Edgar Cady, Owatonna, Minn., says: About a year since my wife became subject to severe suffering from rheumatism. Our resort was to the PAIN KILLER, which speedily relieved her.
Charles Powell writes from the Sailors' Home, London: I had been afflicted three years with neuralgia and violent spasms of the stomach. The doctors at Westminster Hospital gave up my case in despair. I tried your PAIN KILLER, and it gave the immediate relief. I have regained my strength, and am now able to follow my usual occupation. In view of the efforts now being made by friends of the national banks and the present tariff to stop the payment of the public debt, now aggregating \$1,590,102,250, it is of interest to consider what part of it is now open to settlement and how much of it is of deferred payment by the terms of the bonds. Our large surplus revenue makes this a practical question of considerable importance. The government indebtedness consists of eight classes

Barton Seaman says: Have used PAIN KILLER for thirty years, and have found it a never failing remedy for rheumatism and lameness. In other words, \$589,754,450 of the debt are now redeemable, while \$988,710,850 are not now redeemable at the option of the government. In 1891 \$250,000,000 of the latter sum will become redeemable' but the remaining \$733,710,850 cannot be paid off until 1907, unless the government goes into the market as a purchaser of bonds bearing a high premium. As the treas-ury is now accumulating surplus cash at the rate of \$167,000,000 per annum, it will be possible to redeem the first, second, third and fourth classes of bonds, aggregating \$589,754,450, in about three years-if we take into account the reduction of interest consequent on the successive payments.
