A Bird's Fear of the Dead.

It is not mere sentimentalism that pleads in favor of the most merciful form of death being adopted in case of the slaughter of animals intended for human consumption. There is no question that much suffering would be spared cattle if they were not allowed to see each other slaughtered. Not easy is it to conceive the kind of torture they feel and cannot express. How observant are animals is proved by a case which came under my own observation. Among the inmates of my house is a It is not mere sentimentalism that Among the romates of my house is a jackdaw, an ill-grained and vituperative bird as ever accepted, under protest, human companionship and human attention. He prefers so distinctly sleeping in a cage where no enemy can assail him while he is off his guard that he is allowed to have his own way about the matter. One day, while he was in the cage, some dead pheasants, which had just arrived in a hamper, were placed beside him. His dread of these was remarkable to witness. A bird whose whole time was passed in defiance of things stronger than himself, in aggravating a mastiff that would not make two bites of him, or in pinching surreptitiously the flamboyant tail of his arch enemy the cat when it came sleeping in a cage where no enemy can

one of it own race, albeit so different a thousand a day; so that your watch, expecies, is not to be guessed. Much posed to all the vicissitudes which heat food for reflection and speculation is, Glonn's Great Wheat Farm. Dr. Hugh J. Glenn made his first purchase of the Jacinto grant, Cal., in December, 1867, and commenced farming in the Sacramento Valley. He has now a farm of 65,000 acres, 45,000 of which are in wheat, and has 175 miles of fence. Of this year's crop, Dr. Glenn says although he has on hand 350,000 sacks, each holding 140 pounds, he thinks he will not hold his wheat. He has his own machine and blacksmith

sacks, each holding 140 pounds, he thinks he will not hold his wheat. He has his own machine and blacksmith shops, boring, turning and planing machines, buzz-saws, &c. He manufactures his own wagons, separators, headers, harrows, and nearly all the machinery and implements used. He has employed fifty men in seeding and one hundred and fifty in harvest, two hundred head of horses and mules, fifty-five grain-headers and other wagons, one hundred and fifty sets of harness, twelve twelve-foot headers, five sulky hay rakes, twelve eight-mule cultivators, four Gem seed-sowers, eight Buckeye drills, eight mowers, one forty-eight inch separator thirty-six feet long and thirteen and a quarter feet high, with a capacity of ten bushels per minute, one forty-inch separator thirty-six feet long, two forty-feet elevators for self-feeders, one steam barley or feed mill and two twenty-horse power engines. The forty-eight inch separator threshed to 8th of August, 1879, 5,779 bushels of wheat in one day. Dr. Glenn is a native of Augusta county, Va.

The South American War.

The mediation of the United States in the successful war of Chilly against Peru and Bolivia seems to have been accepted by all the parties to the contest, and Minister Christiancy is occupied in arranging the preliminaries for the meeting of the commissioners, though advices from Buenos Ayres appear to anticipate merely negative results. There will be some difficulties to encounter in consummating a treaty sults. There will be some difficulties to encounter in consummating a treaty of peace, and the office of mediator is always a delicate one, especially for a country which, like the United States, has formally eschewed both "entangling alliances," and all sorts of intervention in the affairs of foreign countries. Yet, in a case of this kind, there are moral as well as material reasons which would seem to justify the friendly officers of our government. The United States undoubtedly occupy a peculiar position towards the republics south of our frontier. Our government would searcely suffer any of these States to be destroyed by a Europerian power, unless the circumstances were exceptional, and it is natural for it to object to seeing these republics destroy one another. UNDER and by virtue of a deed of trust recorded in the register's office in book 20, page 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose for Sale at the Court House 504, I. will expose 504, I. will expose for Sale at the Court House 504, I. will expose 504, I. them, and procure that suspension of hostilities, which, must, be, preliminary to a definitive peace.

man as Anton pol hanne Hmeinber. mGen.is Plaisted, Governorelect ofer Mainey has this to say of the sixth terms ''I cannot be indifferent as regards the issue between Hancock and Garfield. The peril to our country from a sixth term of the Republican party is too great. We have heard much of the dangers of a third term, and from the Republican side. Yet that party demands a sixth term. A change of candidates is nothing; unless it involves a change of parties. Give the Republican party a sixth term, and then farewell to the constitution of Jefferson. There will be a governing aristocracy; with the strong government to keep There will be a governing aristocracy; with the "strong government" to keep the measure in subjection. This is the meaning of a sixth term. I cannot be indifferent to the struggle; my heart's desire and prayer to God is that this Republican devil may be east out now, even though it be not done in the name of my candidate. Teller be done in the name of Hancock than not at all." ATLANTA, GA., Feb. 4, 1870.

HOW TO THEAT A WATCH.

A Few Simple Bules for the Preserva-

Having obtained a really serviceable article you should, in order to produce satisfactory results, follow out these rules: Wind up your watch every day at the same hour. This is generally done at the hour we retire to rest, or perhaps better still the hour we rise. A void putting a watch on a marble slab or near anything excessively cold. The sudden transition from heat to cold contracting the metal may sometimes resuse the mainspring to break. Indeed, the cold coagulates the oil, and the wheel-work and pivota working less freely affect the regularity of the time-keeper. When we lay our watch aside we ought to slope it on a watch case, so as to seep it nearly in the same position as it has in the pocket. In laying aside your watch be sure that it rests on its case, has by suspending it free the action of the balance may cause oscillation, which may considerably interfers with its going. If you would keep your watch clean you must be quite sure that the case fits firmly, and never put it into any pocket but one made of leather. Those pockets which are lined with cloth, cotton, or calico give, by the constant friction, a certain quantity of fluff, which enters most watches, even those the cases of which shut firmly. If the watch is not a keyless" one, the key should be small, in order that we may feel the resistance of the stop-work; then we can stop in time without foreing anything. It is of the stop-work; then we can stop in time without forcing anything. It is also necessary that the square of the key should correspond with that of the watch. If it be too large, it may in a short time cause the wind-up square to suffer from undue wear and tear, the rectifying of which is rather expensive. The hands of an ordinary watch can be turned backwards without much risk. It is, however, always better to move the hands forward to adjust your watch

to correct time. A skilful watchmaker one day thus reasoned with a customer who com-plained of his watch: "You complainof his arch enemy the cat when it came within reach of his cage, went at this sight into an ecstacy of terror which could not be appeased until the uncanny objects were removed. What instinct caused this strange demonstration in the presence of death shown in the presence of dea and cold occasion it the varying weight of the air and the shaking to which it is subjected, has not varied more than a minute a month or two seconds a day.

a minute a month or two seconds a day. It has only acquired with each vibration of the balance a variation of the two-hundred-and-sixteen-thousandth part of a second, Judge, then, what must be the extreme perfection of the mechanism of this watch!"

A watch cannot go for an indefinite period without being repaired or cleaned. At the expiration of a certain time the oil dries up, dust accumulates, and wear and tear are inevitable results to the whole machinery, the functions becoming irregular and frequently ceasing to act altogether. A person possessing a watch of good quality and desirous of preserving it as such should have it cleaned every two years at least. But care should be taken to confide this cleaning or repairing to careful hands: cleaning or repairing to careful hands; an incapable workman may do great injury to a watch even of the simplest

Redeeming Indiana

Indianapolis, October 28 .- The Republican fright in Indiana continues, publican fright in Indiana continues, and it may reach a panic before election day. The Republican leaders telegraphed for George C. Gorham Sunday night. The following is said to be a true copy of the dispatch:

"INDIANAPOLIS, October 24.—Hon. Geo. C. Gorham, Washington, D. C.:
The Democrats are making a determinged and supprising fight in every granty.

ed and surprising fight in every county in the State. They are organizing in secret, and it is thought English has put up a large sum of money. See our friends and give the alarm. You had better return to Indianapolis at once.

There is great danger."

It is evident that Gorham did not tarry long after receiving the dispatch, for he arrived in the city this morning, took up his headquarters at the New-Dennison, and commenced active work

The majority or rather the plurality of Porter over Landers is only 5,958, in-stead of 7,558, as reported. The plurality of Hanna for Lieutenant Governor over Gray is only 4,777. The latter is about the average plurality against the Democratic State ticket. Gen. Manson is only beaten about 4,500.

By this it will be seen now easy it will be for the Democrats to carry the State for Hancock if they will only keen at work.

The Florida Colonists.

for as a reputable citizen of Monmouth.

N. J., has made affidavit that he was a fellow passenger with one of the installments of repeaters alleged to have been sent to Florida recently by the Republican national committee; that on publican national committee; that on reaching Florida several of the men informed him that they were not really going to work on a rankroud, as had been at first represented, but refused to answer further inquiries. McCabe further says that from October 9 to 16, at which latter date he left Jacksquville for New York, he saw great numbers of the alleged laborers going up to the Republican headquarters on hay street; that he asked the reason of their visit to said headquarters, but received no answer.

ed up, expecting that the public non 79 91 he Tide of a ministration (1999) Washington, Oct. 21—According to the report of the Bureau of Statistics 51.815 immigrants arrived at the ports of the United States in September. For the three months ended Sept. 31. the number of immigrators arrived was 154.832, against 68.651 for the same period last year.
