SIXTH DISTRICT: WALTER L. STEELE, of Richmond.

ELECTION, TUESDAY, NOVEMBER 5TH.

# THE LATER NEWS FROM THE ELECTIONS.

Our election reports this morning, it will be observed, are brief and unsatisfactory. There is no reason for changing the figures made in yesterday's OB-SERVER as to Ohio; the Democrats have elected 11 Congressmen in that State to the Republicans'9-a Democratic gain of 3 Congressmen—but have lost the State ticket by about 10,000, showing a net Republican gain of something like 30,-000.

The midnight press dispatches of Wednesday to the Charleston and Augusta papers, received here last evening, furnish little in regard to the elections that the OBSERVER has not already had; but this little indicates that that Democratic gain in Indiana reaches about 14,000. The Legislature is still in doubt, and it is not certainly known now the Congressional delegation will stand; the Democrats will, however, lose no Congressmen, and it is possible that they have gained one or two. They have 4 members in the present Congress.

The news from Iowa grows more favorable. The latest is that the Democrats and Greenbackers have elected 2 Congressmen from this State. In the present Congress the Iowa delegation is solidly Republican.

Upon counting up we ascertain that the Democrats have gained at least 6 Con gressmen by the Tuesday elections, and that with these elections "perished," as the Philadelphia Times, independent, puts it, "the last hope of the Republi cans to reverse the Democratic control of the next Congress."

Many States have laws to meet the requirements of safety in the use of explosive fluids, and doubtless save many lives and much property in their borders thereby. The statute usually proimported, and prohibits the traffic except under certain restrictions where the fluid does not stand a required test, say 120 degrees F. The result is that oils not coming up to the standard of safety are shipped to States having no inspection laws, where they find a marwithout an inspection law, and doubtgeneral use. #### VAGARIES OF THE YELLOW FEVER.

Many of the most learned of the medical profession do not profess to understand the character or the treat-ment of yellow fever. It varies in its form with different localities, and even in the same localities, and its vagaries are innumerable. It presents very many curious and interesting features, but none more curious or interesting than this, as cited by Dr. Roger B. Traby, in a splendidly written and highly readable paper on this subject, printed in the October number of The Popular Science Monthly, now on our table. Dr. Tracy concludes his paper, which occupies four pages in the periodical mentioned, in the following language:

The germs are portable, and may be conveyed in baggage or merchandise (fomites) for hundreds or thousands of miles. If not so conveyed its progress is very slow. In 1822 in New York, where it gained a foothold in Rector street, it appeared to travel about forty feet a day until killed by the frost. It often leaves a house or block intact, going around and attacking those beyond, with no assignable reason. A thin board partition seems to have stopped it on Governor's Island in 1856, and an instance is related where it attacked the sailors in all the berths on one side of a ship before crossing to the other. Such apparent vagaries are, in the present state of our knowledge, in-

THE MORTALITY OF THE PLAGUES, PAST AND PRESENT.—The New Orleans Democrat reports the total New Orleans deaths to October 3, in the last four yellow fever epidemics to have been: In 1878, 3,006; 1867, 2,012; 1858, 3,476; 1853, 8.186. As compared with the other years, the deaths in the year 1878 are 994 more than in 1867; 470 less than in 1858, and 5,180 less than in 1853. In 1853 the fever previous to October 3, had run its course, the deaths for the week ending that date being but 75, and for the following two weeks but 77.

before Boardman, who was half a length before Dan Sporting, third; time 1.18. CHICAGO, October 10.—The Derby day opens most favorably, the weather excepted. The stiff breeze which is blowing from the southeast will materially lessen the speed in the great contest of the day. There are from eight to nine thousand people already on the ground and a constant stream is flowing in at the main entrance. There is general inquiry as to the conditions of the great horses which are to contend for the \$3,000 purse. Rarus and Hopeful were out jogging on the road this morning and showed up well. Great Eastern is also reported to be in excellent condition. Hopeful is the favorite in the following proportion: Hopeful 100; Rarus

80, and Great Eastern 30. LATER-The first heat of the 2.34 class was called at 1.30 p, m. Russian Spy won, Surprise second, Roofer, Jr, third; time, 2.261/2. Just before the start in the great event of the day, Hopeful sold at 200 to 100 on the field,

The first heat of this race was then alled. Hopeful got the pole, Rarus outside and Great Eastern second. The horses were greeted with tremendous cheers. They scored four times when the send off was given. Hopeful got the lead closely followed by Great Eastern. Lown the home stretch Rarus gained and coming in second, close to Hopeful, breaking about fifty feet from the wire. Great Eastern broke at the three-quarter pole. Hopeful won in 2.17¼; Rarus' time was 2.18½, Great Eastern 2.19.

The crowd present is estimated at from 15,000 to 20,000. There is great enthusiasm. In the second heat of the 2.34 class, Russian Spy won, Surprise second, Starling third, Captain Sellick fourth,

Charley C, fifth; time, 2.2914. The second heat of the great event was called with Hopeful a strong favorite. At the word "go" Hopeful lead, Rarus followed close. On the back stretch though Hopeful increased the distance, on the home run the gap was lessened, Rarus coming close, but the favorite came in about three lengths ahead with not the least chance of a fraud, Rarus tried hard to win, Time. Hopeful, 2.17, Rarus, 218, Great Eastern 2.21 Rarus was going at a 2.14 gait to the sulky on the home stretch.

PORTANCE. The Republicans Carry Iowa by Fifteen Thousand, but the Democrats and Greenbackers Elect Two Congressmen.

DES MOINES, IOWA, Oct. 10.—Up to midnight the State Register has a special dispatch, giving pretty nearly com-plete returns from fitty-one counties. In these counties the net Republican majority is 9,854. This is a Republican gain of about 1,000 over the vote for Governor last year. The Register estimates that the same proportionate vote throughout the State, as compared with last year, will give a majority in the State of about 15,000. In the seventh congressional district Gillette, Greenback-Democratic candidate, has 836 majority, with Adair county to hear from, which will reduce his majority to 600. Indianapolis, Oct. 10.—The most reliable reports from the ninth district up to 1 o'clock confirm the election of Orth, Republican, by a majority of 21. DES MOINES, Oct. 10.—Returns from 54 counties, which cast over half of the votes of the State, give the Republicans a majority on the State ticket of 12,200 -a gain of 2,380 on the gubernatorial vote last year. If this ratio continues, it will give the Republicans a majority of fully 15,000. The Republican Congressmen elected are: McCord, in the irst district; Price, int he second; Updegraff, in the third; Deering, in the fourth; Clark, in the fifth; Sapp, in the eighth; Carpenter, in the ninth. The Greenbackers elected Weaver, in the sixth district, by about 1,000 majority, and Gillette, in the seventh, by about 500.

PLEASANT PURGATIVE PELLETS. In explanation of the remedial power of these Purgative Pellets over so great a variety of diseases. It may be said that their action upon the animal economy is universal, not a gland or tissue escaping their sanitive impress. Age does not impair the properties of these Pellets. They are sugar-coated and inclosed in glass bottles, their virtues being thereby preserved unimpaired for any length of time, in any climate, so that they are always fresh and reliable. This is not the case with pills put up in cheap wooden or pasteboard boxes. For all diseases where a Laxative, alterative or Purga-

tive is indicated, these little Pellets will give the most perfect satisfaction. Sold by Druggists.

# Patent Cotton Gin.

World's Dispensary and Invalids' Hotel, Buffalo, New York.

P EVOLUTION IN GINNING COTTON.

Having purchased the Patent Right of H. A. WALKER'S Improved Cotton Gin, Leather Brush and Wiper, for the States of North Carolina and Tennessee, I am now prepared to sell County and Gin Rights for its use. Its advantages over the Bristle Brush are:

1st. It will gin wet or damp cotton as readily and as effectually as if it was dry.

2d. It runs one-fourth lighter.

3d. It costs one-third less.

4th. The lint is equal if not superior to that ginned by the Bristle Brush.

Testimonials will be furnished and terms given upon application to L. J. WALKER, Charlotte, N. C.

This patent, both for its cheapness and its effi-ciency is decidedly the best thing out.

Agents wanted, to whom I will pay liberally, it the right men. L. J. WALKER. sept14 d1m w6m BUTTERICK'S
