Seven burials in Wilmington last

The *Plant* claims for Durham a population of between 3,500 and 4,000.

Mr. J. G. Oldenbuthel, a German citizen of Wilmington, has picked up a foundling on his porch, and the next day it died. ...

The mayor of Wilmington recently made a drummer pay \$50 fine and costs for selling goods without a license, and for being impertinent to the court.

Another attempt via made last Friday night, says the *Plant*, the second this season, to me the sash, door and blind factory of P. J. Mangum, of Durham. The incendiary was run off before he quite accomplished his work.

The Durham Tobacco Plant says the prospects of the University Railroad are flattering. The North Carolina

Railroad, at a recent meeting, subscribed \$5,000, and Gen. Hoke, in behalf of the tron mine at Chapel Hill, has subscribed \$5,000, and the Plant says \$20, 000 can be raised immediately, which will guarantee the road.

ron, of Columbia, was united in marriage with Miss Floride, daughter of Col. Jas. H. Rion, of Winnsboro. A fight is in prospect now over the

associate justiceship left vacant by the promotion of McIver. Governor Simpson is most generally spoken of for the place, but a strong disposition is evident among some members to oppose him. The accidental discharge of a gun in

the hand of Ernest Cochran, son of ex-Senator Cochran, in Anderson, wounded a colored boy in one leg, who was standing at a distance of seventy-five or a hundred yards. A petition numerously signed, has been sent to the Legislature asking that Spartanburg's town charter be so amended as to make the term of office of in-

tendant and wardens two years. Also that the powers of taxation be not increased.

Indiana Views on the Colored Immi-/ gradion.

CINCINNATI, O., Dec. 13.—The arrival for that cold climate, and that efforts were being made by Republicans to relieve their more pressing wants, as they were destitute of baggage or money. They are a simple people, entirely unaware of the commotion their arrival has created, and seemed more intent on getting something to eat and sufficient clothing to protect them from the cold than on disturbing the equilibrium of political parties at next years elec-

The Gazette's Indianapolis correspondent says that these people should not be encouraged to come there at this season of the year, and the movement should be checked until spring. Now the farmers are not needing help, and colored men can better wait the coming of spring in North Carelina that in Indiana; then strong men can readily get employment. The entire baggage of two hundred men who came yesterday would not fill a small hand-cart.

A Persistent !laveholder.

Memphis, December 13.-Judge E. S. Hammond, of the United States Circuit Court, to-day had a novel case before him. J. C. Birmingham, of Lauderdale county, Tennessee, had been indicted for unlawfully holding two colored girls in slavery. It appears that Birmingham refused to recognize the abolition of slavery, and ever since the war has claimed to own the girls because he owned their mother. The conduct of Birmingham excited the indignation of his neighbors, and at their instigation the United States grand jury recently found an indictment against him. Judge Han mond quashed the indictment, holding that the act of Congress which says that every person who kidnaps or carries away any other person with the intent that such person be sold into involuntary servitude or held as a slave shall be punished by fine and imprison-ment could not apply to any one hold-ing or pretending to hold in slavery in this country because of slavery having been abolished. There could be no slaves here, and therefore no one could be held as a slave. This, the judge said, is an offense not provided for by any act of Congress, and not punishable by indictment in the Federal courts. The defendant was discharged.

A Bridal Robe.

The following is a description of a bri-dal folie worm by a Philadelphia bride last week: The robe was of a cream-tinted white satin of the richest texture, with a silvery sheen. The front of the shirt was embroidered in pearls and white bugles, forming a large pyramid of flowers and leaves on either side of the lace, made to order in Brussels, which was arranged in jabots, each having in the centred bouquet of waxen orange blossoms. Bordering the lace was a vine embroidered in pearls and white bugles, running perpendicularly from the bottom to the top. The train was very long and cut square; lace arranged in jabots trimmed its entire length at the back. The waist which had sharp points back and front, was low neck, square, and trimmed with the same lace as the skirt, to represent a bertha. The deep border of the handkerchief was of exquisite lace. The fan had rainbow-hued fine pearl sticks. The veil of tulle was unusually long, and was fastened to the head with wazen orange blossoms similar to those on the waist and skirt elected

Mr. Tilden's Position. Wash. Special to Baltimore Sun. . A number of gentlemen who are credited with being friends of Mr. Tilden have been circulating around the hotels and other frequented places in the last week, evidently with the purpose to gauge public opinion. It has been noticed here ever since the meeting of noticed here ever since the meeting of Congress that very few if any of the Democratic members of either house believe that Mr. Tilden either will or can be a candidate for the next presidency, and it seems quite the general idea here that his name will not be prominently before the next Democratic convention. An "Agricultural Number" of Scribner's Monthly.

In addition to the usual variety in the contents of Scribner, the November issue contains a half dezen papers of the highest interest to farmers, and others interested in rural life: "The Agricultural Distress in Great Britain,' by P. T. Quinn; "Farming in Kansas,

by Henry King; "Success with Small Fruits," by E. P. Roe; "Rare Lawn-Trees," by Samuel Parsons. Jr.; "The Mississippi Jetties," and their effect on the prices of agricultural products, and "How Animals Get Home," by Ernest Ingersoll.

There are two fine portraits of Bayard Taylor—one engraved by Cole, from the best photograph, and the other a reproduction by Juengling, of O'Dono-yan's bronze bass-relief. These portraits accompany a discriminating critique of Taylor, by Stedman Clarence Cook has a paper on "Morris Moore's Old Masters," with a reproduction, by Cole,

Reorganization of the Supreme Court.

The rumor that Mr. Justice Hunt of this State has resigned his seat on the of colored immigrants from North Car- bench of the Supreme Court was wholly olina in Indiana is viewed there with unfounded. Bradley is 68, and is ready to retire voluntarily when he may get the pension. Hunt is hopelessly broken in health by paralysis. It is evident from this exhibit that the court will be reorganized during the administration, and, in all probability, within a short time after its advent to power. The election of a Democrat or Conservative President might indeed change the political complexion of the court within the first twelve months. The election of a Republican would confirm its partisan

Measuring Pulse-Waves.

for an indefinite period of time.

character beyond the reach of reform

New York Times.

A young physician in this city has invented and perfected a curious little instrument for observing and measuring the pulse-waves of the human circulation, which, in simplicity of con-struction and application, takes prece-dence of all the instruments for this purpose so far produced by human ingenuity. A minute disk of hard rubber firmly fixed to the base of a graduated tube, such as is used in the manufacture of thermometers, forms the essential part of the instrument. At the base, where the rubber diaphragm is adjusted to it, the glass tube is somewhat expanded in diameter, so as to form, with the diaphragm for a floor, a receptacle capable of holding a few mimims of water colored with carmine. The re-mainder of the tube has the internal diameter of that of our ordinary medical thermometer. When the disk of the instrument is placed firmly upon or against the wrist, the vibration of the tissues beneath caused by the artery is communicated to it, and the colored liquid dances up and down in the tube, registering to the eye of the practiced physician the force and particular deeription of each wave. Simple as the instrument is, its delicacy and accuracy are marvelous, while there are no adjustments to get out of order, and the merest tyro can apply it successfully.

The Postoffice Department has issued a catalogue of nearly 12,000 separate "lots" of articles accumulated in the dead-letter office, which are to be sold at auction in this city during the present week, commencing to-morrow. Among the articles so carelessly mailed that no clue can be discovered to their ownerships are gold watches, chains and rings and jewelry of almost all kinds; every de wearing apparel, from men's overalls to babies' socks; books and pictures by the thousands, musical instruments clocks, bed quilts, buffalo robes, pistols, knives, tin dishes, nails and hardware of almost all descriptions, (including
