ville Railroad, you do Capt. C. C. Mc-Phail too much honor. I am merely the agent through whom the Richmond & Danville Railroad Company has accomplished the results which you have seen and commented upon-the agent of a system of railroads which has linked its destiny and fate, in large measure, with bands of steel with the weal or woe of North Carolina. I observe you say "every North Carolinian who visits the Exposition should take off his hat in the presence of Capt. Mc-Phail and Prof. Smith, who have the department in charge, for the labor and pains they have taken in getting to-gether and arranging articles," &c. I have disposed of Capt. MePhail's claim

In collecting and arranging the exhibit of the Richmond & Danville company I have been its sole agent, alone responsible to its management for whatever of success or failure which may have attended it. Prof. Smith, to whom you make reference is only one of my paid employes, and has the department of the Richmond & Danville Railroad at the Atlanta Exposition, or any part of it, as much under his charge as one of your type-setters has THE CHAR-LOTTE OBSERVER under his charge. I doubt whether any one of the management of the Richmond & Danville Railroad Company is aware of the existence of Mr. Smith, except in so far as his name appears on my pay roll. He was employed and paid by me to collect material for the Richmond & Danville Railroad exhibit, in a few western counties, and is also one of my several paid employes for taking care of the

North Carolinians who have voluntarily and without remuneration rendered me, as agent of the Richmond & Danville Railroad Company, valuable assistance, and have, as far as I know, no personal interest in the material they have contributed. You give large credit to one of my employes whose services are fully paid for in money, and you make no mention of men like Prof. Hanna, of your own town, who contriwho brought a large assortment of representative gold ores, &c., and arranged them; Prof. William Beal, of Murphy, Cherokee county, who made splendid contributions of minerals and woods,

or for the time spent in this work. I make no mention of others who have made valuable contributions because it may be said they will derive their measure of benefit from the opportunity thus afforded for the advertisement of their materials. At the same time I feel under none the less obligations for the aid which they so kindly rendered to me. I also feel it is due to myself to correct the impression that Prof. Smith has any connection whatever with the exhibit of the Richmond & Danville Railroad and its sys-
