The market opened steady at an advance of 25 points to a decline of 5 points on relatively steady cables, but quickly eased off under scattered liquidation and hedge selling. Recent buyers seemed to be disappointed over the sheene of any important demand from Liverpool, but after selling off to a net loss of 22 to 30 points, prices steaded on covering, buillah spot advices and reiterated predictions of increased experts.

For a time during the middle of the day prices showed considerable firmness. December sold up from 27,27 to 27,98 and March from 26,20 to 28,98 with active months generally showing net gains of 46 to 50 points. The buying movement then tapered off, however, and the market was unsettled later in the day owing to the absence of support, renewed liquidation and reports of hedge selling for southern account. December broke to 27.05 and January to 26.02 or about 45 to 48 plonts net lower on the active months and 90 to 94, points from the about 45 to 48 pionts pet lower on the active months and 99 to 94, points from the early high level. There was covering enough to make the final tone steady but last prices were within 3 to 16 points of the lowest.

Expectations of builtsh ginning figures on Expectations of builtsh ginning figures on Thursday probably helped to steady the earlier market, but there seemed to be more or less nervousness over the goods situation and rumors that hedges were being sold against stocks of manufactured goods or the expected cancellation of contracts. There were other rumors during the day that Spain had been allotted 115,000 bales additional for quick shipments, but conflicting reports were sin circulation regarding immediate supplies of ocean tonnage.

New Orleans, Nov. 18.-Rapid fluctuations

Around the opening the market advanced 15 to 45 points on the telegram from Chairman Baruch, of the war industries board, stating that he was in sympathy with the movement to remove restrictions which are now working against the ex-portation of cotton. This improvement brought out considerable realizing from the long side and a break ensued on which the active months finally reached a level 25 over yesterday's final quotations. This buy-ing movement was caused by reports of more ships headed for gulf ports, and the statement that the current allotment of cotton for Spsin had been increased by 115,000 bales. HUBBARDS' COTTON LETTER. New York, Nov. 18.—Teday's market was somewhat steadier but the tendency toward lower prices remains and at the close was again below that of last night. Liverpool bought a little cotton during the day but the south is a steady seller and under present conditions finds some diviculty in immediately locating buying. The uneastness in the goods market continues and has an effect on restricting the demand from the domestic trader. They feel that cancellations in some supply immediately was necessary.
