bottom of a sinking ship. This is their "primitive way," but what do you mean other by chlorination; another by smelting. Now, which of these processes embraces the "so-called principles?" Would you not like to appear very learned? Had you not better write a book, or get Mr. Eilers to compile one for you, explaining to mankind the "so-called principles?" You say that only "metallurgists of humble mold" ifollow them, and follow them "blindly". When the blind lead the "blindly." When the blind lead the blind, they generally fall into a ditch. Did you ever study Latin? If so, you can read this: Montes parturiunt,

nascitur ridiculus mus. You then quote another paragraph from THE OBSERVER, in which a statement is made that a limited portion of the capital stock of the company was offered for sale to the citizens of North Carolina. The facts are these: The scale, and to run them permanently as a legitimate business. Most of the stockholders were men of large capital cent, and it is sufficient, to establish and pay for the plant as originally contemplated. All the machinery, tools, chemicals, furaces, and implements of every name and sort, were immediately ordered and soon afterwards constructthis country, for the money they have made in their metallurgical operations in the West, have expressed their high admiration of our plant, our process, and our plans of operation. Some of our stockholders suggested that as a mere matter of policy and not because we needed the money, it might be well to offer the citizens of Charlotte, and its vicinity, a limited number of shares of the company's stock at a mere nominal price, simply for the purpose of awakening in them a personal interest and encountry for the purpose of awakening in them a personal interest and encountry for the purpose of awakening in them a personal interest and encountry for the purpose of awakening in them a personal interest and encountry for the purpose of awakening in the money they have been used all over the world. Will these fail here? We have centrifugal pulverizers which are now simply for the purpose of awakening in them a personal interest, and enlisting in our behalf their good will, fraternal feeling and local co-operation. By invitation, I addressed the chamber of commerce. At the close of my address, a resolution of thanks was that inasmuch as all our machinery and plant had been fully paid for with our own money, and we had no imme-diate use for any further sums, I deem-ed it more prudent to defer the is-susing of this stock to the citizens until our works should be nearer completion, and a grander ocular demonstration be made to them of the character of our works, and the expenditure of our money. My advice was accepted. All this took place before your scurrilous article appeared; all the citizens of Charlotte are living witnesses of the truth of this statement. Whether any of your allies here, knowing the readiness of the citizens to take stock in our malignant purpose of destroying the public confidence in our company. With guided by wisdom, and aided by However, several rich men, personal Jehovah, is a power which neither envy friends of mine, have taken a large nor malice can halt or defeat. I now partion of our stock and paid the cash leave you to the judgment of mankind. for it; so you see we are not the set of Swindlers you would have the public believe us to be. Without knowing one of us, or the facts concerning our com-pany and, moved with great distress, and paternal solicitude, for the ever-lasting welfare of the "poor men of North Carolina," you took the momen-tous responsibility upon your philan-thropic shoulders of transmitting to them a solemn warning not to invest them a solemn warning not to invest their money in an enterprise so certain to fail. No honorable man will ever acquit you of this dastardly conduct. Men who live in glass houses ought not Men who live in glass houses ought not to throw stones, especially at houses of granite. What is there in your history that gives you the super-eminent right to warn "poor men" against a bad investment? Have your opinions hitherto concerning mineral properties been immaculate? Remember, sir, that you have struck the first blow; you have attacked me, and my company, in the most cowardly and disgraceful manner. It is an unprovoked attack upon honorable men, engaged in an honora-

honorable men, engaged in an honorable business, and with their own unborrowed capital. Do you say that your article was only a just criticism upon the article in THE CHARLOTTE OBSERVER? Then I tell you that this article is only a just criticism upon your article; but no scholar, and no right thinking man who regards his own character and good name, when his locks, from the henorable toils of half a century, are blossoming for another world, will call your article anything else than a diabolically unjust tirade, unprovoked and malignant, against honest men, though unchronicled in your annals, or unsung by your ditties. And just so long as such vile personal abuse flows from your distempered soul, you may expect to be fiagellated through the press though your hide be tougher than the staly garment which Levis than wears, notwithstanding I have been unfortunately told that the skin of an ass always grows tougher by

you say that "the absurd puffing of my character and performances," in my character and performances," in The Charlotte Observer, "placer me in the light of a charlatan." Webster defines a charlatan to be "one who praces much in his own favor, and makes unwarrantable pretensions; a quack; an empiric; a mountebank." That is to say, if an editor of a public journal sees proper, after inspecting my works, and knowing my performances

and acquirements, to speak well of me, that solitary fact "places me in the light of a charlatan." This is your judgment although you do not know me "from Adam." You do not seem to like to have anyone else praised for metallurgical success, lest it might darken the splendor of your illustrious star. You say that the article in THE OBSERVER contains "suspicions" that I am no metallurgist; on the other hand,

my company more prodigiously if you had only for one moment heeded the admonition.

"Keep probability is view.

Let man super your tale untrue."

Again your superlative wisdom and self-conceit crop out. You say you prefer to "adhere, in your crude and primitive weather the product of the people of Charlotte to prevent them from taking stock in my company, and to my stockholders that they might displace me for inability. Now, I want to tell you, Rossiter W. Raymond, that they will be will be reconciled to the people of the people of Charlotte to prevent them from taking stock in my company, and to my stockholders that they might displace me for inability. Now, I want to tell you, Rossiter W. Raymond, that they might the victim of this great gun which you tive way to certain so-called principles which metallurgists of humble mold have blindly, as it were, followed for a few generations past." You prefer to go it blind. Barnacles "adhere" to the bottom of a sinking ship. This is their since the sinking ship. This is their since the sinking ship. This is their since the sinking ship. This is their president of the company, and shall represent the sinking ship. This is their sinking ship. This is their sinking ship. This is their sinking ship. main so as long as I please. My stockholders are a unit; some of them are millionaires, and have made their money in mining and understand metallurinspired in the colonial troops, and the by "certain so-called principles of metallurgists?" What do you know about "so-called principles?" What are they? The world has never known but four modes of finding gold. One is by panning; another by amalgamation; another by chlorination; another by chlorination; another by chlorination; another by another by chlorination; another by chlorina and what do you propose to do about it? The works are rapidly approaching completion, and are all paid for in hard money. Besides, I now give notice that if there is a share of the capital stock of the Adams Mining and Reduction Company in the United States to be said I will have it and now cash for to be sold, I will buy it and pay cash for it, at double the price it cost the owner.

You say that the article in THE OB- on the ground to be buried or cared for SERVER contains suspicions that my scheme has no prospect of success. If so, I am sorry for it. Should it un-

fortunately be the case, I should want to start immediately for the Rocky Mountains and expand on government pap. But let us see about this prediction of yours. We have a site of ten acres in the suburbs of Charlotte, on a creek and a railroad, with a side track. company was organized upon a cash basis sufficiently large to build the works upon a large manufacturing ing seventy-five thousand bricks, and costing about one thousand dollars. Will this fail? Will it fail to draw? We have a building 60 feet square, and two stories high, completely finished, stockholders were men of large capital and business experience. Not the slightest idea was entertained of a stock jobbing concern; three-fourths of the whole capital stock were subscribed for, and every subscriber paid his subscription in cash into the treasury. This sum of money was deemed sufficed by 36 feet and two stories high. Will this fail? This building contains all the reagents, assaying tools, furnaces, scales, and all necessary implements of the best construction and of the latest. the best construction, and of the latest improvements, for assaying all kinds of ores; with one furnace capable of smelting 100 pounds at one charge. moralizing the enemy. The Maryland Will all these fail? We have many ers were changing position with a view small buildings for various uses. Will apparently to reaching a wooded hill in ed, and paid for in cash. I have, up to these fail? We have a steam engine the rear. About this time Washingthis date, paid out between four and five thousand dollars in money for simply the freight of this large outfit to Will not the boilers make steam? Will not the boilers will not the cavalry, put them to flight and then good as steam expand? Will not the piston science and skill could make it. I doubt move? Will not the fly wheels rewhether any smelting works in Ameri- volve? Will not the shafts turn? ca can show a better outfit. Many dis- We have a Blake's crusher, with the fidence, turned face, poured a heavy tinguished men, well-known to fame in this country, for the money they have made in their metallurgical operations in the West, have expressed their high admiration of our plant, our process, and over plant, our process, and our plant, our plant, our plant, our plant

centrifugal pulverizers which are now in use in many places doing splendid work. Our mills are large enough to pulverize 100 tons per day from the rolls, and deliver it as fine as wheat flour. Will these fail? We have three passed, and my address was ordered to be published. Many of the wealthiest and most distinguished citizens arose and expressed their willingness to take stock; still, not a single share has been sold to, nor a single dollar received from, any person, up to this date, within the State of North Carolina. The reason is this: I advised my company not to be precipitate in this matter; that inasmuch as all our machinery with the proper pulverized fluxes. Will these fail? We have three concentrators capable of concentrating 100 tons of this flour per day into one-fourth of the original bulk, containing the metalliferous particles, and removing three-fourths of their bulk, to be molded into bricks, and burned in kilns for building purposes. Will all these fail? We have toggle presses of great power for compressing the concentrates, when mixed, with the proper pulverized fluxes into with the proper pulverized fluxes, into balls, to be charged into the smelter.
Will these fail? We have a smelter composed of iron, sandstone, and Mount Savage fire clay, moulded into matched forms to suit each part of the furnace; it is so constructed that it can smelt iron ores, copper ores, or gold bearing sulphurets, mixed with argentiferous galena or other base metals. Will this fail? We have many other valuable things not necessary to mention: near-

All this took place before your scurrilous article appeared; all the citizens of Charlotte are living witnesses of the truth of this statement. Whether any of your allies here, knowing the readiness of the citizens to take stock in our company, had anything to do with your article or not, I do not know, but it is a singular fact that your paper consults a singular fact that your paper consults are here, and have been paid for in cash. Now what business have you to write and circulate an article in question worthy of any notice as far have you to write and circulate an article all over the country, predicting with ex-cathedra authority, like the Pope of Rome, that all these things will be a stupendous failure, and that nobody ought to invest money in them? You also where in this paper a singular fact that your paper containing it was mailed to a very large number of the leading citizens and will very soon be proved to be a false business men of this city. Such an oc-currence justifies the suspicion that this whole disgraceful business was preconcerted and carried out for the preconcerted and carried out for the mined to succeed; we have the capital,

> leave you to the judgment of mankind. HENRY W. ADAMS, President of Adams M. & R. Co., Charlotte, N. C.

It accomplishes its object so quickly and so satisfactorily that its graises are in the mouth of every mother: we refer to Dr. Buil's Baby Syrup, the remedy for children's diseases. Sold for 25c.

This we know, Hub Punch with hot water makes a fine toddy, and nothing can match it when it is blended with lemonade, fine ice, soda water, or het or cold milk. It far exceeds all other forms of het or cold punch. Sold by dealers everywhere. Trade supplied at manufacturers prices by Wilson & Burwell, Wholesale and Retail Druggists, Trade street, Charlotte, N. C.

THE HUMAN HAIR. How to Preserve and Beautify It.

Many persons abuse this delicate and beautiful ornament by burning it with alcoholic washes and plastering it with grease, which has no affinity for the skin, and is not absorbed. BURNETT'S CO-COLINE, a compound of cocoanut oil, etc., is unrivalled as a cressing for the hair—is readily abcorbed, and is peculiarly adapted to its various at 16.85a16.90. Lard at 11.00. Bulk meats conditions, preventing its falling off and promoting its healthy growth. Housekeepers should insist upon obtaining BURNETT'S FLAVORING EXTRACTS, for they are the best.

A Drominent physician of Pittsburg said joking is to a lady patient, who was complaining of her continued ill health and of his inability to cure her, "Try Hop Bitters." The lady took it in earnest and used the bitters, from which she obtained parmant health. permanent health. She now laughs at the doctor for his joke, but he is not so well pleased with it, as it cost him a good patient.—Harrisburg Patriot.

A joint stock company has recently bought the old "Rockbridge Alum Springs," of Virginia, and more recently, within the past few weeks, the "Jordan Alum" also. The two are now consoli-"Jordan Alum" also. The two are now consolidated in one property and under one management—the whole to be known as the Rockbridge Alum Springs. The Board have selected Mr. Wm. Frazier as the General Superintendent of the combined establishments, who was formerly for many years in charge of the original Rockbridge Alum His long exprience, as well as his autitude will commend him to the confidence and respect of the guests.

A SAFE AND SURE means of restoring the youth ful color of the hair is furnished by Parker's Hair Balsam, which is deservedly popular from its superior cleanliness.

The Charlotte Observer. Proprietor [RETERED AT THE POST-OFFICE AT CHARLOTTE. C., AS SECOND-CLASS MATTER.]

WEDNESDAY, MAY 11, 1881.

THE COWPENS CENTENNIAL. To-day will be celebrated with appropriate ceremonies another of the battles on Southern soil, the the result of which hastened the final catastrophe to Cornwallis and closed the contest for liberty at Yorktown. It is one in the chain of events with which Kings Mountain, Cowpens, Guilford Court House and Yorktown are linked by their end which loom up so conspicuously in the closing scenes of that memorable struggle. Cowpens is fainspired in the colonial troops, and the shock the British sustained by the reverses they then met with. From Cowpens to Yorktown the march of the British was a march of dread the anxiety of which was increased by the skilful manœuvering of Gen Greene and the additional repulse at Guilford Court House, which field Cornwallis abandoned in haste, which was in fact on the ground to be buried or cared for by the enemy.

The battle of Cowpens occurred Jan. May 17, 1781, on some pasture grounds near Spartanburg, S. C., whence it takes the name of Cowpens. The number of American troops engaged was abou 900, under Gen. Morgan, and 1,100 choice British troops under Tarlton. Corn wallis sent Tarlton to attack Morgan and compel a fight or a retreat into North Carolina. As Tarlton advanced Morgan fell back, picking up such re inforcements as he could by the way At Cowpens he halted and faced his foe, forming two lines of battle, How ard's Marylanders in the centre, the Virginia Militia on the left and Geor gia Riflemen on the right. The British regulars advanced in unwavering line broke through the first line, rather 'de moralizing the enemy. The Maryland were ready to go to the aid of Howard who when he saw this picked up con lost twelve killed and sixty wounded, while the British losteighty killed and a

hundred and fifty wounded. It wasn't so much of a fight, but it was big with results.

Among the ceremonies to-day will be the unveiling of the statue of Gen. Morgan, and speeches by a eminent men in which will be graphically portrayed the grand achievements of our Revolutiontionary ancestry, a band of heroic men of whom any people might be proud.

AN ATTACK AND AN ANSWER. In THE OBSERVER of April 15th appeared an article descriptive of the works of the Adams Mining and Reduction Company, recently established near this city, which called forth an attack in the columns of the Engineering and Mining Journal, of New York, as unfounded as it was unjust. The editor of the Journal seems to have been in a sarcastic mood when he wrote, and felt it incumbent on him to pay his respects to THE OBSERVER, while engaged in the self-assumed task of demolishing a man and an institution neither of which he knew anything about. THE OBSER-

elsewhere in this paper. The deadening preparations of opium for the baby are rapidly disappearing before the use of Dr. Bull's Baby Syrup. Sold by all druggists,

The item herewith was furnished by Mr. John Muhlig, Poyner, Iowa: I have been a sufferer with mumatism for the last six years; I tried lots of medicines without any success. Visiting one day the stere of Messrs. Wangler Bros., in Waterloo, Iowa, these gentlemen induced me to try St. Jaeobs Oil, telling me that it had a record as a very effective remedy. I bought a bottle, used it regularly according to directions, and was relieved of the allment from which I had suffered for 6 years.

BEDFORD ALUM AND IRON SPRINGS WATER AND MASS.—The great tenic and alterative contains twice as much iron and fifty per cent. more aluminum than any "alum and iron mass" known. Just the thing for the "spring weakness" now so general. Sold by all druggists of any standing. Prices reduced one half. [may11—tf

"Malt Bitters" are a brain, nerve and blood food, peculiarly adapted to, and warmly recommended by, our druggists and physicians for general debility, mental and physical exhaustion, hysteria, nervousness, sleeplessness, emaciation and dropsy.

Coffees, Sugars, Molasses, and Everything in the Line of

Heavy Groceries HARVEY & BLAIR, - - RICHMOND, VA.

W. T. BLACKWELL & CO. Manufacturers of the Original and Cnly Genuine TOBACCO

Our claim for merit is based upon the fact that a chemical analysis proves that the tobacco grown in our section is better adapted to make a GOOD, PURE. satisfactory smoke than ANY !. OTHER tobacco grown in the world; and being situated in the HEART of this fine tobacco section, WE have the PICK of the offerings. The public appreciate this; hence our sales EXCEED the products of ALL the leading manufactories combined. None genuine unless it bears the trade-nach of the Bull.

"MAYFLOWER." THE

ODORLESS OIL COOK STOVE AND PARLOR HEATER! PERFECT MODEL OF COMFORT, CONVENIENCE AND ECONOMY Far Surpasses any Oil Stove Yet Offered to the Public.

CANNOT BE EXPLODED, AS IT DOES NOT HEAT THE OIL!
