Of all sources of disease, the Stomach is the most fruitful—the gratification of its salls are more absolutely necessary-more expensive-more pleasant-more painful, and more diversified than any other organ in the human system. It is more imposed upon, and more wonderfully adapts itself to its various du ties, than any other organ—it has its legitimate duties, against which it rarely rebels; but, for imposition, it will call you to account, and its neighbor, the Liver, almost always suffers with it, and usually shares in the retribution. premium-Safety Oil. DAVIDSON COLLEGE, N. C., ·February 10th, 1873.

Wilson & Black :—I to-day tested the Denslow & Bush "Premium Safety Oil," which I obtained from you last Saturday, and found it to stand a fire test of 135 deg. F. But as these figures vary a good deal for different modes of applying the test, (a thing known to Chemists who experimented with Gils.) I will say that, tried under precisely similar circumstances, the Denslow & Bush Oil stood 10 deg. F. above Pratt's Astral Oil, and 40 deg. F. above West's best quality. It gives a beautiful soft white light, not excelled by any other white light, not excelled by any other form of artificial light in common use. These results accord with my previous experience with this Oil, and I do not hesitate to recommend it as the safest and best I have ever seen in this market.

Respectfully yours,
