The many annoyances connected with the old system of Button Gloves are entirely overcome, and the following advantages secured: 1st-The perfect ease and rapidity with which it is laced.
2nd—Its adjustability to fit the different sized wrists.
3rd—The advantage gained by gradually straining the Kid, instead of the old system which ruins so many pairs the first time buttoned.
4th—Strength of Hooks and mode of clinching them. The fastening will outlast any glove, which is a very rare occurrence with buttons.

Independent of Improvement in fastening the quality is guaranteed equal, if not superior, to any other glove in the market. FOR SALE BY
