of tomorrow's cab will look much like the cockpit of a jetliner and will evolve from cabs such as those found today on Ford's model 9000 tractor (bottom). Cabs will include air conditioning, soundproofing, wall-to-wall carpeting, television for monitoring implements and receiving the latest weather reports, telephones, refrigerators, food warmers and controls that can override the programmed systems guiding automatically either the central control tractor or any of the auxiliary tractors.

"For a period of 30 years the nation has been engaged in war or preparation for war," the NAACP brief says. "Young persons, during this entire period, have been subject to compulsory military service. At present the resistance to both war and military service has manifested itself by bombings, riots, desertions by servicemen and draft evasion by civilians, illegal occupation of armories and selective service headquarters by protestors, destruction of military and defense industry property. Congress could conclude that this resistance impedes the national defense effort. Much of this anti-war effort is carried on by college and high school students, most of them in the 18 to 21 brackets affected by the legislation under consideration."

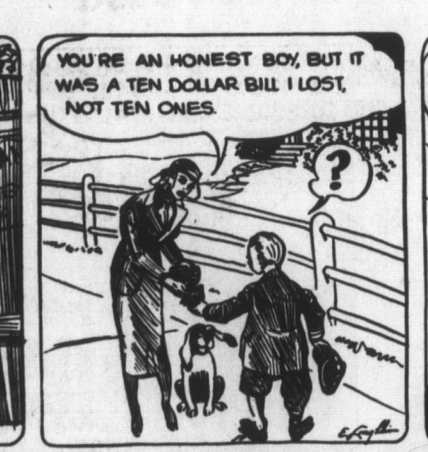

IT'S A FINANCIAL FACT

THE RISK OF BORROWING

AN EARLY AMERICAN FARMER WAS LIKELY TO BORROW ON CROPS HE WOULD HOPEFULLY HARVEST IN THE FALL. IF HIS PLANNING WENT NO FURTHER THAN THAT, A POOR HARVEST WOULD LEAVE HIM IN FINANCIAL TROUBLE.

THE GOLD-HUNGRY MINERS WHO WERE CALLED FORTY-NINERS WERE USUALLY STAKED BY SOMEONE BACK EAST. IF THE VENTURES FAILED AND GILDED DREAMS FELL APART, THE ONLY COLLATERAL WAS A PICK AND SHOVEL.

TODAY THOSE WHO RUN THEIR LIVES ON CREDIT TAKE SIMILAR RISKS IF SHORTCOMINGS SHOULD OCCUR. A BUDGET SYSTEM WORKED OUT WITH A FINANCIAL PLANNER FROM THE TRAVELERS COMPANIES WILL HELP PUT YOU IN A POSITION TO FACE ANY DIFFICULTY.
