# NORTH AND SOUTH.

### Answering the Absurd Article of an Ignorant Writer. St. Louis Republican.

"The North grows and prospers under the idea that we are a nation, and that the States are bound together by common interests and a common destiny. The South worries itself over the maintenance of the separate sovereignty of the States, and neglects to apply itself to the work of industrial development, upon which the relative strength of sections depends. In straining to preserve its political solidity, it is in The Newbern Nut Shell learns that lack of enterprise, in its want of variety of industries, in the backwardness of Abner Wetherington, who lives its commercial appliances and in the sources.'

"The idea that we are a nation" has no more to do with the growth and ly pointed it at his sister, when the current of the Mississippi or the tempiece was accidentally discharged, the perature of the Gulf stream. Just as little has "the maintenance of the sovereignty of the States" to do with the lack of growth and prosperity in the South. Putting aside all other causes some of which have been at work for a hundred years—the North not only emerged victorious from the civil war, but owing to a peculiar combination of circumstances, grew and prospered during the war. The South, on the other hand, was not only beaten in the end, but went down hill rapidly while the struggle continued. With empty treasury and ruined credit, the flower of her population in a bloody grave, and the It is learned from the News that at | working class utterly demoralized by the meeting of the Republican district | emancipation, she was thrown into the not to call a convention for the election grinding process lasted ten years, and of district delegates to the Chicago con- | the wonder is, not that so little is left, I. The leading organ of the party which supplemented the South's disastrous war with something vastly worse-negro and carpet bag rule sustained by bayonets—can hardly afford to taunt the victims of Republican policy and attribute their inferiority in strength and wealth to political ambition. All "the separate sovereignty" the Southern States want is the right to manage their own affairs in their own way, subject to the constitution and the laws.
