The State of California is stirred to its very depths over the bill to restrict Chinese immigration to this country, and all possible pressure is being brought to bear upon the President to induce him to sign the bill as it has passed Congress. With flattery, coaxing and cajolery they mingle menace, and their latest threat, supplementary to those which they uttered against both of the two great parties while the bill was yet pending in Congress, is to secede from the Union unless President Hayes affixes his signature and makes the bill a law. The San Francisco Daily Stock Report, the oldest financial paper on the Pacific coast, in urging that a monster mass meeting be held in San Francisco to demand of Haves that he sign the bill, uses the following extraordinary language:

This is a most critical time in the history of California. Whether there is to be bloodshed and anarchy in our fair State, riot and incendiarism and murder: whether our green fields are to be blackened and our garden spot laid waste; or whether, rather than incur these dreadful evils, we shall calmly in the end, all other resorts having failed meet and sever our connection with the national confederation, making laws for our preservation and the preservation of our children's heritage, the events of the next two days may determine. Already such a dread possibility as secession from the Union, in the event of our failure to obtain the relief we de-mand from the Chinese evil, is broadly talked of in high circles. The East has utterly failed to understand our situation, and to extend the aid and sympathy we have the right to expect from the sisterhood of States. Leading men say that we have pleaded, have exhausted arguments, have cried aloud for relief. but our most earnest appeals have been treated with indignity, and our suffer-ings been made a mockery. As a last resort we will take advantage of the geographical lines that surround us, the vast extent of soil within our bounda ries, the exhaustless resources of wealth that are ours, and will set up an Occidental republic, which, if it can not rival the old republic in its glory of the past, will at least be a magnificent empire of white freemen, whose heritage shall be preserved to their children and their children's children forever.

They are filthy and leprous; they constantly practice indecencies which are here not even to be hinted at; they are ingenious and imitative to the last degree: they can flourish, fatten and be happy in kennels which a hound would despise and on food which would starve to death the average house cat. Our laborers cannot begin to compete with them. Hence it may be argued that it is only the rian," if you choose—who has reason to dread their coming. Not so. Every line of industry on the American continent will be subject to their control if they get here the foothold which they seek. The capitalist may employ them at half the wages which he now gives laborers, to engage in any branch of manufacture. In a few months time they with unlimited capital at their command they establish an opposition busit ness, and undersell their former employer by half. The public might be the better for this if it were confined to one branch of business, but it will permeate every department and every line of industry, and when this is done it will not be difficult to foretell the ke-

Of course the question is a two-sided one, but we think the burden of tevel dence is against the Chinese, Canfornia has already had a bitter experience with its one-fourth population of Celestials. Southerness Tresidine Over the Senate.—Senator Withers occupied the vice-president's chair in the Senate a few days ago, and presided with the same easy grace that distinguished him while president of the Virginia Senate. AN UNNECESSARY ALARM.

A Washington special to the New Or leans *Times*, says the Democrats are alarmed at the discovery of a plan the Republicans to control the organization of the next House. The plan said to be determined upon is to carry all four California districts by aid of corruption fund and election law; if pos-sible, to buy or bribe with chairmanships and executive patronage all Inc pendents, Nationals and Greenbackers elected to the next House, and finally to indict, convict and imprison under the election law seven Democratic mem-

bers. This will do to tell to the marines-The Democrats are alarmed about nothing. They have, secure, 149 members of the next House, and with no more additional strength than is conceded them from California, they will organize the House and proceed to business without any delay. As to buying Independents. Nationals and Greenbackers with chairmanships, and one thing and another. the Radicals must get these before they give them away, and there are thus far no outward or visible signs that they are in the way of getting them. And so far as the conviction and imprisonment of seven Democratic Congressmen is concerned, they will have a lot of company when they get to jail and all of their associates will not be Demcrats, either.

MECKLENBURG'S SHARE.-The Raleigh News, referring to the Senate voting away \$50,000 of State money for the Cape Fear and Yadkin Valleys, otherwise the Western (Coalfield) Railroad, makes a statement of how this burden will bear upon certain of the heaviest tax-paying counties of the State, and gives \$6,000 as the portion of this new debt which will fall upon Mecklenburg. Mecklenburg respectfully asks to be excused. She already has as much money in railroads as she can conveniently pay the interest on, not to speak of the principal. We have no objection to the people whom it is proposed to reach with this railroad having a railroad if they will build it, but we do decidedly object to building an inch of it for them. If Mecklenburg has to pay out \$6,000 for any general State purpose, she would prefer, if she were given the naming of it, to mention the public debt. She has the nerve to shoulder her share of that, and until it is settled she is unalterably opposed to Luilding any This is mere poppy-cock and will Railroad.

Information continues to be received at the Department of Agriculture relative to hog cholera. This demonstrates the fact that the disease is not only in-fectious, but contagious, and it is also shown that other animals taking the disease from them can transmit the same back to the previous source. This has been made apparent by Dr. Law, of Cornell University. The only way yet suggested for the prevention of the spread of the disease is to stamp it out by killing the animal. It is estimated that swine to the value of \$20,000,000 or \$30,000,000 perish every year. The former appropriation to enable the department to investigate the subject was \$10,000, and a similar landount will be appropriated this year for the same

The House went into committee of the whole on the legislative appropriation bill, and discussed for an hour the amendment offered, by Southard, of Ohio, to repeal the election laws. Speeches were made by Hale, of Maine, against, and by Southard for the amendment, each taking the position that his respective side of the House would never yield on the point. It turned out, however, that Hale could not get the undivided support of his own side of the House in his tactics to defeat the amendment by refraining from voting, and thus preventing the appearance of a quorum. Three of the Republicans did vote and these votes with that of the Speaker constituted a quorum and so the amendment was carried amid great demonstrations of triumph on the Democratic side. The True Way to invigorate.

The true way to invigorate a feeble system is to infuse activity into the operations of the stomach, that wondrous alembic in which the food is transmuted into the constituents of blood, the chief element of our vitality. Hostetter's Stomach Bitters, because it accomplishes this end, is greatly to be preferred to many so called tonics, useful indeed as appetizers, but inoperative as aids to diges-tion and assimilation. This sterling cordial, while it invigorates the stomach, healthfully stimulates the liver, bowels, and kidneys, ensuring the escape through the regular channels of effete and useless matter thrown off by the system, which is thus purified as well as invigorated by it. Its tonic in fluence is soon made manifest by an increase of vital energy and a more active and regular discharge of every physical function, and it has the further effect of rendering the system unassallable by malarbil epidemies.

There is a form of consumption which was better indicated by the old fashioned name of "decline." It is the dreaded scourge of some parts of the Sonthern States, claiming more victims every year than are swept away by the most terrible visitations of the yellow fever. The malady arises from the inability of the patients' system to take up and assimilate the nourishing ingredients of the food that is eaten. Some years ago the medical profession with remarkable unanimity, agreed that Cod Liver Oll contained the most concentrated and easily absorbed elements of nutrition. If the nau-Liver Oil contained the most concentrated and easily absorbed elements of nutrition. If the nauseous taste and smell of the oil could be avoided it would unquestionably be the most sovereign remedy that ever shed a healing bleasing on the human race. And these repulsive properties are successfully removed by the union of pure Cod Liver Oil with the Hypophosphites of Lime and Soda in Scott's Emulsion. The combination is a most elegant one, pleasant as sweet milk in flavor, congenial to the stomach, and acting directly as a powerful yet gentle tonic of the brain and nervous system.
