#### THE POSTAL CONVENTION.

This body, which concluded it labors at Fortress Monroe, on Thursday of last week, was significant, in that it was composed of three hundred delegates, business men from most of the Southern cities, who assembled to no legal authority, its influence through a memorial to Congress will undoubtedly be considerable upon that body. There is, however, no doubt that with the conclusion of the labors of the convention the work of the members they represented, has only begun. Every man of influence throughout the South must unite in urging upon our members of Congress the importance of the recommendations made by the convention. The convention wisely abstained from declaring over which route the fast mail asked for should be been made, in such manner as shall best subserve the interests of the people of the entire South.

ten members of the House, and these representatives must be made to understand that we demand their earnest and undivided support for such appropriations as will be needed to put our section of the Union on an equality with other sections, and that those who are most earnest and efficient in advancing the material interests of the South, as far as it can be done by governmental action, are the men who will be honored and advanced in of-

fice in future.

It was stated publicly by Mr Hubsion, to the delegates assembled in convention, that the Southern States to day had only eighty per cent. of the mail facilities which they enjoyed before the war, while the mail service throughout the Northern States of St. mark and 1 was very much amused one day at 2 o'clock at which time they are fed.
