A SMALL POX REMEDY.

A Cure for the Disease that is Reliably Claimed to be Infallible. New Orleans Times-Democrat.

The Times-Democrat published yesterday a remedy for small pox which is said to have the recommendation of a number of the leading medical insti-tutes of Europe. The follow-ing letter, which we publish, from a well-known citizen of New-Orleans, who had many opportunities of seeing the disease, strongly indorses and approves the remedy.

To the Editor of the Times-Democrat:

In your paper of this date (20th) I see you have published a remedy for small pox—a reprint from the Boston Herald—and you say "it might be well for some of our physicians to try it and make a public statement of the result"

This remedy—which is also said to be good in scarlet fever and any eruptive fever—has been published in our papers on repeated occasions, I cut it from a paper in this city seven or eight years ago. I had noticed it once or twice before, and I determined to have it tried by some of our physicians to prove the truth of what was claimed for it, for if it was true, it was certainly valuable. I had at the time a relative who was a resident student at the Charity Hospital. To him I handed it with the request that he would call the attention of the faculty to it and have it tried when occasion offered. He told me some time afterwards that he had done so and that several of the physicians were favorable impressed with it, among them the late Prof. Hawthorne, and Dr. Jos. Holt, of this city. Some three years ago, having heard that Dr. Holt had tried the remedy, I asked him on meeting him what he thought of it. The case feel that it is best in view of all the circumstances not to present any bills to Congress. We are content He replied that it was an excellent one; that he had just used it with a very bad case of confluent small pox and that it worked like a charm. From what Dr. Holt said to me, I determined, if occasion came, I would test it. As I before stated, the remedy is said to be equally good for scarlet fever; and last spring two of my own children were taken with that disease. I saw my physician and told him I desired to have that remedy used. He consented (and it was used and worked admirably. The eldest child was in a highly ner yous condition—it soothed and quieted almost immediately. We used nothing else, and both children speedly recovered. This has been my experience with

Respectfully, F. R. S. In view of this letter, we think it well

to reproduce the remedy alluded to. It is as follows: At the time of the small pox scare, in 1872 when Boston was so sorely afflicted, a receipe for a remedy was twice pub-lished in the Hartford Times, and some panied by a letter from the editor, who stated that there were people in Hartford who could vouch for its efficiency. It was said that a person who tried it in Ohio is a case of configurate and the change is wonderful. They are required to perform certain work, from which they earn their own support, and they are kept within an enclosure, but there are Ohio in a case of confluent small-pox, where the doctor had little hope, found that it saved the patient's life. Other cases were then tried and every one was successful. The remedy was said to be equally sure in scarlet fever, and to prevent or cure the small pox, even though the pittings were filling. The recipe was as follows:

"Sulphate of zinc, one grain; foxglove (digitalis), one grain; half a teaspoonful of sugar; when thoroughly mixed add four ounces of water. Take a spoonful every hour. Either disease will disappear in 12 hours. For a child, smaller strength, and am now able to follow my usual occupation.

G. H. Walworth, Saco, Me., writes:

I experienced immediate relief from pain in the side by the use of your Pain Killer.

E. York says:

I have used your Pain Killer for rheumatism, and have received great benefit.

Barton Seaman says:

Have used Pain Killer for thirty years, and have found it a never-failing remedy for rheumatism and lameness.

Mr. Burditt writes:

Itnever fails to give relief in cases of rheumatism.

Phil. Gilbert, Somerset, Pa., writes:

From sctual use, I know your Pain Killer is the best medicine I can get. doses, according to age.

Of this recipe a physician said: "When Jenner discovered cow pox in England, the world of science hurled an avalanche of fame upon his head; when the most scientific school of medicine in the world—that of Paris—published this panacea for small pox it passed un-heeded. It is as unfailing as fate, and conquers in every instance. It is harmless when taken by well persons. It is remarkable that this remedy should not be more widely known if it is what

is claimed.

HERE IS ANOTHER. The following remedy for small pox has the merit of cheapnees and simplicity. It is also harmless: "I am willing to risk my reputation as a public man," wrote Edward Hines to the Liverpool Mercury, "if the worst case of small pox can't be cured in three days simply by the use of cream of tartar. One ounce of cream of tartar dissolved in one pint of hot water drank at interin one pint of hot water drank at intervals when cold is a certain, never-failing remedy. It has cured thousands, never leaving a mark, never causing blindness and avoids tedious lingering."

POISON FOR THE PEOPLE.

What is Done with the Two Million Pounds of Arsenic Annually Im-

Food and Health. Committees of experts tell of adulteration in food that is simply appalling.
Were the ingredients which are mixed with food innocuous it would still be a very great hardship; but when it is known that the most violent poisons are employed it is a marvel that the whole country does not rise up and put a stop to such practices and punish all dealers who sell poisonous articles of food. If confirmation of these startling statements were needed one has only to read the facts recently brought to light in Chicago, where it is impossible to find pure sugar and where not ten per cent. of the milk is good. In that city the bread, without exception, is poisonous; the teas were never imported, but are made of leaves "faced" with Prussian blue and chromate of lead. Seventy-five per cent. of the cream of tartar is white earth, and the coffee is coated with lamp-black. But Chicago is no worse than other cities. Baking powders are largely composed of alum. Pickling fluid is diluted with sulphuric acid, alum and verdigris to give it a pe-

The manufacture of a great deal of our confectionery should be punished as a crime, for much of the candy sold to children is simply a lump of white earth, made attractive to the eye with arsenical paint and sweetened with glucose. Costly spices are counterfeited in a terribly grotesque manner, the flavoring being given by the rankest poisons. In these and other adulterations argenic plays the largest part. We import annually two million pounds of this deadly poison—one cent's worth of which would kill 2,800 people—and the bulk of this import is used in the pre-

paration of food and clothing. Porter Resumes His Argument. WASHINGTON, Jan. 24.—In the Gui teau trial to-day Judge Porter resumed his argument and charged that while the defense had been a sham and imposture that prisoner was a liar, swindler and murderer, and had grown worse from year to year. The usual disputes between counsel took place and the prisoner interjected a number of remarks during the delivery of the argument.

ITEMS OF INTEREST.

The population of Chicago, according to the latest statistics, is about 630,000, an increase of 125,000 since the census of 1880 was taken.

A San Francisco paper illustrates the cheek capacity of the California squirrel by saying that one of them, killed the other day while carrying away wheat from a warehouse on the San Joaquin river, was found to have 1,803 grains of wheat stowed away in its

The census returns just given in Bombay are quite interesting. Asked to state their profession or calling, the simple Hindoos have filled up the paper with an accuracy that might in vain be sought for in any other country. In Bombay there are, upon their own con-fession, twenty-six gamblers and swindlers, one dog poisoner, sixteen wizards, and 698 tatooers.

An old buck which has for years been the leader of the deer herd on the Bos-ton Common had been very domineering to the younger members of his sex. They seized the opportunity when the champion shed his horns the other afternoon to make a combined attack on him, which was carried on with great vigor until his death ensued. The superintendent and his assistants attempted to interfere, but were driven out of the inclosure by the infuriated animals, which became docile again

when their enemy was disposed of. Dr. Bliss is so much displeased with the public criticisms of the charges made by President Garfield's physicians that he says: "I do not mean to present any bill. The other physicians in to receive whatever the National Legislature chooses to give, if anything. I concur with my colleagues in this view of the case. I do not think there need be any other contradiction given to the newspaper statement about the supposed enormity of our charges."

The "fighting editor," as a rule, is a convenient myth, serving only as a basis for an occasional humorous paragraph, but there has just died in Paris Antonei Thomassen, who was in fact a "fighting editor." He could neither read nor write, but was announced as the "responsible editor" of several anti-Bonapartist papers, and took the blows, fought the duels or went to prison in behalf of the papers, as the case might be. His "literary merit" was solely in his pluck, and he made money by it.

Seven years ago all the female con-victs in the Indiana Penitentiary were placed in charge of Sarah Smith, a philanthropic Quaker, for the purpose of testing kindness as a means of reformation. She has two hundred girls and women under her care, and the change no high stone walls, dark cells, barred windows, nor armed guards. Eight women assistants are all that she requires to control these prisoners, and severe punishments and deprivations are unknown. It has been proved, says an official report, that 80 per cent. of these convicts are so far reformed that

News Notes.

There are now 70,000 claims for the fixing of fair rent listed in the Land Court at Dublin.

There have been many suicides at Vienna, caused by the panic on the Paris Bourse. Rev. Enoch Pond, D. D., president of

determined to abandon the attempt to make beet sugar in that State. Nearly 3,500 acres of coal lands in the vicinity of Fredericktown, Washington

county, Pa., on the Monongahela river, have been purchased by New York capitalists at prices ranging from \$20 to \$60 per acre.

Demerara advices to the 12th inst., state that a coal famine is impending, and seriously affects the sugar-making interests. It is calculated that the present scarcity of fuel will diminish the production to the extent of 5,000 hogsheads. The will of the late Nathaniel D. Higgins, the New York millionaire,

was filed on Saturday in the surrogate office. He leaves his estate to be divided among his children and relatives, and bequeaths \$50,000 to the charitable institutions in New York city.

A number of distinguished Englishmen representing all shades of religious opinion will hold a meeting at the Mansion House, London, on February 1, to protest against the persecution of the Jews in Russia.

A colossal railroad scheme has been projected in New Mexico, which contemplates the construction of 18 railroads in that Territory, all to be tributary to the Atchison, Topeka and Santa Fe Railroad. The capital stock of the company is \$37,000,000, and it is claimed that \$14,555,800 has been subscribed.

James Smith, a laborer, at Clymer's stone quarry, near Bowers' Station, Berks county, Pa., on Saturday lighted a fuse and failed to get out of the way before the fire reached the charge of parties who wish to procure their supply will do parties who wish to procure their supply will do powder. His body was torn into fragments, and the legs and arms were thrown a considerable distance from the quarry.

Abram S. Hewitt and Edward Cooper, of Cooper, Hewitt & Co., iron and steel manufacturers, New York, have through their attorneys, commenced suit in the United States Circuit Court in Philadelphia against the Pennsylvania Steel Company, for injunction and damages for infringement of a patent for converting cast iron into steel.

The Chicago Tribune, which strongly advocated the call for the anti-Mormon meeting there to-night, published yesterday two columns of correspondence from all parts of the country showing that the movement meets with much sympathy, and that in many of the large cities similar meetings are to be held.

The government commissioners have signed a declaration setting forth that all shares of the National Bank of Mexico have been subscribed for, and over \$3,000,000 paid up. Eighteen thousand shares are held in Mexico, twelve thousand in New York, and fifty thousand in Paris. Under the terms of the concession the bank can now begin business. The last week in February has been appointed for the opening.

Coffee drinkers should read the advertisement n another column headel "Good Coffee."
