In seeds of laurel in the earth, The blossoms of your fame is blown, And somewhere waiting for its birth, The shaft is in the stone!

Meanwhile, behalf the tardy years, Which keep in trust your storied tombs, Behold! your sisters bring their tears, And these memorial blooms.

CULTIVATION OF SHAD .- It will bean appropriation to aid in the dissemination and propagation of various species of fish in different rivers throughout the country—both North and South. The immediate oversight and general superintendence of this important work has, we believe, been confided to Mr. Seth Green, the famous fish breeder, whose comprehensive knowledge of the value, habits and pecularities of the scaly tribe peculiarly fit him for the uned the stocking of a number of Northforts of competent and intelligent gentlemen, versed in fish culture, who have been selected as agents in carrying out the purpose designedthe multiplied production of this wholesome and delicious diet to such extent as to place it within the reach of the masses of the people.

In promotion of this object, we understand that a gentleman, whose name we failed to obtain, is now in Augusta, with the special purpose of visiting our shad fisheries in the neighborhood, with a view to institute the operation of a process by which the annually decreasing nawe are not familiar, but understand that the leading feature is to make immediately productive the eggs of the fish when caught, by which, in a brief space of time, millions may le hatched, which are annually lost to the natural product, returning the next season in swarms of fine, fat, fully developed shad, to reward the labors of the fisherman and delight the appetites of the masses with the most wholesome and cheap food .-Chronicle and Sentinel.
