

## Former NCCU Prof Included in Outstanding American Educators

Dr. Edward G. High, Professor and Chairman of the Department of Biochemistry, Meharry Medical College, Nashville, Tennessee has been chosen to be included in the 1971 Awards Volume of Outstanding Educators of America. He was chosen on the basis of his talents in the classroom, contribution to research, administrative ability, civic service and professional recognition.

Dr. High received his Ph.D. degree in Biochemistry from Indiana University. His teaching experience includes faculty positions at North Carolina Central University, 1941-44, Prairie View A. & M. College, 1949-53 where he was Professor Research, Part-time Professor at Tennessee State University and Fisk University. Also, Dr. High was a Research Fellow at Columbia University 1944-46 and a National Institute of Health Research Fellow at Indiana University from 1948-49.

Listed in a number of Biographical References as American Men of Science, Who's Who in the South and Southwest, Who's Who in American Education, Dictionary of International Biographies (London), Who's Who in Atoms (London).

Awarded travel grants to the Western Hemisphere Nutrition Congress, 1968 and to the

International Congress of Nutrition in Prague, 1969.

Dr. High was published numerous papers in leading scientific journals concerning his research interests which has dealt with fat soluble vitamins such as vitamins A and E and also enzymes, cofactors, and nutrition. He has presented papers at regional, national and international meetings.

He has been active in church activities, including delegate to National and regional meetings, Senior Warden of Holy Trinity Episcopal Church for some eight years and part Junior Warden and Superintendent of Church School.

Dr. High is married to the former Kathryn Weston Toole of Durham, North Carolina. They have five daughters and four grand children. He is the son-in-law of Mr. and Mrs. E. N. Toole of Durham.

### Soviet Cotton Crop

MOSCOW — The Soviet Union expects to harvest 6.2 million tons of raw cotton in 1971 in six Central Asian republics, the official news agency Tass reported.

**NORTH CAROLINA DURHAM COUNTY**

## INTERVIEW

By

MR. MILTON E. HARRINGTON

Milton E. Harrington was elected President of Liggett & Myers Tobacco Co., April 1, 1964 and was named Chief Executive Officer of the company, July 14 of that year.

Prior to that, he served as Executive Officer to the company's extensive operations in Durham. Harrington began his career with L&M in 1934 and served as factory manager, leaf buyer, and leaf supervisor before he became manager of the leaf department.

He was elected a director of the company in 1955 and vice president for leaf in 1960.

Born in Winterville and reared in Greenville, Harrington graduated from Duke University with an A.B. degree and served in the Army field artillery in World War II. He is married to the former Bonnie Windham of Farmville.

Harrington is a member of the University club and a member of the Pelham Country Club in Pelham, New York.

Wednesday, September 8, Harrington made official his acceptance as Chairman of North Carolina Central University's Endowment Fund Committee.

C. T.: Who approached you about being chairman for the committee?  
Harrington: Well, Dr. Albert Whiting, William Malone, who is Director of Development for NCCU, Watts Carr, and Paul Wright came together to talk to me about it.

C. T.: Since your time is certainly limited, what was your immediate reaction to their proposal?  
Harrington: I wondered if I could devote the time that would be necessary to fill such a position. However, the group discussing the proposal with me assured me that we would have a committee that would

C. T.: Do you have a particular plan of approach for the prospective donors?  
Harrington: Yes, This has all been drawn up by a committee of professionals. Another advantage, is that I will know most of the people I am to contact, personally.

C. T.: Do you feel you can raise the speculative \$1 million needed?  
Harrington: I certainly hope so. I feel it is certainly an handle the majority of the "back up work. I will be mainly concerned with approaching corporations. These corporations will be predominately in-state; however, I do plan to contact some out-of-state businesses, as well.

C. T.: Is there a specified time period for the fund raising campaign?  
Harrington: No, not exactly. We hope to finish the campaign during this fall and winter. We should have it completed by the end of the year or early spring, important and deserving cause. Anytime a university such as NCCU is in trouble maintaining an adequate faculty because of money, it is a just cause to help. Although I still spend about 75% of my working time in New York, I took

## No Aerial Activity

# Suez Canal Area Back To Normal

The Suez Canal was reported quiet Sunday after weekend aerial activity that nearly wrecked the 13-month-old Middle East cease-fire, but Israel warned it would continue to make flights in the canal zone.

Israel Defense Minister Moshe Dayan was quoted as saying he would not be surprised if an active Middle East war resumed before the end of the year.

Israel officials said that while Tel Aviv would observe the cease-fire it would not allow Egypt to interfere with its aerial movements over the Israeli-held east bank of the waterway.

This statement followed the downing of an Israeli transport plane by Egyptian missile fire Friday.

Cairo said Israeli Phantom jets then attacked Egyptian canal-side emplacements Saturday with Shrike rockets.

The Israelis said only that Egypt fired missiles at their planes while they were over the Israeli bank. A military spokesman said later "The situation on the canal has reverted to normal."

Egyptian soldiers again were seen without steel helmets, carrying out regular chores outside the bunkers.

The United States and U.N. Secretary-General U Thant both voiced concern at the incidents, and urged preservation

this chairmanship because I feel it is a highly worthy cause. Education is the key to the understanding of all people. Dr. Whiting has done a great job at NCCU. But he can not do it alone. Over the past four years they have lost almost 50% of their faculty members due to the salary range. NCCU's average salary level is \$10,000 whereas the national average is \$12,000. An endowment fund of \$1 million will give a yearly working allotment of \$60,000. This can go a long way in bettering the faculty outlook at NCCU.

# George Swearingen is a public health sanitarian.

## He works for you.

George tracks down and destroys blood-thirsty mosquitos on our lakes and property.

To control the breeding areas and destroy larvae before they mature into menacing adults, he and his 11 crews patrol more than 2,000 miles of shoreline of Duke Power lakes.

Duke Power's Environmental Health Department crews use three standard methods to control larvae. They sometimes stock a lake with special minnows that feast on the "wiggly-tails." At other times they spray

shallow coves with a light film of harmless oil without using insecticides. And in our forests they strive to eliminate the dumping of garbage and trash in which untold millions of mosquitos may breed.

Since starting one of the first mosquito control programs in the Carolinas in 1923, Duke Power has been making outdoor activities more enjoyable.

It's another way we're helping to make this a better place to live.
