G S H APPLEGET, wishes to inform the public at large, that he is prepared to furnish Plans of all kinds of buildings, with working drawings in full, which will be found much plainer than those of any other man in the State, he being a practical builder, having an experience of 15 years in three of the largest cities of the United States. He can answer any question or give any information in regard to the construction of any part of the building, as he is fully qualified to go and do the work himself. With 15 years as a builder and 14 as an Architect, he knows just what is necessary for a mechanic to get along with, and with this experience you will at once see that he has a pretty good knowledge of the business. You can judge for yourself as to whether a man is an Architect without being a practical builder. Some in this State claim to be Architects when they have no knowledge of the business and can only be called draftsmen, and need some one to instruct them at all times should they undertake a job. For the last six years he has been employed in this State, and has done all the best buildings, with only a few exceptions in Raleigh, Goldsboro and Greensboro, and almost all over the State, where persons can see his work.

In Charlotte he would call attention to 8 P Smith's Iron Front Building, and Sims & Dowd's Store, and a number of the private residences here.
