THE CAMPAIGN.

The American people are nearing the end of a political campaign for the presidency of this great country, which in the triumphant victory of the Democratic party, by a majority of more than cessities of war were long past, a quarter of a million of votes or more. It was a Republican President who than were cast by something more than five such States as North , Carolina. But by a species of trickery such as was never before seen on the 'American continent, the will of the people was suppressed, and a president inaugurated and a party re-installed into power that had been repudiated by the people at

The Democratic party knowing that they had a large numerical majority among the actual voters of the country, in the very inception of the campaign, begun an aggressive canvass. They nominated a man whose personal integrity was spotless, and against whom no charge of corruption could be successfully brought-a man who had the confidence of the whole people without regard to party affiliations, except upon purely party questions. His Democracy was of that unfinching kind which endeared him to his party and made his political energies fear him. But aside from that he was a worthy and respected citizen-an honor both to himself and to his country, a superb soldier and a statesman in whom there is no guile.

His nomination at once put the Republican party on the defensive, because they had nominated a man at Chicago, who was

Upon the top of all this the Republican candidate for the presidency stood on the platform and record of the Re- nia Clock Company's factory, situated publican party for the past fifteen years on the corner of Seventh avenue and publican party for the past fifteen years -years marked with the deseration of the landmarks in the constitution, and filled with infamy more unjust towards | fire at 2 o'clock this morning. THE CHANGE DEMANDED.

The change demanded by the Democratic party is a continuance of that change already begun by their victory in 1876. Some of its best fruits we were defrauded of by the consent of the whole Republican party to share the crime of its leaders in stealing the presidency. But that change, though partial swept off the last vestiges of carpet-bagging and bayonet rule from the the campaign. The fight is being made Southern States. That change com- red-bot in New York State, upon which pelled the saving of many millions of the result so largely hinges. Naturally, dollars per annum heretofore squander- they have little time for gossip, hence ed by Republican Congresses in need-

less and extravagant appropriations. That change put a stop to the fiscal improvidence and blundering of Republican party leaders. Democrats now held the purse strings of the nation and the national committee who are not make its laws. That change, though less than the people by their votes had Hancock's chances have improved very decreed, was no small part of the benign influences that have made possible our present condition of incipient prosperity, after the long and afficting part of the open successful and he is likely to be elected. They point to the fact that the roll of Northern States which Hancock has an even chance of carrying has been swelled nign influences that have made possible ralysis of industries and trade, chiefly due to the incompetency, the false principles and the foul practices of the Berlin and the Berlin and the foul practices of the Berlin and the foul practices of the Berlin and the Be ciples and the foul practices of the Bepublican party.

The change thus demanded and inaugurated by the Democratic party men at headquarters to-night was Samthrough their representatives in Congress, has already inspired such confifidence and just faith in the public cred-it among all classes, bankers, merchants private talks that the Democratic manfarmers, workingmen and even the trustees of the widow and orphan, that home, and now out of the \$1,700,000,000 spent its force and is more than disof interest bearing debt, barely \$200,-000,000, probably not much more than

\$150,000,000, remain held abroad. The greatest financiers and economists in the United States have been the leaders of the Democratic party, not forgetting Alexander Hamilton, whose fame is paling in the light of history and fiscal science by comparison with that of Albert Gallatin, Secretary of the Treasury under Jefferson and Madison.

It was by a Democratic administration that our successful sub-treasury system headquarters, as there is with the Rewas adopted. It was by a Democratic publican leaders. The Democrats are administration that the national debt quietly but earnestly watching every was once paid and extinguished.

NEW YORK, Oct 15. The last week of the campaign opens with the utmost activity at the national Democratic headquarters. Everyone there is cheerful beyond expression and all are bending to their work with more resolution and vim than has been seen before in it is that there is nothing alarmingly new in the general situation. The one thing apparent above all is that new life and vigor and earnestness has been imparted to the campaign by the Democrats. The sober-thinking members of given to speech unless they have honest convictions to express say to-day that much within the past four or five days and Oregon. N. York, N. In a private conversa-tion not intended for the public ear he expressed himself as really expecting to agers convince visitors of their sincerity. The reasons they give are that daily advices from trusted agents attest our federal securities have been brought | that the tariff question argument has counted by Garfield's Chinese immigration views; that the people have be-come convinced that the so-called Republican victory in Indiana was gained by unblushing frauds; that Republican bull-dozing by employers is reacting up-on the party and making votes for Hancock; that the evidences of Republican attempts to colonize voters in New York city and in Florida and carry elections by fraud are disgusting honest men. These are the newest

causes of the reaction in favor of Hancock, and the Democrats are very confident that they will elect him, There is no brag and bluster at Democratic sign of the times and are missing no chances. The very best speakers in the party are now at work in the State, and more than a hundred meetings a night New York State.

THE CHINESE LETTER.

The Garfield cheap labor letter was were at work in the Democratic rooms wrapping up for the mails a document addressed to the indrustrial classes and containing extracts from the Garfield letter. Thousands of copies were being prepared.

It was again whispered to-day that Ben Butler had a finger in it and the proper time he would bring forward his proof. Truth also claims that it can bring forth sufficient evidence to show that the letter is genuine and will begin either to-morrow or next day an elaborate explanation, running over two or three days.

It is rumored to night that the editors and proprietors of Truth are to be arrested for circulating the letter in order that Chairman Jewell may have a chance to telegraph over the country that he has the forgers in jail. At Truth office the reply to this was that they wished the Republicans would arrest them, for they are prepared to prove the genuineness of the letter. "How did you come into possession of the letter.

"The Truth newspaper brought it to

us. That paper, it appears, had been

publishing a series of articles on the subject of cheap Chinese llabor, taking the ground that unrestricted immigrawould not only degrade but destroy American labor and drive our mecharics and laborers to starvation and par-pers' graves. As a journalist you can well understand that this course on the part of Truth won for it the attention and approbation of men interested in the lai or movement, und brought to it all sorts of hints, suggestions, communications and documents. In this way they learned about this Carfield-Morey letter, learned that it had been found among the effects of Mr. Morey, who died lately. They sent on and procured the letter and envelope. The figures you observe on the envelope are those made by Mr. Morey—some business calcula-tion or other. As soon as the matter was submitted to us we ealled the advisory committee together. These gentlemen, realizing that the letter, if genuine, would be of incalculable value to the Hancock cause, and would completely tear from the Republican party the mask of pretense they have been wearing of being the special guardians and protectors of American labor and flying machines, but none of them have working men, at once took steps to authenticate the document. From all parts of the Union the news comes that Garfield's Chinese

So the handwriting is on the wall, The American workman reads it and interprets to Garfield: "Thou art weighed in the balance as between the rights of American labor and the arrogance and selfish greed of organized capital in the hands of soulless and unscrupulous monopolists and found wanting.
