The Stickleather Trial.

The trial of young Stickleather on the charge of rape, in the Superior Court of Iredell, is attracting a good deal of interest in Statesville. There are fully fifty witnesses, among whom are five physicians. These were examined Fri-day evening, when Judge Graves ad-journed the court. He said it would reassemble yesterday morning at 6 o'clock as he was determined, if possible, to conclude the case before Sunday. Eight lawyers are engaged in it, four on a side. Miss Ward, the young woman who is alleged to have been assaulted, was on the witness stand, and was subjected to a rigid examination. She claims that chloroform was used. It was the general opinion Friday afternoon, and has been from the beginning, that the charge could not be sus-

Mrs. Pedestrian Potts.

Mrs. Potts, the walking woman, was expected to arrive in Atlanta about 5 o'clock yesterday afternoon. When last heard from she was only a few miles from that city, and was putting in some of her lengthiest strides. Atlanta, al-ways ready for a sensation of any sort, awaits her arrival breathlessly. It is reported by telegraph here that she will be met by 2,000 people. Arrangements have already been made by which she was to walk there last night in a large hall against time. Her trip from Charlotte was without accident. She made the 266 miles in less than 10 days -averaging over 27 miles per day. She was treated with the utmost kindness along the road. At Central, the ladies presented her with a new walking suit. She has had, by courtesy of Col. Foreacre, free use of the railroad telegraph line while on the road.

#### Local Causes of Diphtheria.

In connection with the sanitary movements now on foot under the direction of the city authorities, we quote the following from Dr. Snow, an eminent physician and registrar of the city of Providence, R. I., in his last report: In connection with this subject I think it my duty to ask the attention of

the people of Providence, and especially of parents, to the following statements: 1. No case of dipththeria occurs without an adequate cause. This is self-

evident. The cause of nearly all cases of the disease exists in the houses or premises,

or within a few feet of the houses where the cases occur. 3. The cause of nearly all cases that occur in the city is breathing impure air from privy vaults or sink drains, or cesspools; or drinking impure water. Much observation and long-continued and careful investigation have perfectly satisfied me of the truth of these propositions, and they are applicable to all cases, whether in the tenements of

The Liddell engine with the locomotive attachment was given another trial
on the streets yesterday afternoon, and
attracted much attention, as may be
imagined. It was a curious light that
of an engine weighing over six thousand pounds moving the streets with
only two men holding the tongue, to
guide it. It was run at the rate of three
or four miles an hour. The rate of or four miles an hour. The rate of speed is easily regulated by the governor, without regard to the quantity of steam in the boiler. It has never been tested to its fullest capacity, but is believed to be capable of making ten miles

an hour on a perfectly smooth road.

Mr. Liddell seems to have discovered the secret by which road engines can be successfully operated. The invention is entirely his own. The locomotive attachment to the engine invented by him costs only 2000 more and saves the labor costs only \$200 more and saves the labor of four or more horses. They are on sale here by Capt. Jas. F. Johnston.

#### FUNERAL NOTICE.

Died, at his residence in this city, resterilay af-ternoon, June 21st, George Stewart, Sr., aged 59, years—a native of Durham county, England.

The funeral will take place this afternoon at 5 30 o'clock from Tryon Street M. E. church. The friends of the family are invited to attend.

And Still Another Branch House.

[Southern Musical Journal.] With our fine array of Branch Houses at Atlanta, Augusta, Charleston, Greenville, Jacksonville and Pensacola, it would seem as if we ought to have been pretty well satisfied, but nevertheless we were not quite happy and all for the want of one more Branch House. We have Georgia, Florida and South Carolina pretty well stocked up with Branch South Carolina pretty well stocked up with Branch Houses, but there seemed to be a vacancy in North Carolina and so we captured Charlotte and converted it into a grand musical depot from which our "Tar Heel" friends can be supplied with our instruments and music. This new Branch will be known as the "McSmith Music House" and be under the management of Mr. and Mrs. McSmith, who have made our Greenville (S. C.) Branch such a success. A fine store room has been secured and a large and complete stock of Planos. Organs, Music and small Musical Instruments will be kept on hand at prices and terms precisely the same as at our central Savannah House. All stock for this House is shipped direct from Factories and having the advantage of our large cash purchases they are enabled to sell as low as we can and to compete with any other House in North Carolina or the South. Our North Carolina patrons will hereafter South. Our North Carolina patrons will hereafter find it to their interests to patronize the Charlotte House rather then eurselves, inasmuch as by so doing they will save largely in freight and receive their goods in one-half the time. "Happy McSmith" is so well known in and around Charlotte that we have no need to endorse him, but to those who don't know him we will say that when he is selling a Piano or an Organ he is as happy as a man can be, and as selling instruments is his daily business he is happy all the day long. He has a happy faculty of making everybody else happy and if Charlotte is not full of happy people before he has been there long it will be because happiness ain't contagious. contagious.

With this magnificent chain of Music Houses and our Grand Central Depot, we are now able to supply a solid musical South with Musical Instru-ments and Publications. We are progressive men and it is our aim to extend our facilities with our steadily increasing trade and thus ever maintain our acknowledged supremacy as the Leading Music

Right Time to Operate in Stocks.

By recent communication with prominent stock operators, we learn that now is a favorable time to take advantage of the stock market, by the new combination method of Mesers. Lawrence & Co., the New York bankers, who have been so remarkably successful heretotore. This system is founded on correct rules of finance and is universally approved by the shrewdest operators. The orders of thousands of customers are massed into one immense capital, and operated as a great whole, dividing profits pro rata every month. In this way any customer can invest from \$10 to \$10,000 with equal proportionate success, and at the same times any customer can invest from \$10 to \$10,000 with tequal proportionate success, and at the same time again all the advantages of largest capital and best skill in manipulating the market. This firm's new circular has "two unerring rules for success" and full explanations. \$50 will make \$250, or 5 per cent; \$500 will return \$3,000, and so on, according so the market.
