Medical.

Rheumatism

Neuralgia, Sprains, Pain in the Back and Side.

There is nothing more painful than these diseases; but the pain can be removed and the disease cured by use of Perry Davis' Pain Killer.

This remedy is not a cheap Benzoin or Petroleum preparation that has been kept away from fire or heat to avoid danger of explosion, nor is it an untried experiment that may do more harm than good.

Pain Killer has been in constant use for forty years, and the universal testimony from all parts of the world is, it never fails. It not only effects a permanent cure, but it relieves pain almost instantaneously.

Edgar Cady, Owatonna, Minn., says: "About a year since my wife became subject to severe suffering from rheumatism. Our medical men prescribed various remedies, which she refused to take. I then procured Perry Davis' Pain Killer, and it gave her immediate relief. I have since used it in various cases, and it has cured them all. I can now follow my usual avocations, and am now able to follow my usual avocations."

G. H. Walworth, Saco, Me., writes: "I experienced immediate relief from pain in the back, neck, and limbs, which was caused by rheumatism, by the use of Perry Davis' Pain Killer. I have since used it in various cases, and it has cured them all. I can now follow my usual avocations, and am now able to follow my usual avocations."

E. York says: "I have used Perry Davis' Pain Killer for rheumatism, and it has cured me. I have since used it in various cases, and it has cured them all. I can now follow my usual avocations, and am now able to follow my usual avocations."

Dr. J. M. Gilchrist, Baltimore, Md., writes: "I have used Perry Davis' Pain Killer for rheumatism, and it has cured me. I have since used it in various cases, and it has cured them all. I can now follow my usual avocations, and am now able to follow my usual avocations."

All druggists keep PAIN KILLER. Its price is so low that it is within the reach of all, and it will save many times its cost in doctors' bills. 25c, 50c, and \$1.00 a bottle. PERRY DAVIS & SON, Proprietors, Providence, R. I.

TUTT'S PILLS

EDITORIAL SHORT STOPS.

The town of Potocasi was thrown into an unusual state of excitement last Thursday by the unexpected appearance of a gang of wild turkeys.

The impression prevails in Washington that Seville has been training Guitan in the insane role, and that his pupil is overdoing his part.

A Harris county (Ga.) negro absorbed a quart of whiskey at one whiff and next day his friends had a good time at the funeral.

Hon. Levi P. Morton, minister to France, is finding some occupation just now in discussing the American hog with Gambetta—not Christianity, the great American hog—but the hog that Western cities manufacture, into pork and sausages.

There has been a lightness in money matters in New York lately on account of Boston bank failures, and amounts sent South to meet cotton purchases.

Walton, the New York sportsman, has just returned from England with \$465,000 captured from British turkmen.

The New York Times says: "No story of lynching from the wild South-western States can exceed in brutality that of the hanging of a desperado by a Wisconsin mob." Did he expect a Wisconsin mob to be high-toned? The Times will discover after awhile, perhaps, North and South are pretty much the same, and neither remarkable for their aesthetic proclivities.

The Richmond Dispatch thinks that if "there is one Republican in public life who is entitled, above all the rest, to be respected as a gentleman, it is Wayne MacVeagh," and because he was instrumental in causing the star route thieves to be prosecuted the star route thieves are now on him.

ITEMS OF INTEREST.

Prof. Agassiz keeps pet snakes and such things in his sleeping room, to the consternation of his wife, who found one in her slipper the other morning.

The largest liquor bar in the world is the one at the Astor House, New York. It is a bad day's business when over its counter is not sold \$700 worth of "liquid hardware."

Mr. Willard has made considerable progress in his large painting of Garfield at Chickamauga. Yet, on account of the size of the picture, and the care with which it must be treated, it will be a long time before the work nears completion.

The Vicksburg (Miss.) Herald says that the amount of counterfeit currency, nickels, dimes, quarters, halves and dollars, in circulation in that community is so large, and that it is all manufactured there is no doubt.

The endowment fund of the Washington and Lee University, nearly reaches the sum of \$450,000, mostly coming from people at the North. Its first gift was received in 1796, being a donation of \$50,000 from Gen. Washington.

Notwithstanding the recent rains, there is still danger of a water famine in New York, and the authorities caution the citizens against waste. Since November of last year there has been an increase of 5,000,000 gallons in the daily consumption.

The scarcity of cheap wines at Paris has made beer drinking fashionable. There are 25,000 beer houses of all grades and sizes in the French capital, and the consumption during the summer was estimated at 3,000,000 glasses per annum.

The life of a college professor is anything but a lovely life. At the recent fall commencement at Calani University a rejected candidate drew out a revolver and fired two shots at Professor Coppola but missed. A similar occurrence took place in the university last year.

George Law, the retired capitalist, who had died in New York, was a hod-carrier in early life, could not spell, and in 1855 was nominated by the Know-Nothing Legislature of Pennsylvania for the Presidency of the United States. He was largely engaged in the shipping interests in his active life, and accumulated an immense fortune.

The Marquis de Lafayette's grave in the Picquet cemetery was decorated on All Soul's day by a number of Americans. To a quantity of flowers one woman added a little earth brought from the field of the battle of Yorktown, in which three little flags were planted, the American stars and stripes, the white fleur-de-lis of the old French monarchy and the tri-color.

DURN'S MOUNTAIN.—This property has changed hands. Mr. Stewart, who represents the new interest, is superintendent. Mr. L. B. Cady, E. M. C. E., withdrew last Saturday. Mr. Cady had worked the property into fine condition, and would have had the mill going in six weeks, when the change took place. The management will continue this gentleman's general plans. The work is to be pushed forward with all possible dispatch. The property is a valuable one, and if properly conducted, will justify the large amount expended in its development.

Mr. Jacob Simpson is opening that part of the Parker mine known as the Biles property. This property adjoins the Parker, and has heretofore been worked for placer gold, but under its present management a number of quartz veins have been found which carry free gold. The prospect is very fine. On this property several pounds nuggets have been picked up. There is no doubt but that that section of country—about 1,500 acres, taking in the Crowell, Parker and Biles property—is the richest in Blaine county, and will yet produce millions.

Baltimore capitalists have invested \$1,500,000 in a gold mine in Davidson county, N. C.

BY TELEGRAPH.

Making Arrangements for Through Connections with San Francisco.

St. Louis, Mo., Nov. 26.—H. M. Hoxie, general manager of the Iron Mountain, International and Great Northern and Texas and Pacific Railroads, accompanied by Seth Fink, gen'l freight agent, Frank Chandler, general passenger agent, and several other officials, left here yesterday for El Paso and Laredo, Texas, where they will make preliminary arrangements for, in one case, running trains from St. Louis to San Francisco via Southern Pacific from El Paso, and in another case, running trains to the Mexican border at Laredo. It is expected that through cars will be run from St. Louis to San Francisco and that the Texas Pacific will be completed and in operation by January 1st, also that the International and Great Northern will reach Laredo by the middle of December. The San Francisco route will be called "Triple Line," and will be formed of the Iron Mountain, Texas Pacific and Southern Pacific roads.

Meeting of Confederate Bondholders.—Their Purpose.—The committee of Confederate bondholders state that their programme is primarily by steady and persevering appeals. First to the public, then to the Legislature of the United States to bring about the opinion that the restriction imposed by the 14th amendment of the constitution should be removed so far as it prohibits the Southern States from affecting a just and equitable settlement of their debts, and the restriction imposed by the 14th amendment of the constitution should be removed so far as it prohibits the Southern States from affecting a just and equitable settlement of their debts, and the restriction imposed by the 14th amendment of the constitution should be removed so far as it prohibits the Southern States from affecting a just and equitable settlement of their debts.

Hanging in South Carolina.—MARION, S. C., Nov. 25.—A brother of Richard James, who was convicted of the crime of murder and was hanged in 1871, went to the gallows to-day with a firm step. He claimed to be innocent but couldn't say whether his brother was guilty or not. He was conducted to the place of execution, he obtained permission to address the crowd in front of the jail which he did in a wild harangue about his feelings of regret and general unhappiness. At 12:07 the drop fell, his neck was broken and he struggled very little for about five minutes.

Billiard Tournament.—NEW YORK, Nov. 26.—The billiard tournament yesterday resulted as follows: Sixty 200. Day 1st, Schaefer 200. The 44th game of the tournament between Carter and Dion was won by the latter who made his 200 in the 61st inning; Carter 154. This gives Dion the prize of \$1,000 and a diamond emblem, having won 7 games out of 9. The last game proved to be the best game of the tournament. Schaefer 200, Sexton 172. This was the sixth game won by Carter and gives him the second prize, \$700.

Fatal Railroad Accident in Scotland.—DUNDEE, Nov. 26.—The passenger train from Edinburgh whilst approaching Tay Port station violently collided with a goods train. The engine of the latter was driven bodily into the van. Four passengers were killed and eight injured.

Forced to seek Refuge.—LONDON, Nov. 26.—The bark Elonora, from Amsterdam for Galveston, put into Plymouth to-day with the loss of the cargo of 200,000 lbs. of sugar. The bark was from Liverpool for Charleston, put back to Milford to-day greatly damaged, having encountered several series of severe storms.

Conference News.—Prof. M.'s first year in the North Carolina Conference was spent as junior preacher on the Hillsboro circuit, embracing what is now the city of Durham. At the close of the year it was found that thirteen dollars had been paid to him, and thirteen babies had been named for him.

There is a preacher in the Conference that preaches as quietly as a jug of soap. When put in the jug the soap was soft, but by the time it reached the preacher it was solidified, and still the generous donor waited for the jug.

The complaint of Black & Reid against F. H. Wood, was called up Thursday, and Mr. Wood made his reply. Mr. Wood retired, and his character passed almost unanimously. The general impression of the bishops and Conference seemed to be very decided that there was really no difficulty in the case. Mr. Wood's statement was clear, direct and in admirable taste, and seemed to convince all that he had in fact retained his name and fame as a Christian minister.

The North Carolina Conference is very large and for sometime there has been much talk about dividing it into two conferences.

Wednesday Rev. J. R. Brooks moved for a committee on division. The Conference refused to order the committee by a large majority. We suppose that settles the question in the negative for the present.

Is It Necessary to Whip Children? New York Herald.

In another column will be found a number of expressions of opinion from parents about the rod as a means of punishment, and it is a significant sign of the improvement of the race that the general feeling is against flogging as a means of reformation. In spite of all attempts to palliate parental brutality the fact remains that it is better to rule by love than fear and that the person who cannot succeed through love is not fit to rule. There is no sentimentalism in this conclusion, for the accuracy of the principle has been proved again and again by experience with beings of far lower grade than children, ever are and of meager quality of affection. One phase of love explains the regard of the masses for a particular leader, a feeling of sympathy which attaches a soldier to his favorite general, and the same sentiment, though of far coarser quality, makes a outburst the faithful slave of a pirate chief. To say that the child which is the only animal except the dog that will kiss the hand which strikes it, cannot be controlled through the feeling that keeps turbulent men in order is worse than untrue—it is idiotic. The parent who confesses to inability to control a child without recourse to force merely admits lack of affection enough to enable patience to have its perfect work; for some one—when a person of no particular intelligence—thinks it sure not only to find the child's heart, but to find its health and of full size.

Don't ruin your health, and besides, your self is disagreeable to other people, so your counting a two-cent piece for David's count, a two-cent piece for David's count, a two-cent piece for David's count.

LIQUID OF DRY.

Some people prefer to purchase medicines in the dry state so that they can see for themselves that they are not rogues. Others have not the time or desire to prepare the medicine, and wish that they were prepared for them.

To accommodate each class the proprietors of Liquid of Dry now offer that well known remedy in both liquid and dry form.

Recall that for Rheumatism, debility, malaria, dyspepsia, liver complaint, and other troubles and disorders the Liquid of Dry's Cocoa Butter Tonic is incomparable. Beware of imitations.

Ladies E. P. Finkham's Vegetable Compound relieves the drooping spirits, invigorates and harmonizes the organic functions; gives elasticity and firmness to the step, restores the natural lustre to the eye, and plants on the pale cheek of leanness the fresh roses of life's spring and early summer time.

ITS ACTION IS SURE AND SAFE. The celebrated remedy, Liquid of Dry, can now be obtained in the usual dry vegetable form, or in liquid form. It is put in the latter way for the special convenience of those who cannot readily prepare it. It will be found very concentrated and will act with equal efficiency in either case. Be sure and read the new advertisement for particulars.—South and West.

Patent Medicines.

TARRANT'S SWEET SALTZEL WATER.

"Screw the finger as tight as you can, that's rheumatism; one turn more, that's gout." It is a familiar description of these two diseases. Though such may and does attack different parts of the system, the cause is believed to be a poisonous acid in the blood. Purify this by the use of TARRANT'S SWEET SALTZEL WATER.

It will do the work speedily and thoroughly. It is the great friend of the sufferer from rheumatism, gout, and neuralgia.

Sold by all druggists. Just—advised.

HOSTETTER'S BITTERS

ONE OF THE REASONABLE PLEASURES OF LIFE, a properly cooked meal, affords little or no pleasure, and the subsequent torture to a confined dyspeptic. But when chronic indigestion is combined with Stomach Bitters, the food is eaten with relish, and most important of all, is assimilated by and nourishes the system.
