july 7'-tf. SINGER SEWING-MACHINES.

Statistics of Sworn Sales for 1873-

THE table shows that our sales exceed those of any other company, for the period named, by the number of 113,254 machines, or nearly double those of any other Co.

It may be further stated that the sales of 1873, as compared with those of 1872, show a It may be further stated that the sales of 1873, as compared with those of 1872, show a relatively larger increase beyond the sales of other makers than of any other year. For instance, in 1872 we sold 35,000 more machines than any other company; whereas, in 1873, the sales were 113,25; machines in excess of our highest competitor. These figures are all the more remarkable for the reason that the sales of the principal Companies in 1872, are less than their sales in 1873; whereas, as has been shown our sales have largely increased.

The account of sales is from sworm returns made to the owners of sewing-machine patents. It will hardly be denied that the superiority of the Singer Machines is fully demonstrated, at all events, that their popularity in the household is unquestionable. Farther comment is unnecessary. Call at our offices and examine, or send for circular.
