News Notes.
The city council of Baltimore has accepted the gift and its conditions of Mr. Enock Pratt for founding a free public library in Baltimore.

The Lower House of the Iowa Legislature has passed a resolution that attacks the granting of passes by railroads to others than objects of charity. It provides for no reason for the more charitable than private parties, and this act smacks strongly of the low demagoguery that too often characterizes corporate legislation.

Titus Hoyt, a farmer living a few miles from Durand, Wis., was murdered by Robert and John Carro sons of a farmer who had been working a farm of Hoyt's. The trouble arose from a dispute about the division of the crop.

A Woman Finds a Tramp Her Brother.
Lawrence (Kan) Dispatch to Kansas City Times.
Yesterday evening about 5 o'clock a lady was called to the back door of her house by a timid knock. She opened the door and an old man asked for something to eat. The lady admitted him into the house and gave him a seat at the table with the entire family. After they were all seated at the table, the old man, who, by the way, was about sixty-five years of age, remarked that he was confident that he had seen her somewhere where she had never thought he had seen her. The old man was silent for a short time, then raising his head, he asked if she ever lived in Ohio. The lady said that she had. Then he asked her if it was in Cleveland. The lady said that she was born there. Then the old gentleman asked her if she had a scar on her left arm that was caused by a burn? The lady said she had. Then she asked his name. The old man looked up with tears in his eyes, and said, "Emma, you don't know me do you?" The lady arose from her chair and exclaimed, "Pray tell me your name?" He arose and started toward her. "Emma Jane, your own brother, Howard." He next took some papers from his pocket and produced a photograph of his sister that was taken when he left his home in Ohio for the West. He left Cleveland in 1864 for New Mexico. After a stay of five years in New Mexico he left for California, where he was married. His wife died soon after their marriage. He was then taken very ill, from which he never fully recovered, and since then he has been sick the most of the time. Mrs. Howard, who is now in Cleveland, and who has made this her home up to the present time.

Boy Inventors.
Some of the most important inventions have been the work of mere boys. The invention of the valve motion on the steam engine was made by a boy. Watts left the engine in a very incomplete condition, and the fact that he had no way to open or close the valve except by means of levers operated by the hand. He set up a large engine at one of the mines, and a boy was hired to work these valve levers; although this was hard work, yet it required his constant attention. One day, being those levers he saw that parts of the engine moved in the right direction and at the exact time he had to open or close the valves. He procured a string and made one end fast to the valve lever; the boy had the satisfaction of seeing the engine move off with perfect regularity of motion. A short time after the foreman came around and found the boy playing marbles at the door. Looking at the engine he soon saw the ingenuity of the boy, and also the advantages of so great an invention. Mr. Watts then carried out the boy's inventive genius in a practical form, and made the valves a perfect automatic working machine.

Mistaken Missionary Zeal.
New York Herald.
It is with considerable regret that the Herald announces the intended departure to-day of some missionaries bound for India. The missionaries are fully entitled to whatever teachings they may like in the Christian system of religion, but whether America can afford to supply them is a question open to doubt. Nations, like individuals, should be before they are generous, and justice demands that our own heathen and dangerous classes shall have all the attention that the American field of missionaries can bestow. Hopes and their faults, but they are not given to treasury plundering, gamy, drunkenness, street fighting, legislative obstruction and many other vices from which America suffers. We have preachers who are the agents of vice, but preaching is not sufficient; the missionary spirit and method are necessary, so if any church has competent missionaries to spare let it send them, not to India, but to Utah, Washington, Albany, the first ward of the metropolis and the neighborhood of Tammany Hall.

Kentucky's Wealth.
The State geologist of Kentucky, in his report, announces that a recent survey has demonstrated the fact that the value of the lands of Kentucky which have added such wealth to Pennsylvania and West Virginia have been traced and identified in the valleys of the Cumberland, the Kentucky, and the Big Sandy, a thickness of seven or eight feet. It is claimed that the analysis of the State chemist shows the coal to be equal if not superior to that of Connellville or New River, and will prove a great impetus to the development of the region in which it lies.

The new elephant at the fair grounds is causing Secretary Kalb more trouble and anxiety than a new baby. A nice, stout bracket of the chain pattern was circled around the elephant's foreleg and clasped together with a thumb screw, with a head an inch and a half in diameter. The chain was fastened to the other thumb screw, and the thumb screw carefully locked. After a few nights the elephant worked out the problem of that thumb screw, and regularly every morning when the keeper appeared the elephant was free from shackles. The keeper could not understand it, and called for Mr. Kalb to explain the mystery. The two consulted, examined and watched. It was ascertained that as soon as the chain was put around the animal's leg and locked he deliberately put his other foot on the end of the chain near the post. That loosened it on the shackled foot. Then, with his trunk, he commenced to unwork the thumb screw, and in a few few minutes he would be free and walking around his cell. Mr. Kalb thinks he now has a scheme to prevent the animal from getting loose. He will put on a stout chain and clasp it with a combination lock, the figures or letters to be known only to the keeper and Mr. Kalb. This will be put on at 6 o'clock in the evening, and will not open till 6 o'clock in the morning.

PERMANENT LOSS OF THE HAIR.
May be entirely prevented by the use of BURNETT'S COCAINE. No other compound possesses the peculiar properties which so exactly suit the various conditions of the human hair. It softens the hair when harsh and dry, soothes the irritated scalp, it affords the richest lustre. It prevents the hair from falling out. It promotes its healthy, vigorous growth. It is not gross nor sticky. It leaves no disagreeable odor. It kills dandruff. Burnett's Flavoring Extracts are known to be the best.

DR. C. W. BENSON, OF BALTIMORE, MD.
In the course of his practice discovered what now is renowned in medical practice, viz: a combination of Celery and Chamomile in the shape of Pills. They are used by the profession at large and constantly recommended by them. It is not a patent medicine. It is the result of his own experience in practice. They are a sure cure for the following special diseases, and are worthy of a trial by all intelligent sufferers. They are prepared expressly to cure sick headache, nervous headache, dyspeptic headache, neuralgia, paralytic sleeplessness, dyspepsia and nervousness, and will cure any case. The Doctor's great remedy for skin disease, called Dr. Benson's Skin Cure, is exceedingly valuable and greatly sought after by all persons who have skin diseases or bad complexion. An excellent toilet dressing. Sold by all druggists. Price 50 cents a box. Depot, 109 North Eutaw street, Baltimore, Md. By mail, two boxes for \$1 or six boxes for \$2.50, to any address.

WOMAN CAN SYMPATHIZE WITH WOMAN.
Mrs. Lydia E. Pinkham, of Lynn, Mass.
I was for a long time suffering from the most painful and distressing form of Female Complaint, all ovarian troubles, inflammation and Ulcers, Falling and Displacements, and the consequent Spinal Weakness, and it particularly adapted to the treatment of these troubles. I was cured by Lydia E. Pinkham's Vegetable Compound. It will dissolve and expel tumors from the uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use. It removes flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headache, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and heaviness, is always permanently cured by its use. It will at all times, and under all circumstances act in harmony with the laws that govern the female system. For the cure of Kidney Complaints of either sex this Compound is unsurpassed.

For You, Madam,
Whose complexion betrays some humiliating imperfection, whose mirror tells you that you are Tanned, Sallow and disfigured in countenance, or have Eruptions, Redness, Roughness or unwholesome tints of complexion, we say Hagan's Magnolia Balm. It is a delicate, harmless and delightful article, producing the most natural and entrancing tints, the artificiality of which no observer can detect, and which soon becomes permanent if the Magnolia Balm is judiciously used.
