Pain in the Back and Side.

There is nothing more painful than these diseases; but the pain can be removed and the disease cured by use of Perry Davis'

This remedy is not a cheap Benzine or Petroleum product that must be kept away from fire or heat to avoid danger of explosion, nor is it an untried experiment that may do more harm than good. Pain Killer has been in constant use

for forty years, and the universal testimony from all parts of the world is, it never fails. It not only effects a permanent cure, but it relieves pain almost instantaneously. Being a purely vegetable remedy, it is safe in the hands of the most inexperienced. The record of cures by the use of PAIN KILLER would fill volumes. The following extracts from letters received show what those who have tried it think:

Edgar Cady, Owatonna, Minn., says:

About a year since my wife became subject to severe suffering from rheumatism. Our resort was to the PAIN KILLER, which speedily relieved her.

Charles Powell writes from the Sailors' Home, London:

I had been afflicted three years with neuralgis and violent spasms of the stemach. The doctors at Westminster Hospital gave up my case in despair. I tried your PAIN KILLER, and it gave me immediate relief. I have regained my strength, and am now able to follow my usual occupation.

Cocupation.

G. H. Walworth, Saco, Me., writes:

I experienced immediate relief from pain in
the side by the use of your Park KILLER.

E. York says:

E. York says:

I have used your PAIN KILLER for rheumatism, and have received great benefit.

Barton Seaman says:

Have used PAIN KILLER for thirty years, and have found it a never-failing remedy for rheumatism and lameness.

Mr. Burditt writes:

It never fails to give relief in cases of rheumatism.

Phil. Gilbert, Somerset, Pa., writes:

From actual use, I know your PAIN KILLER is the best medicine I can get.

All druggists keep Pain Killer. Its price is so low that it is within the reach of all,

STARTLING DISCOVERY LOST MANHOOD RESTORED. A victim of youthful imprudence causing Premainre Decay, Nervous Debility, Lost Manhood, etc., having tried in vain every known remedy, has discovered a simple self cure, which he will send FREE to his fellow-sufferers, address J. H. REEVES, 43 Chatham St., R. Y. WHAT IS THE GAIN?

What is the gain?

If one should run a noble race,
And at the last, with weary pace.
Win to the goal, and find his years,
A harvest-field of waste and tears,
Of turmoil, and of buried trust,
Rich with dead hopes and bitter dust,
And strife and sneer, and ceaseless pain,
What is the gain?

What is the gain?
When, having reached a suniit height,
Through barren sweeps of gloomful night,
Hoping to see beyond the crest
Fair land of beauty and of rest,
There lies before, stretched far away,
Unto the confines of the day, A desolate and shadeless plain.
What is the gain?

What is the gain?
To sail for months of cold and toil
Across wide seas, where winds recoil
Only to gather strength, and roar
A louder challenge than before,
And find, when through fogs thick and dun,
The rocky coast at last is won, No haven from the storm-vexed main.
What is the gain?

What is the gain?
The race is won, we see the light,
We conquer where the storm winds fight;
We show the way to those who wait
With raint hearts by the walls of fate;
Our banners flutter in the van
Of battles fought for thought and man;
And ignorance and darkness wane; This is the gain.

Dr Francis Guiteau, grandfather of the assassin, was the medical expert for the defense on the trial of Alpheus Hitchcock for murder, which trial was held in a barn in the town of Sullivan, N. Past and Future of the Pension Arrearages' Act.

Mr. John A. Bentley, ex-commission-er of pensions, states that of the 2,150,-000 men engaged on the Federal side during the late war there are still alive, during the late war there are still alive, according to the best data obtainable, at least 1,100,000. He made an estimate after the passage of the bill in 1879 to find how much in the way of arrears would be due under the provisions of the bill to persons who had already been awarded pensions before the passage of the measure. The sum required was found to be \$28,347,930. It did not include 120,000 claims filed and not yet. include 120,000 claims filed and not yet adjusted, nor those likely to be filed afterwards, about 180,000 in number. An peared that the act would consume, sooner or later, \$510,301,673 at the least. He states that the act originated with claim agents, and was presented by a Republican member in lieu of one about to be presented by the chairman of the committee on invalid pensions, and was passed without a dissenting vote. It lay in the Senate until the middle of January 1879, when, in view of the approaching senatorial elections, Senators felt compelled to yote for it. The pension roll, which has increased by some 15,000 names during the last fiscal year, will, in Mr. Bentley's opinion, continue to grow until it counts fully 400, 000 pensioners, drawing an annual in most all forms of insanity, sometimes of the stand in the first to show impairment in most all forms of insanity, sometimes deci7 tf Super deci7 tf Super deci7 tf come of over \$40,000,000 in addition to however, and in some cases memory \$100,000,000 asked for this year by the tive. pension office about \$60,000,000 will go for arrearages and \$20,000,000 for a deficiency of the present year.

Specimen Haytien Insects. Wilmington Stur. It is the schooner Nellie Husted, from Hayti for New York, with a cargo of logwood, which is so infested with "varmints," to which we alluded in yesterday's Star. In addition to the enormous spiders spoken of then, and which are said to be very poisonous, there are also found quite a number of scorpions and centipedes, specimens of which we examined yesterday. We learn that it is usual for them to infest logwood in that manner. The Nellie Husted put in here in distress and is discharging her cargo at Messrs. Worthrop & Cummings' mill.

Cape Fear and Yadkin Valley Rail.

The sale of the State's interest in the Cape Fear and Yadkin Valley Railroad has been completed. The contract will be published as soon as a copy can be obtained. While we suppose that some of the commissioners were entirely satisfied with the financial showing made by the contractors, yet without doubt they have done the best thing under the circumstances. The road cannot be spirited away. It cannot be wrecked. The purchasers buy only the State's stock and get no rights of any kind until they pay \$155,000; after that is done they cannot mortgage the road recklessly and sell it out. As we understand it, the amount of bonds to be issued per mile is limited; the bonds cannot be sold for less than par; they are to be handled by the Treasurer of the State who is to see that the pro-ceeds are applied to the building of the

If the contract is carried out by the purchasers, the road will be built; if they do not carry it out, then no harm

The question may be asked why, if there is any doubt about the financial ability of the purchasers to perform their undertaking, should the road be

sold at all—why not keep it? The answer is ready.

Those who know the history of the road know that unless it is sold it cannot be built. It has come to a halt. It is without means and without credit. It cannot get the iron necessary to lay the track. The work has practically come to an end. It needs the helping hand of capitalists. These people say that they can and will build it. It will be a great benefit to the State to have the line completed, and so a majority of the commissioners, looking at the matter in a plain, practical, sensible way, say-let them try; no harm can come, some parts of England the season is un- much good may result. And so the contract has been made.

If the purchasers shall pay the \$155,-000 as agreed on, we shall expect them to succeed in building the road. They are not going to put in that amount of money without knowing where the Paris is about to spend \$20,000,000 on balance is to come from necessary to town, and a further sum of \$40,000,000 | therefore, feel hopeful that they will habitants do not know how to get rid of their refuse water. but give expression to the general sentiment. The Pittsburg de ders have Fish Commissioner S. G. Worth informs us that he is awaiting the arrival of further shipments of German carp from Washington, which are designed for private ponds. At present all the carp are brought here from Washington, though an attempt will be made to breed many thousands at Rajeigh next summer. They will be shipped by express. They may be shipped several days in water, deeper than their backs, its extent no running water, but the railroad engineers found water at the depth of forty feet in the first well they sunk, and reached the same result with every succeeding well.
