**PREGNANCY PLANNING AND HEALTH**  
by Mrs. Gloria Riggsbee

Dear Mrs. Riggsbee: I am in my forties and think I am going through the change. I have hot flashes and sometimes I am very moody. In fact, my husband and kids say I am a lot crabrier than I used to be. But I suppose that's just part of the change and they will have to put up with it.

What I am really writing about is the way my monthly periods are getting longer instead of shorter. I used to flow for about five days each time, but now the flow lasts ten days or two weeks sometimes. Do you think this is why I feel tired and weak most of the time? Also, I feel like my heart is pounding at times.

Please tell me if this is normal for a woman going through the change of life.

Mrs. B. P.: Dear Mrs. B. P.: I am so glad you wrote to me about this because I can tell you right now that it is not normal for you to feel the way you do, nor it is normal for you to flow as long as two weeks. I want you to make an appointment either at the health department or with your doctor as soon as possible and tell him all that you have told me.

"Hot flashes" and moodiness such as you describe are common complaints of women going through the change of life.

The club had as a consultant, Carl D. Hodges, Durham County farm agent. Hodges gave very pertinent information the care of shrubbery after the cold wave. The sudden change in weather damaged many shrubs. He advised extra fertilizing of shrubs and soil testing.

Hodges discussed steps in developing beautiful lawns, the kinds of seeds to plant and the types of fertilizer to use. A question and answer period followed a most informative and interesting lecture on Azelean and other shrubs.

Members present were Mrs. James Mason, Mrs. John Mason, Mrs. H. C. Davis, Mrs. J. P. Thorpe, Mrs. E. N. Toole, Mrs. Clyde Lloyd, Mrs. C. L. Cox, Mrs. S. L. Dudley, Mrs. John O. Smith, Mrs. F. D. Wray, Mrs. Palmer L. Perkins, Sr., and the hostess Mrs. William H. McLaughlin.
