

President Arthur will spend the Christmas holidays in New York.

The Philadelphia Record says Mr. Brewster is like Caleb Cushing—a man of large abilities and small conscience.

The entire amount of bank deposits in Great Britain is \$120 a head to the total population.

A bill is before the Virginia legislature requiring the railroads in that State to fence their tracks.

A State Convention of Greenbackers is to be held in Atlanta, Ga., on Thursday, 20th inst., for organization, etc.

Mr. Blaine will devote himself to looking after and developing some railroad property in which he is largely interested.

Mrs. Lincoln was not aware of the fact that she had gone blind till she read the announcement in the newspapers.

There are only twenty-two names mentioned for the governorship of Alabama thus far. Candidates must be scarce down that way.

Another of the Delmonicos is gone, Sero Delmonico, the uncle of the famous New York caterer who died a short while ago, died suddenly last Monday.

Mr. Blaine can have lots of fun now sitting back in his easy chair and watching how the cat jumps, and occasionally, by way of change, pulling a wire or two for 1884.

A man named Mout, on trial in Philadelphia for altering a tally sheet at the February election, 1880, pleaded guilty and was sentenced last Wednesday to two years imprisonment and a fine of \$1,000.

The New York Tribune hits the nail square when it says: "A bill for the repeal of the Arrears of Pensions act has been presented to Congress. It ought to be passed by a solid vote of both parties."

Milton Chronicle: If Gov Jarvis and Senator Vance do not stop their fuss about that W. N. C. Railroad they'll knock things into a cocked hat. Let us adjourn the controversy for one year at least.

In the trial of Mout last Monday, in Philadelphia, for tampering with election returns, it was discovered that a juror was substituted, for one of the jurors who was drawn, for the purpose of defeating the conviction of the accused.

A Toledo, Ohio, man proposes to build a hotel in that city with the novel attachment of a chapel, instead of the customary bar-room. This is a bold innovation, and as an experiment among the Ducekeys will be watched with considerable interest.

Augusta Chronicle: When Mackey the Bonanza King, gives a dinner, he always invites the funny men. Vance and Tom Ochiltree must have kept his table in a roar, at a recent symposium. By the way, they will hardly have anything to do with Mackey's proposed railway from Texas to Brazil.

The Railroad Gazette records the construction of 370 miles of new railroad, making 7,253 miles this year, against 5,624 miles reported at the corresponding time in 1880, 3,445 miles in 1879, 2,207 miles in 1878, 1,277 miles in 1877, 2,177 miles in 1876, 1,337 miles in 1875, 1,777 miles in 1874, 3,507 miles in 1873, and 6,885 miles in 1872.

The last venture in the grave-yard insurance business is an effort to get an insurance on Guitau's life. A gang of sharpers have written an agent in Washington that they had made arrangements with certain mutual insurance companies to take \$100,000 and instructed him to get Guitau's signature to the application.

A Louisville merchant refused to buy his daughter a seal skin sash, and she thereupon left home and hired out as a servant. After a two week's search she was found but refused to return home until the seal skin was promised. It came and she went. No telling what a Louisville girl can do when she makes up her mind.

Judge Hunt, of the Supreme court, has been incapacitated for duty for three years, but has drawn his pay. He will not resign, for if he did so now he would not be entitled to the pension which the Supreme court judges receive who retire after ten years of service. He has still another year to run before his ten years are up, during which time he will have rendered but six years service.

The railroad rates on grain from St. Louis to Liverpool have now reached a lower figure than ever known before. The ocean rate from New York to Great Britain is three cents a bushel, and the entire cost of shipping a bushel of grain from St. Louis to Liverpool by rail and ocean steamer is only 11 cents, exactly the same as via the river route. Very little business, however, is being done by either route as compared with last year, in consequence of the partial failure of the grain crop.

It is said that certain conservative Senators and Congressmen are of the opinion that if Mr. Blaine had continued as Secretary of State his strong policy would have gotten us tangled up with foreign nations, and probably given us a big war to attend to. President Garfield turned the State Department entirely over to Blaine and gave him full swing, and President Arthur was disposed to do the same, as he was favorably impressed with Mr. Blaine's vigorous policy. Mr. Frelinghuysen is not inclined to be quite so vigorous and will go slow.

GOING FOR APPROPRIATIONS.

There will be some big jobs before the present Congress. The bills already introduced aggregate several hundred millions and the end is not yet.

It is said that \$300,000,000 will be asked for the improvement of the Mississippi. Then come the steamship subsidies, canal schemes, educational projects, public buildings and a host of others in fearful array, demanding no telling how much.

Most of these schemes will have powerful lobbyists to look after them, and look after the gentlemen in Congress whose votes are to decide their fate.

Honest members will have a great opportunity to show their honesty and dishonest ones as good a one to sell out. It is tests like these which try the metal out of which men are made.

From all the indications so far manifested this will be a memorable Congress for the number and size of the jobs which will come before it, and for the pertinacity with which these jobs will be pushed.

The protectionists demanding a high tariff, a subsidy by another name—will be on hand in force and will leave no device known to the lobbyist untried to secure the desired legislation.

And so will each scheme be looked after according to its importance and the amounts involved.

That there may be merit in some of these proposed projects we are not prepared to deny, for they have not yet been sufficiently discussed to place fully before the public the claims upon which they are based, nor are we disposed to take unqualified ground against internal improvements which have merit in them, provided these improvements are for the public good, and not merely for private gain.

For instance: The Mississippi river is a grand national highway, draining with its numerous tributaries a vast territory, and carrying upon its bosom the commerce of the richest and most prolific section of this continent, the granary of the Republic. This river at times on account of obstructions which it carries down with its tide, becomes to a certain extent unnavigable and again in flood seasons sweeps over the low embankments, covers vast tracts and destroys millions of dollars' worth of property annually.

The people who live along it hold that by a proper system of levees, dredging, &c., uninterrupted navigation could be assured, and devastation by floods be entirely prevented, and at a cost which compared with the benefits that would be realized therefrom, would be insignificant.

They have urged these views of the case for years, have accumulated a vast amount of facts and figures which have been presented from time to time to each succeeding Congress, and have worked with such zeal that they have aroused an interest in the subject throughout the whole Mississippi Valley.

They have grown so strong that they command an attention in Congress which a few years ago listened to their petitions with indifference. If it can be shown on thorough and satisfactory investigation that their representations are well founded, that by a reasonable outlay of money the ills they complain of may be remedied and the advantages they claim be secured it would be the part of wisdom to aid them, though the sums asked for may seem large. But it should be done in a business like way, and with such guarantees that the aid so given will be properly and judiciously applied, not squandered nor diverted to the enriching of rings, contractors and speculators.

It is not so much what the government appropriates that hurts as the amount of these appropriations that are appropriated by rings who get the handling of them.

It is against this that the representatives of the people in Washington must guard when called upon, and they think they are justified in voting the people's money. Giving judicious aid to meritorious objects is one thing, and giving away objects to enrich sharpers is another.

GAME MONOPOLIES.

We publish to-day a letter from a gentleman in Washington, calling attention to the purchase by Northern sportsmen of vast tracts of game grounds in the eastern portion of this State, a business into which they seem to have gone with a vim.

We saw reference some time ago to this 240,000 acre purchase alluded to, but doubted it and still doubt it. It is a fact, however, that Northern sportsmen are looking to the coast region of Virginia and this State as the future sporting ground, and that some purchases have been made.

However much we like to see these gentlemen enjoy themselves, and are disposed to welcome them with gun and dog, we do not wish to see them gobble up all creation and proclaim a "corner" on the birds of the air and the wild critters of the woods. As suggested by our correspondent the Legislature should look after this matter and while doing nothing to prevent the fullest indulgence these gentlemen in the way of sporting, see to it that this wholesale gobbling up of our hunting grounds be guarded against.

A NICE LITTLE GAME.

That was a nice little speculation on the part of the ring of American adventurers who put in a claim of \$10,000,000 against the government of Peru, and worked Minister Hurlbut into it to secure the protection of this government for Peru against the vicious claims of the Chilianas.

Exactly what this was, or how it originated, we are not sufficiently informed, but think it grew out of some game transactions. The aim of the ring was to get this government to espouse their claim, and thus practically give them a mortgage on Peru for that amount—more than that unfortunate republic could ever pay in this world or the next.

They had made considerable progress with Mr. Hurlbut, and if Mr. Blaine had not taken a different view from his minister, the probabilities are that we would soon have gotten into a tangle with Chili for the benefit of that ring of adventurers.

Very many well-meaning people will purchase for you enough and odd lots of the best in taking their medicine; and Dr. Bull's cough syrup and be relieved at once. Price 25c.

A REPORTER'S TERRIBLE WORK.

Gen. J. Johnston Repudiates the Statements Attributed to Him. Special to New York World.

WASHINGTON, December 19.—Gen. Johnston is much annoyed at a publication in a Philadelphia paper in which he is represented as having charged Jefferson Davis with the negotiation to use a mild word, of a large amount of Confederate gold. This is the essence of an interview running through several columns of the Philadelphia paper alluded to.

The General is now in Washington. A representative of the World met him to-day, and had a conversation upon the general subject. The General said he had made no statement to the representative of a Philadelphia or any other paper, intended for publication. He purposes to write to the editor of the paper which made the publication, disavowing any such intention, and denying the accuracy of many or most of the statements attributed to him in the alleged interview.

The General says he was being urged to talk freely about two weeks ago to a gentleman at a hotel in Richmond, Va., whom he did not at the moment suspect was a newspaper man, and that what he did say was so distorted and expanded as to be entirely untrue. He said that he had never seen the article in the mouth of Beauregard and others and that he didn't know, and which could only be gathered from records reported by some one famous for his alleged interview with the General. The General said that he was to blame as well as the interviewer, for he was old enough to know better. It appears, therefore, that while much of the alleged interview is untrue, some of the facts were false and other portions inaccurately reported.

THE GULTEAU TRIAL.

Chas. H. Reid becomes Associate Counsel for the Defence.

WASHINGTON, Dec. 23.—In the Gulteau trial to-day, Chas. H. Reid assumed the duties of associate counsel for the defence. Wm. A. Edwards, of Brooklyn, who was clerk in Shaw's office, testified to overhearing a conversation between him and the prisoner, Reid, when the latter, as alleged by Shaw, said he would some day kill "some big man as Booth had done." The witness was cross-examined by Col. Reid.

WASHINGTON, Dec. 23.—The Gulteau trial was adjourned until Tuesday next.

Mr. Pigott on the Irish Land Question.

LONDON, Dec. 23.—Mr. Pigott, the former proprietor of the Dublin Irishman, who recently issued an address respecting the Land League, publishes a letter further explaining his views in which he says he believes that Penitence is the only remedy for the ills which afflict the Irish people in America and in Ireland, and nearly so in Great Britain; that the "no rent" manifesto has had such a run upon the resources of the Land League that they must have been exhausted, and that probably a general adoption of the "no rent" policy will lead to such exasperation that there will be organized attacks on the military and the police, which attacks can be effectually stamped out and the League with them.

Weather.

WASHINGTON, Dec. 23.—Middle Atlantic States clearing weather, northwesterly winds, falling followed by rising temperature, higher pressure.

South Atlantic States, fair weather, westerly veering to northerly winds, stationary or lower temperature and higher pressure.

Gulf States fair weather, winds mostly northwesterly, stationary or higher temperature, higher pressure.

Tennessee and the Ohio Valley, clearing weather, northwesterly winds, becoming variable, stationary or higher temperature and pressure.

The Central Pacific Organized.

CHEYENNE, WYOMING, Dec. 23.—The Central Pacific Railroad of Wyoming was organized under the laws of Wyoming to-day. The promoters are officers of the Central Pacific Railroad of California. The capital stock is 13,500,000. The object is to build a railroad from a point on the boundary between Utah and Wyoming to the Wyoming north of the Union Pacific Railroad, distance 450 miles.

The Western Texas Did It.

NEW YORK, Dec. 23.—The vessel which ran into the war ship Tennessee was the Western Texas, fair weather, foggy but the officers of the Tennessee claim not so much so as to warrant the accident. The Tennessee was anchored out of the channel and had her fog bell going. The Western Texas was running on a collision course with the Tennessee, and she was struck by the latter vessel, and she was wrecked five feet below the water line. Her pumps were kept going all night and to-day she was docked at the Navy yard from whence she had just emerged.

A Fight with Insurgents.

PORT-AU-PRINCE, Dec. 18.—An alarming revolution is reported to have broken out at Jeremie-aux-Cays and Saint Marc. President Salomon, with a strong force, landed at Saint Marc and quelled the rising there, after 150 men had been killed and 400 wounded. The government house was sacked and other houses were burned. President Salomon returned to Port-au-Prince to obtain reinforcements.

A Combat with Smugglers.

ST. LOUIS, Dec. 23.—A Dallas, Texas, dispatch says a combat between twenty smugglers and custom guards, assisted by cavalry, has occurred across the boundary in Mexico. Lieut. Mezra, commanding the cavalry, a corporal, and one private, were killed. The fullest indulgence these gentlemen in the way of sporting, see to it that this wholesale gobbling up of our hunting grounds be guarded against.

Captured after a Seven Year's Hunt.

ST. LOUIS, Dec. 23.—Texas specials state that Stewart, the notorious train robber, incendiary and bank robber has been arrested at Houston. It is said he robbed the Chicago and Alton train of \$10,000. Detectives have been looking for Stewart seven years. He will be taken to Kansas City where 10 indictments stand against him.

A General's Last Delivery.

MEMPHIS, Dec. 23.—All the prisoners confined in jail at Hernando, Miss., escaped last night. Among the number was Ed. Velm, under sentence of death for assassination of Rufus Armistead in July, 1880.

Excitement in Samana.

SAN DOMINGO, Dec. 14.—The news that a United States war steamer will be sent to Samana has caused excitement to such a degree that the authorities have prepared two war schooners, the Thunder and Capital, to watch the American man-of-war.

That slight tickling in the throat and disposition to sneeze may be the precursor of years of suffering unless you take Dr. Bull's cough syrup which is now on hand. Price 25c.

Dr. Bull's Cough Syrup.

All over the land goes up from mothers, that says "My children are so feeble and my wife is so nervous, what can we do for them?" The answer is Dr. Bull's Cough Syrup. It is the best cough syrup in the world, and it is the only one that will cure you of your cough, and it will cure you of your asthma, and it will cure you of your bronchitis, and it will cure you of
