

These illustrations show the ALL-YEAR Car in the open and closed models—the ideal car for summer and winter motoring.

The ALL-YEAR Car is available in the following combinations: Touring-Sedan, Victoria-Town Car, Roadster-Coupe.

KisselKar proves its supremacy in the big ALL-YEAR idea

The business man who purchases his motor car with the same care he exercises in buying his stocks and bonds inevitably decides on the ALL-YEAR Car.

He finds that the ALL-YEAR Car in appearance, comfort and performance is that of a permanently enclosed coach.

He appreciates the fact that the ALL-YEAR Top fits in—not on—and that it is found on no other car but the KisselKar.

The ALL-YEAR Top being entirely removable gives him a Spring and Summer a wide-open, roomy touring car with no roof to intercept his view.

If you apply business principles in the purchase of your car, there will be no question as to placing your order for a Kissel ALL-YEAR Car.

These cars are finished in striking color combinations. The standard colors of blue, black and green are here and for those who care for more striking combinations we offer Royal Blue, Brilliant Wine and Seal Brown.

The interior finish is of the very latest plush and motor cloth upholstery.

To Mayors and City Councilmen

We announce the KisselKar Combination Chemical and Hose Wagon.

This is the most modern and best equipped Fire Apparatus made in America today at anywhere near its price.

The equipment includes—

Hose body of approved fire department design with a capacity of 1,000 feet 2 1-2 inch hose.

Chemical Tank, capacity 35 gallons.

Chemical Hose, 150 feet with nozzle.

Twenty-foot rapid hoist extension ladder.

Twelve foot side roof ladder.

These ladders are mounted on side of hose body in strong brackets.

Two 3-gallon hand extinguishers.

Locomotive bell, axes, crowbars, acid receptacles and all necessary equipment.

These trucks are in use in such cities as Milwaukee, Denver, San Francisco, Los Angeles, the City of Boston recently receiving six at one time.

The KisselKar Company have heretofore built these trucks to order only, but the ever increasing demand forced the building of an entire plant devoted to their manufacture alone, so that we can now make immediate deliveries.

The price is a revelation, for it is less than half the cost of any truck on the market that does the same work.

We will be glad to have you write us for full information and detailed specifications on this wonderful fire fighting machine.

What the Name "KisselKar" Means on the Truck You Buy

It means that above everything else you will get a truck built for truck purposes and not a makeshift or a made-over vehicle.

"We Must Have Manufactured Trucks—Not Assembled Ones."

"We have learned that Kissel manufactures all the vital parts of his trucks, while everybody knows that the Kissel-built engine, made by Kissel in Kissel shops, is the latest word in power production under all running conditions.

They are built to enable you to serve more customers in a shorter space of time—to deliver and haul more goods cheaper—to save money and make more money—to speed up your shipping department—to cash in on your haulage contracts, etc.

Owing to the continued advances in all material used in these trucks it has been necessary for the factory to advance prices in order to maintain the standard of KisselKar quality. The prices are as follows and F. O. B. Hartford, Wis.:

- 3-4-ton Chassis \$1,025
- 1-ton Chassis \$1,375
- 2-ton Chassis \$2,050
- 3-ton Chassis \$2,475
- 4-ton Chassis \$3,075
- 5-ton Chassis \$3,550

The KisselKar Truck was practically unknown in North and South Carolina 3 1-2 months ago. Herewith follows a partial list of purchases since that time:

- Standard Ice & Fuel Co., Charlotte 2
- Yarborough & Bellinger Co., Charlotte 2
- Charles K. Messick, Charlotte 1
- W. L. Robbins & Son, Concord 1
- H. M. Winecoff, Concord 1
- Gulf Refining Co., Concord 1
- Southern Express Co., Concord 1
- Gibson Mfg. Co., Concord 1
- Pepsi-Cola Bottling Works, Greenville 2
- Lexington Grocery Co., Lexington 2
- Abernathy Hardware Co., Hickory 2
- Heath-Morrow Co., Monroe 1

A satisfied customer is the best advertisement and we request you to write any of the above firms for their opinions on the performance of the trucks bought and in use by them.

We also have complete record of all our sales on file, and will be pleased to show them upon request.

In a test before the Road Commissioners of Moore County, a one-ton KisselKar Truck, starting at a standstill, pulled a box car filled with autos, the weight of same, attested by railroad scales at 65,000 pounds, eight to ten feet several times with an unloaded chassis.

As a result of this demonstration the Road Commissioners of Moore County purchased a one-ton KisselKar Truck.
