The word Cyclones has frequently, but incorrectly, been used as significant of an enormous or very violent meteor, as if its application was to be confined to the devastating hurricane of the West Indies or the terrific typhoon of the China seas. Taking this as the definition of a cyclone, it seems clear, from observation alone, that all storms are to be regarded as cyclonic. Volumes have been written to prove that this is not the case. But we have only to examine a few series of weather-Mr. Joseph H. Flauner, formerly of maps from week to week to see that, Wilmington, but now in Paris, has wherever you have an area of low forwarded, through Mr. Alexander barometer, into its central hollow

is generated. The tornado, the simooms, the dust-whirlwind, the fire-storm, even the slow and sluggish storm which moves on our Western plains as the laboring wheel of the transbip buried in a heavy sea, all attest that a body cannot move on the earth's surface in a straight line. It is more true with us that the Gulf Stream turns to the eastward, the Polar Stream to the westward, and the equatorial curany cause it is called to move. The meteorist has therefore only to as certain by observation where the the direction of the winds from the circumjacent districts, far and near, or at least to test the mathematical law by a grand experiment.—Prof. T. TO MERCHANTS.

THE great aim of our House, since its establishment, has been to make Charlotte a wholesale Mart, and ours THE HOUSE, and to conduct our business so as to outgrow the alleged and even accepted opinion of some that there is a kind of obloquy attached to them for buying in Charlotte; and having, by the very great increase of our business, (since we removed to our new and elegant Store,) been convinced that we have partially succeeded in our cherished plan, we have concluded to endeavor to still further eradicate the erroneous idea, by presenting, this coming season to the Trade, a still Larger and better assorted Stock than even better assorted Stock than even we ever offered before, so that Country Merchants will be able to find in our house not only all he needs but a very large stock to select from; thereby being enabled to operate with a much smaller capital than he can by buying in different houses North, where he must necessarily buy more goods than he actually needs in order to have an assortment.

In view of the foregoing, Mr. Rintels left on the 27th January, (much earlier than usual,) for Northern Markets and Manufacturing places, where he will re-main two menths in making our purchases, buying everything from first hands on the same terms as any Jobbing House in Bal-timore, Philadelphia or New York; and the assortment when thus completed will foot up in amount to upwards of Two Hundred Thousand Dollars.

The expenses attached to carrying on a business here being much less than it would be in Northern Cities, and having a lower rate of freight than smaller shippers here, brings the fact patent that, we are in

complete lines of Dry Goods, Groceries, Hardware, Clothing, Boots and Shoes, Notions, and even Millinery. Our Retail Department is complete, with the latest Novelties, and in bulk second to
