A Stupendous Work. It is estimated that if the English

Channel is successfully tunnelled, the 300,000 travellers who now cross it will increase to 3,000,000. A journey from London to Paris will then take but five or six nours; with the dreaded rough sea voyage taken out. The boring is to begin simultaneously in France and England, from the bottom of two wells, 100 feet deep. The bore is to be nine feet in diameter, by machinery invented by Dickinson Brunton. The debris made from the excavation is to be continuously carried.

NOTICE.—TO HOUSE BUILDERS AND CONTRACTORS.—I have accepted the Agency for a Saw Mill, and am prepared to receive and fill all orders for any kind of Lumber at as short a notice as possible. I have on hand a lot of flooring and inchest in the bore is to be nine feet in diameter, by machinery invented by Dickinson Brunton. Yet here, to day, is a practically and scientifically organized scheme, backed by large capital, for the execution of Charlotte.

1. Come and see for yourself, and be convinced.

2. MOYER, in earnest of the task he proposed in jest and ridicule. Assuredly, it is un' safe to ridicule almost anything, no matter how impracticable it looks at e the moment, for posterity turns our ridicule upon ourselves.—Balt. Sun.

"Burleigh," in the Boston Journa says: Mr Talmage has been pouring hot shot into the opera; but he knows no more about the opera than does a Blackfoot Indian about chemistry. He could not tell an operatic strain from "Hark, from the tombs," if his life depended upon it. Morgan is his organist, and when he is in condition, few can equal him, The very day on which he preached his fiercest sermon on the opera Morgan at make off day. on the opera, Morgan struck off during the collection with one of the most popular of our operatic airs. The thing was so delicious that the officials demanded that that style of music should be introduced at each service. And so with Morgan banging away on the or-gan, and the cornet player joining with the bugle, make a little orchestra of its own, which gives the performance quite a thestrical air. In the meanwhile the innocent paster, without the slightest idea of what is going on, sits in his chair holding his hands in delighted ecstacy, expressive of supreme enjoyment, and reveling in the pleasures of the hour, all unconscious that the music is overthrowing the whole argument of the sermon. Everybody was delighted, especially the large portion of the audience who are accustomed to attend the opera.

IT HAVING BEEN REPORTED BY some that this Preparation is the same as Simmons' Liver Regulator, we deem it right to correct this impression. Although C. A. Simmons was former Proprietor of both preparations, he assures us that SIM-MONS' HEPATIC COMPOUND is his latest improvement in Medical Science, and that it has no connection whatever with former preparations, but that it is far superior, in every respect, to any Laver Medicine to which his name was ever attached, being composed solely of Vegetable ingredients.— The trial of one bottle will satisfy the most
