LONDON, Dec 31.—The Times this morning has a special telegram from Berlin, that the meeting of Americans recently held in that city to protest · against the strictures of the German press in associating American civilization with the Bremer Haven dynamatic horror, has thoroughly attained its object. The German journals have almost unanimously withdrawn their previous unfavorable reflections. The Morning Standard also has a special telegram from Berlin on the same subject, which is corroborative of the above. The National Zeitung alone reiterates offer sive com-

the ministerial organ, asserts that Banks fell seriously wounded. The Gen Jovellar, the newly appointed Captain-General of Cuba, is to put an end to all abuses in that Island. Quite irrespective of persons or position, he will hold all offenders to full responsibility.

VICKSBURG, Dec. 31 .- A special to the Herald, from Summit, Miss., the place to which the troops were ordered, says that no armed band of men were in Sammit at any time on Wednesday before Christmas. Several young men from Amite county on a drunken spree, talked a good deal about Redmond, intending to annoy and frighten him. Redmond had a personal difficulty with one of the men, when he became frightened and telegraphed for troops. The dispatch says the citizens of Summit are able and willing to protect Redmond in the discharge of his duties. TA

APPLETONS'

American Cyclopædia. NEW REVISED EDITION.

Entirely rewritten by the ablest writers on Printed from Lew type, and illustrated with several thousand Engravings and Maps.

The work originally published under the title of THE NEW AMERICAN CYCLO-PÆDIA was completed in 1863, since which time, the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOPÆDIA

Within the last ten years the progress of liscovery in every department of knowledge has made a new work of reference an imperstive want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended and a new course of commercial and industrial activity has been commenced. Large

GEOGRAPHICAL KNOWLEDGE have been made by the indefatigable exploreres of Africa. The great polical revolutions of the last

decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and impor-tant seiges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in PERMANENT AND AUTHENTIC HISTORY.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possit le dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress of POLITICAL AND HISTORICAL EVENTS.

The work has been begun after a long and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination. None of the original stereotype plates have been used, but every page has been

PRINTED ON NEW TYPE. Forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary extenditure and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

THE ILLUSTRATIONS

Which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and of natural history, and depict the most famous and remarable features of scenery, architecture, and art, as well as the various process of mechanics and manufac tures. Although intended for instruction rather than embellishment, no pains have been spared to insure their

ARTISTIC EXCELLENCE. The cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopeedia, and worthy of its high charac-

This work is sold to subscribers only, payable on delivery of each volume. It will be complete in SIXTEEN LARGE OCTAVO VOLUMES, each containing about 800 pages, fully illustrated with several thousand Wood Engrayings, and with numerous colored Lithographic Maps.
