Foreclosed Families Get Second Chance

About 25,000 families whose FHA-insured home mortgages were foreclosed, or are in the process of being foreclosed, have until December 18, 1979, to contact the department of Housing and Urban Development asking reconsideration of their mortgage assignment request pursuant to a court approved settlement order signed on November 8, 1979.

A mortgage assignment is a procedure designed to protect FHA-insured homeowners threatened by foreclosure due to circumstances beyond their control, such as job loss or a death or illness in the family. When a request for mortgage assignment is accepted, HUD pays the lender the insured balance of the loan, takes over the mortgage and adjusts the mortgage payments for a period of time until the homeowners can resume their financial obligations.

Under the settlement

provisions of Ferrell v. Landrieu No. 73 c 344 (N.D. III.) the 25,000 families whose assignment requests were rejected by HUD between May 17, 1976, and January 31, 1979, are now eligible for reconsideration.

Eligible families, including those who have already lost their homes, should contact either the HUD office nearest to where the property is located, a counseling agency or an attorney. HUD also is making an effort to contact the homeowners by mail.

Additional homeowners who are eligible to request assignment during the stipulated period can demonstrate their failure to make a request was due to the lenders noncompliance with assignment procedures and regulations or for other "good cause" have eight months to request a review.

As part of its efforts to
