OFFICE OF A. S. GILES, ORDINARY, HOUSTON COUNTY, FERRIS, GA., Jan. 28, 1880.

In the year 1878, there were two negro prisoners confined in the jail of this county who were very badly afflicted with that loathsome disease Syphilis, my official capacity as Ordinary, I employed Capt. C. T. Smith, then a resident of this place, to cure them, under a contract "no cure, no pay." He administered to them his now justly celebrated Syphilite Specific, and in a few weeks they were cured, and paid him out of the county treasury, as he had effected a complete and radical cure.

In testimony of the above, I have hereunto set my official signature and seal the date above written.

**The Charlotte Observer.**

FRIDAY, MARCH 4, 1881.

STATE LEGISLATURE.

Forty-ninth Day.

Condensed from the Raleigh News-Observer.

SENATE.

**RALEIGH, March 1.**—On motion of Mr. Williamson, of Davie, Senate bill 216, to amend the homestead law, chap. 55, Battle's Revision, passed its second reading—30 to 10.

The Senate bill proposed to the consideration of the bill to establish the new county of Vance.

The bill passed its second reading—yeas 25, nays 20—and was made the special order for Wednesday at 12 m.

Senate bill 217, to extend the time to redeem land sold for taxes. An amendment was adopted giving two years to redeem land instead of the time proposed in the original bill. The bill passed its second and third readings. An amendment was also adopted that this bill be published in four newspapers of the State, to be selected by the Secretary of State, in those localities most interested.

Senate bill 218, to incorporate the Clinton and Faison Harrow Company, passed its third reading—yeas 60, nays none.

House bill 828, Senate 663, to incorporate the Danville, Mocksville & Southwestern Railroad Company, passed its second and third readings—yeas 53, nays none.

House bill 831, Senate 678, to charter the Lenoir Railroad Company, passed its third reading—yeas 51, nays 21.

Senate bill 473, to amend chapter 90, Battle's Revision, section 15, entitled judges of probate. The substitute proposed by the committee provides that the clerks of the Superior Courts of North Carolina shall be required to be in their offices during the months of August, August and September, on the first Monday only of the month.

Mr. Williamson, of Davie, offered an amendment by adding that in those counties where the clerks of the inferior courts have probate powers, the requirement that the clerks shall be present on Mondays shall not be in force. The motion to table was lost. The substitute offered by the committee was adopted. The amendment of Mr. Williamson, of Davie, was also adopted.

Mr. Harper offered an amendment striking out July and September, leaving the month of August, which was adopted—18 to 10—and the bill passed its second and third readings—yeas 21, nays 8.

Mr. Davidson moved to enter a motion to reconsider the bill donating \$900 to the Colored Industrial Association. Prevalid.

Senate bill 474, allowing the Piedmont Railroad to aid connecting roads. After several amendments, the bill was passed, moved that this bill be made the special order for Thursday at 12 m. The motion prevailed.

Senate bill 475, for the relief of certain disabled Confederate soldiers. An amendment was proposed by the committee. Adopted.

Mr. Burwell spoke in opposition on the ground that no one knew how much might be expended in this direction. Mr. Scott in favor. Passed second and third readings.

Mr. Staples, resolution to print 1,000 copies of the testimony taken before the committee on internal improvements, with regard to the Western North Carolina Railroad.

The bills were suspended and the resolution was adopted.

**HOUSE OF REPRESENTATIVES.**

On motion of Mr. Manning, House bill to establish three additional judicial districts was put on its second reading.

Mr. Manning spoke in favor of the bill and explained the action of the committee in reporting it.

Mr. Webster said if there was need for more courts, which he did not doubt, he would vote for one or two additional districts, but he did not think that three were necessary, and he hoped that the bill would not pass.

House bill to regulate the sale of liquor was announced as the special order for 11 o'clock.

The bill was put on its third reading and passed—yeas 55, nays 47.

On motion of Mr. Manning, the special order was displaced for the purpose of considering the unfinished business, which was the bill increasing Superior Court districts.

The bill failed to pass its second reading—yeas 49, nays 52.

Mr. Bledsoe moved to table the bill establishing a criminal district. The motion failed—yeas 40, nays 42.

Mr. Day called the previous question, which was ordered.

The bill failed to pass its second reading—yeas 49, nays 52.

Senate bill for the better government of the North Carolina Insane Asylum. This bill had been made special order for 8 p. m., and was taken up after that order. Mr. Rose, the chairman of the committee, called the bill, which then passed its third reading.

Mr. Tate moved to take up the machinery bill. A considerable discussion arose, after which the motion prevailed.

House bill to provide for the levying and collection of taxes, known as the machinery act.

Mr. Tate, chairman of the finance committee, explained the bill briefly, after which it passed its second reading.

House resolution 113, in favor of the county of Cabarrus. Passed its third reading.

House bill to incorporate the North Carolina Fertilizer Company. Passed its third reading and ordered to be enrolled.

House resolution directing the printing of "The Woody Plants of North Carolina," by Dr. Curtis, passed its third reading and was sent to the Senate.

**Gathering of Politicians in Washington.**

WASHINGTON, March 1.—Hordes of political compromisers, from here, there and every where, have already swooped down on the capital city, and Gen. Garfield had hardly time to shake the dust of travel off his feet this morning before he was besieged. Among those here is a large delegation of Louisiana politicians, black and white, including Gov. Pinchback and J. Madison Wells. Mr. Pinchback said that singular as it might seem, he was not in Washington this time seeking for office, but simply as a looker-on. He said he had been invited to have the pleasure of calling on Mr. Hayes and in the name of the people, congratulate him on his retirement from office. He said that the dual organization of the Republican party in Louisiana will keep up the two State committees are in existence, and that there will be no union of the factions, unless the Garfield administration should be properly recognized by both the State committees. He said he thought it was a very good thing that Mr. Hayes had been inaugurated, and that he was glad to see the people, congratulating him on his retirement from office. He said that the dual organization of the Republican party in Louisiana will keep up the two State committees are in existence, and that there will be no union of the factions, unless the Garfield administration should be properly recognized by both the State committees.

**Do not fail to call on your druggist for a bottle of pure, sweet and delicious blood purifier, Smith's Serrula Syrup and Star Curine, and a sure cure for all chronic sores and is a sure cure for Piles.**

Call on your druggist before it is too late and get a bottle of Smith's Serrula Syrup and Star Curine, and a sure cure for all chronic sores and is a sure cure for Piles.

Smith's Serrula Syrup and Star Curine are purely vegetable. Why will you suffer with Cancer, White Swelling, Catarrh, Rheumatism, Kidney and Liver Diseases when a few bottles of these two great remedies will cure you?

From Newton county, Georgia: I take great pleasure in recommending to the public Smith's Serrula Syrup and Star Curine. My little son, a year and a half old, was afflicted with Spasmodic Croup during the night. Dr. Cheser, about two years ago, prescribed a medicine for me, which has most miraculously cured him. I find it equally beneficial in all cases of Croup, croup, a blessing in my family, every one should keep it in their houses. For sale by Dr. C. Smith.

**PICKING COTTON BY MACHINERY.**

A New Departure which may Prove Successful.

Atlanta Constitution.

We alluded some weeks ago to the letters of Mr. G. C. Cockrell, President of the Mississippi Valley Cotton Planter's Association, in which he claimed that machinery had been invented for picking and cleaning cotton by machinery. His letters were interesting, but possibly obscure as to details. He has recently written another letter in which he reiterates his belief that the time has come when iron fingers and mules may be substituted for human fingers in saving the cotton crop.

Mr. Cockrell's plan, as has already been set forth in these columns, is to pull up the stalks, and stack them until the bolls are open. They are then to be carried to the combination cotton-picker, which is composed of clippers, hull-separators and cleaners, and is run by horse-power, the machines being stationary. It will be remembered that we expressed some doubts as to whether the plan, ripening at different periods, could be practically carried out at any given time. In reply to this, Mr. Cockrell, who is a planter of large observation and experience, says that while the plant does not mature all the bolls at the same time, nevertheless the crop is ripe in August and September and ready for the 15th or 20th of September producing no cotton. Bolls, he says, are grown in thirty days from the bloom, and the boll that is twenty days old and ready to drop, will open if the stalk is pulled up and shocked where it can receive light and air. The oil for the seed comes from the air and not from the ground. Mr. Cockrell thinks there is moisture enough from the dews and rains to keep the stalks alive, and bolls fitted to drop in the open in Louisiana and Texas the crop may be pulled up in August and September; up to latitude 33 degrees in September, and perhaps up to 34 degrees, from 34 to 35 degrees in October. When the season is forcing the growth of the stalk and not maturing the fruit on the bottom lands, the crop may be saved by pulling up the crop and changing the tendency of the crop otherwise it may suffer serious loss from excess moisture. When the stalks are pulled up and shocked, the sap is cut off and the maturing process begins. Mr. Cockrell estimates that this may be worth 25 per centum of the crop, and otherwise it will be lost. He says that the crop will be pulled up in August and September, and the stalk is pulled up and shocked where it can receive light and air. The oil for the seed comes from the air and not from the ground. Mr. Cockrell thinks there is moisture enough from the dews and rains to keep the stalks alive, and bolls fitted to drop in the open in Louisiana and Texas the crop may be pulled up in August and September; up to latitude 33 degrees in September, and perhaps up to 34 degrees, from 34 to 35 degrees in October. He says that the crop will be pulled up in August and September, and the stalk is pulled up and shocked where it can receive light and air. The oil for the seed comes from the air and not from the ground. Mr. Cockrell thinks there is moisture enough from the dews and rains to keep the stalks alive, and bolls fitted to drop in the open in Louisiana and Texas the crop may be pulled up in August and September; up to latitude 33 degrees in September, and perhaps up to 34 degrees, from 34 to 35 degrees in October. When the season is forcing the growth of the stalk and not maturing the fruit on the bottom lands, the crop may be saved by pulling up the crop and changing the tendency of the crop otherwise it may suffer serious loss from excess moisture. When the stalks are pulled up and shocked, the sap is cut off and the maturing process begins. Mr. Cockrell estimates that this may be worth 25 per centum of the crop, and otherwise it will be lost. He says that the crop will be pulled up in August and September, and the stalk is pulled up and shocked where it can receive light and air.
