The Latest Man-Killer. All the most terrible and deadly weapons of war have been thrown completely in the shade by the new Gatling gun which was exhibited on the 27th of March at the offices of Sir W. This fearful weapon is capable of firing a thousand shots per minute and killing a man on a horse at a mile range. It has a compact appearance, can be taken to pieces and easily ance, can be taken to pieces and easily carried about, can be applied to military and naval use, and the mechanism of it is simplicity itself; the revolving band has two compartments, into which, as they whirl around, metal cartridges drop from a tall, oldeng case fixed over the centre of the barrel. At each turn of the handle, ten shots are fired, and their dispersion is accomfired, and their dispersion is accomplished by a sliding apparatus. The size shot in different calibre guns of this class ranges from musket balls to half pounders. By the use of this implement three men can do the work of three hundred single men. practicing law in the counties where they hold office. March 29, 1880, Mecklenburg county justices were made free to practice law if they can get clients.

It Beats Gold or Silver Mining. Gen. Beauregard, whose adversaries tried to use the panoply of the U. S. Postoffice Department as a shield for their covert malice, by an honest clear exposition of the mode of drawing of the far-famed Louisiana State Lottery, on the second Tuesday of every month, has won a decided triumph. The next monthly drawing (the 120th) will take place at New Orleans, on May 11th, and \$2 sent now to M. A. Dauphin, New Orleans, La., or to No. 319 Broadway.
