A Crash Impossible.

We regard the recurrence of an old-fashioned commercial crash as highly improbable, if not impossible. There will undoubtedly be a fall in stocks which have been carried by speculation above their value as dividend paying investments, and in merchandise which has been in like manner artificially enhanced in price. An over-production of railroads and of new buildings may lead to a revolution in those departments of business and in the branches connected with them, while financial troubles in Europe may cause a rise of interest on money here which will hamper enterprise of all kinds. But, we repeat the country is rich and grow-ing richer every day, and can now resist successfully shocks which thirty, twenty, or even ten years ago would have prostrated it.

The Beginning Only.

New York Sun. The purchase of great blocks of land in the Southern States by European Capitalists has been a marked feature of the past two weeks, Sir E. J. Reed, representing English investors, and Dr. Jacobus Westheim, of Amsterdam, representing Dutch, have just bought two millions acres in Florida, while Phillips, Marshall & Co., of London, have bought 1800,000 acres in Missis. have bought 1,300,000 acres in Mississippi. Nearly half of the latter are levee lands, situated in the Yazoo delta, and are fine cotton and timber lands. The object in both these purchases has been to colonize and culti-vate the lands, and the effect can hard-ly fail to be felt in the future of these states when the cultivators of the soil have to pay their rents to English cap-

Another liallroad;

We understand that the survey has already commenced, and that the work of grading will commence at this place beginning on the street that runs by beginning on the street that runs by the factory of Capt. W. Snow, crossing the N. C. railroad at the deep cut, just below Ragan, Millis & Co's, wholesale store. The depot, as we understand, will be located near the residence of R. F. Sechrest. It is estimated that the grading and track will be completed and running to the factories in Randolph county in six months.

Warrenton After a Ratiroad Again, Gold Leaf.

From Mr. A. R. Wortham, who had just returned from a professional visit to Warrenton, we learn that our friends down there are again discussing Railroad matters. Fencing in Pastures.

We learn that most of the farmers of West Wateree are now fencing in their pasture land, preparing for the operation of the stock law, which goes into effect in this county on the 1st of April next. To repeal the act next year will tion of the stock law, which goes into effect in this county on the 1st of April next. To repeal the act next year will entail ten times more trouble upon the farming portion of the State than it does now to put the act in force. All they have to do now is to take down the fences around the fields and put up a first-class one around their pasture, and the fields are stated to a state of the present state constitution adopted December 2d, A. D. 1879.

Its GRAND SINGLE NUMBER Drawings will take place monthly.

It never scales or postpones. Look at the following distribution: a first-class one around their pasture, and if the act were repealed it would require an entirely new fence to be built around their fields, an expense that but few of them would be able to

Vineyards on a Large Scale. Mr. G. C. Frash, a New York wine merchant, has bought 20,000 acres of the Disston purchase, in Florida, and has already located a portion of his purchase in Polk, Hillsborough and Mana-tee counties. Mr. Frash, who is a heavy dealer in California and other wines, intends to plant vineyards on a large scale, and for that purpose will take a large number of immigrants to Florida, who will settle upon his lands and care for his vineyards. Thus the possibilities of Florida as a wine-producing State will have a fair test.

The Scelland Neck Railroad.

He tells us that ele: en miles of the track, leading out from Halifax, is ironed and is being operated now, and that the remaining distance, ten miles, if we remember correctly, is already cross-tied and ready for the iron.
