MRS. P. QUERY SHORE

The Charlotte Phiserver.

Raleigh News-Observer: The Republican State executive committee will hold a meeting here during fain week.

The water in streams is again getting low. More rain is needed. A letter from Capt. James G. Kenan, of Duplin Rifles, Kenansville, informs, us that his splendid company will take

forty men to Yorktown. Died, in this city yesterday morning at 9:30 o'clock, Joseph Atkinson Scott, eldest son of Charles H. and Mary A. Scott, after an illness of one week. Greensboro North State: On Tuesday morning last, before day, a colored man, named Peter Reynolds, residing some four or five miles north of Greens boro, fell out of the door of his house and broke his jaw. The man was so

much injured by the fall that he died the same night. He was a sober and industriou man.

Ledwile Times: Mrs. Webb. of Jacol's Creek, Lockingham county, was burned to eath by attempting to fill a lighted kerosene lamp. Her children parrowly escaped narrowly escaped. Dnrham Recorder: The boring of the artesian well now proceeds slowly on account of the great hardness of the rock to be drilled, and the resistance of 1,200 feet of water in the well. The depth now is 1,530 feet.

A telegram announces the death of Joseph W. Hicks, in Tennessee last Saturday.

Salisbury Watchman: Col. C. S. inspection on moral shilts you mounted.

Salisbury Watchman: Col. Brown, of the Boyden House, received a hard fall, Sunday last, while slowly walking on the granite pavement; in front of his house. He heard a little noise behind him, and while in the act of turning to see what caused it two dogs, in a rude play with each other, dashed against and tripped him up. He fell on his side, and for a little while was powerless to rise, and suffered severe pain from it for hours. He feels that it was a narrow escape from very serious damage.

Mining Intelligence. Sallsbury Watchman.

a very satisfactory manner. They now have sixty-five hands employed. In the shaft No 1, they are down 160 feet, and have started the level for No. 2, 400 feet distant. They are sinking in No. 2, and as soon as they reach 160, will drift toward No. 1. They have a level from Nos. 1 to 2 at 170 feet, and they propose to open one at every 50 feet.

They are now taking from a 4 foot vein, 25 tons a day of rich sulphurets, averaging 50 per centum of iron pyrites. This ore assays very high. A large building, 60x75, has been planned, and the timbers are now being gotten out. This is to be used for concentrating. The concentrates to be worked at the Yadkin Chlorination Works. As con as it can be accomplished chlorination works will be erected at this mine.

They have a new boarding house, office and several miners because is adand fiber with fever and ague, or billous remittent, the system may yet be freed from the malignant virus with Hostetter's Bitters. Protect the system against it with this beneficent anti-spasmodic, which is furthermore a supreme remedy for liver complaint, constipation, dyspepsia, debility, rheumatism, kidney troubles and other allments.

For sale by all practices and Dealers generally.

office and several miner's houses in addition to last report. Two 6 inch Cornish pumps and two 25 horse hoists lift water and ore. HOOVER HILL GOLD MINING COMPANY OF LONDON.

This property is situated in Randolph county, and is 18 miles South of High Point, the nearest station on the Rich-mond and Danville road, and comprises It was incoporated in London, England, in February of this year, and has a cap-

ital stock of \$600,000, divided into 120,-000 shares. Paid up capital, and non-The vein stone is a caciferous quartz imbedded in a dark cloretic slate:

WE WILL SEND, ON 30 DAYS; TRIAL changing sometimes to a silico arena-Electro-Voltaic Appliances

The vein proper carrying about 2 per cent of sulphurets, possibly containing and sulphurets of silver.

We are informed that the company did not care to make known to the public the value of the ore per ton; nor the suffering from Nervous Weaknesses, General Debility, loss of nerve force or vigo, or any disease resulting from Abuses and Other Causes, or to any one afficied with Rheumstism, Neuralgia, Paralysis, Spinal Difficulties, Kidney or Liver Troubles, Lame Back, Ruptures, and other Diseases of the Vital Organs.

amount produced. This information may be obtained by any stockholder by addressing the office in London, They are working three shafts, the Gallimore, the Briols and a new shaft

near the Hawkins. They are down in the Gallimore 110 feet, now drifting out on the 70 foet level. Briols is down 120 feet, working on a drift. This is connected with

the Gallimore by tunnel. In the new shaft they are down 60 feet and sinking. This shaft is near the Hawkins and is designed to take the place of that shaft, it being unsafe. The old workings fell in years ago, and a new shaft was considered cheaper than to clear the old one. This has been known as a mine for 50 years, but ne estimate of the amount taken out could be gotten; as it was worked by private parties. The hill is literally "gophered," so to speak—small open shafts, cross cuts and the like, all done before the present company took hold.
Mr. Renfry, the superintendent, has a
well defined plan for developing the property. He proposes to run a tunnel from the eastern side to the western, first striking the new shaft at 600 feet, thence to the Gallimore in direct line, 500 feet-whole distance 1,100 feet. Of

this, 225 feet is done. As soon as the Rand drills can be set to work, they expect to make 120 feet per month. The solution of the mills have tested the result, the destiny of Hoover Hill will be known —it will either be a mine, or it will not its present condition it would be un-

They have an assay office and fixtures complete, over which Mr. C. P. Sawyer, of the Columbia School of Mines, presides. He enjoys another distinction—that of being the only man on the Hill who receives a stated salary—which speaks well of the economy of the work.

The compress building, 36x40, contains 50-horse boiler which will run the pumps and furnish air for five Hand drills.

The company has an office; also about a dezin comfortable capins for the mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance is mingled with their feelings of grief any thought of vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance is mingled with their feelings of grief any thought of vengeance is mingled with their feelings of grief any thought of vengeance "Vengeance is mingled with their feelings of grief any thought of vengeance is mingled with their feelings of grief any the grief and the grief an

thought of vengeance "Vengeance is mine, saith the Lord."

I trust the press will use its powerful influence to maintain the good order and decorum which have prevailed in the condent of all days in Wash-

a Letter to the Ex-Minister. odii to hristiancy has sent to her husband,

ery of a home, I grow sick and faint; see horrid bloated faces around me, and hear the fearful sounds of drunken brawls—you, my husband, often foremost in these frays among father and sons, one young, fair child's face stands alone; and I know that the love I gave George, and his gentle companionship, kept me from madness, amidst so much misery and corruption.

I wish to say to you that you can speed your that you can

inspection on moral stilts; you mounted them after infinite labor when you claimed that you would in every way ignore my brother's letter. But, alas! for the effort made to reach so unaccustomed a height. The stills were not fully adjusted before you had fallen to your usual level, and so sent constable. after constable here to arrest my brother. I feel convinced that he never meant to shoot so low as to kill you. He might have intended to cane you, but in my estimation you are too craven a creature for that much notice from a gentleman. Your weapon is the stiletto towards women, in the darkness of night. The brightness of God's sunlight is not suited to your Work at the Reimer is progressing in deeds. I am decidedly ashamed of my brother having noticed you. Do you suppose that he will stain his young white hands and his whiter soul with a crime for you? My wrongs have been greater than those of mortal woman. and my only feeling for you is unmitigated contempt. When one touches pitch he must be defiled, and rivers of blood would not, wash the stain from

LILLIE M. CHRISTIANCY.

General Sherman on Guiteau. WASHINGTON, Sept. 19, 3 p. m. Hon. Geo. C. Gorham,

me which was stamped into my very

soul when I gave my innocent girl-life

into your keeping. The greatest suffering I have to endure is the knowl-

edge of the degradation that you have

National Republican: My DEAR SIE—You and I have been comrades in civil broils and strife in California, when vigilance committees assumed rule, and we know, or think we know, how good, honest people have done some acts of violence under an nonest conviction that they were do-ing the right thing, and we believe that Time, the great physician, will cure all things to the patient.

I have occasionally and recently

heard the same arguments on the streets, the same scraps of wisdom enunciated, and now, at this dread hour, when our noble, brave President is lying in the very agonies of death at Long Branch, and the cowardly, miserable wretch Guiteau is cowering in his cell at the public jail, it occurs to me that you and I should in our respective spheres make profitable use of our past experience. No man on earth holds in higher es-

teem the noble qualities of James A. Garfield than myself. I was on the point of starting to Chattanooga to-night to do honor to the heroes of Chicksmauga, of whom he was one of the most prominent, but was stayed by the unfavorable report from his bedside at noon, and I shall remain here at my at noon, and I shall remain here at my post of duty till the last moment of hope. At Chickamauga, eighteen years ago, Garfield was chief of staff to General Rosecrans, whose right wing was broken back by the vehement charges of Bragg's forces, and was carried along with the broken masses almost to Chattanooga, when he begged for the privilege of returning to join General Geo. H. Thomas, whose guns told him that that heroic man still stood fast with his left wing. General Rosecrans gave him leave and he did return, running the gauntlet, joining General Thomas and serving close to his person till night enabled them to fall back in good order to Chattanooga. That was General Garfield's last fight, in which he felt especial pride, and I know that he intended to be at Chattanooga next Wednesday to be at Chattanooga next Wednesday to celebrate the event. But it is ordered otherwise, for he now lies by the

seashore on his death bed from a wound inflicted by the miserable wretch Gui-For this man Guiteau I ask no soldier, no citizen, to feel one particle of sympathy. On the contrary, could I make my will the law shooting or hanging would be too good for him. But I do ask every soldier and every citizen

In its present condition it would be unjust to judge it—this time next year will settle it—but give the mine a chance before it is condemned.

BULDINGSARD IMPROVEMENTS.

The first harg hat strikes the eye is the huge nill house, 47x95 feet—four stories, with engine house, 44x47 feet, attached. Twenty stamps are running and there is room for 20 more. They have a 5 foot fan and 8 foot settler.

Above the battery is a Blake crusher, Above the battery is a Blake crusher, 9x15; a 75-horse engine furnishes the power.

They have an assay office and fixtures complete, over which Mr. C. P. Sawyer.

mill house, on tram, passes over screens to crusher and thence to ore bins (capacity of 200 tons each) and thence to ore feeders. From the battery over free amalgamating tables; and concentrated with blankets.

trated with blankets.

Everything seems to be conducted in a sensible, business-like way, and the whole work looks as if conducted on the most economical plans.

There are about 2000 tons of ore on the dumps—old and new. The mill has been running from the old works, and we were informed, proved satisfactory—fully as well as was expected.
