Medical.

Diphtheria.

A cold or sore throat may not seem to amount to much, and if promptly attended to can easily be cured; but diphtheria is often followed by consumption or diphtheria.

PAIN KILLER is not an experiment. It has been before the public for forty years, and is most valued where it is best known.

PAIN KILLER has been my household remedy for colds for the past twenty-seven years, and have never known it fail in curing a cold.

For twenty-five years I have used PAIN KILLER for colds and changed lips, and consider it the best medicine ever offered.

I was suffering severely with bronchitis, and my throat was so sore that I could not get any relief until I tried your PAIN KILLER, which relieved me in ten minutes.

For twenty-five years I have used PAIN KILLER for colds and changed lips, and consider it the best medicine ever offered.

For twenty-five years I have used PAIN KILLER for colds and changed lips, and consider it the best medicine ever offered.

OUR WASHINGTON LETTER.

THE GRAND DASH OF AMERICAN ENTER PRIZE.

The Grandest Hair, and Scheme of the Age—Interesting Information Concerning the Great Atlantic Cable—Personal Items—Postal Notes, etc.

WASHINGTON, Feb. 8th, 1882.—In this age of progress, one is not expected to be surprised at any measure brought forward; especially should this be true of our country where projects of the most astounding proportions are conceived and executed.

It was American brain and American capital that pushed to a successful conclusion the Atlantic cable, that connects the two continents, and which is now being talked of in congressional circles.

The contemplation of such enterprises would take away for the moment the breath of nations less energetic than ours; and yet a project of English origin is now being talked of in congressional circles.

It was American brain and American capital that pushed to a successful conclusion the Atlantic cable, that connects the two continents, and which is now being talked of in congressional circles.

The contemplation of such enterprises would take away for the moment the breath of nations less energetic than ours; and yet a project of English origin is now being talked of in congressional circles.

duced products in value of \$192,696,010;

Southern States, with 218 establishments, products in value of \$25,353,257;

Western States and Territories, with 224 establishments, products in value of \$76,933,696;

Pacific States and Territories, with seven establishments, product in value of \$1,674,733.

Commenting on these figures, Mr. James M. Swick, the compiler of the statistics in the decade between 1870 and 1880 the iron industry was extended into many new States and Territories.

Twenty-five States were engaged in the manufacture of iron and steel in 1870, thirty States, the District of Columbia and Wyoming Territory made iron in 1880, and about half of these also made steel.

South Carolina made iron in 1870, but does not appear in the statistics of 1880. In a table are presented the centers of production—two classes—the first comprising 15 counties that produced over 100,000 tons of products and the second class 17 counties that produced between 10,000 and 100,000 tons of products.

In the first class Pennsylvania secures 9 per cent of production out of 15 and in the second class 8 per cent out of 17 counties.

The center of iron and steel production in the United States is in Pennsylvania on the boundary line between Armstrong and Indiana counties and about 12 miles northeast of Apollo and 12 miles west of Indiana—Laurman's rolling mill at Apollo being the nearest iron works.

It is interesting in this work to note the fact that the 140,978 persons employed, 133,203 were men above 16 years old; and 45 were women above 16 years old; 7,729 were boys below 16 years old; 21 were below 15 years old.

To the 140,978 persons employed there were paid as wages \$55,476,785, or an average of \$393.51 for the year for each person.

The average daily wages for skilled labor were \$2.00 of unskilled, \$1.24.

The highest average daily wages of skilled labor were paid in Rhode Island, \$4; the lowest in North Carolina, \$1.25.

For unskilled labor the highest wages were paid in Wyoming Territory, \$2; the lowest in North Carolina, 54 cents.

The average hours of labor in this industry are stated at 45 per week, or a little less than 11 hours per day.

At the average rate of 45 hours per week, the highest average, 75 hours, and the District of Columbia the lowest, 54 hours.

In closing the review the compiler says: "Prices were high throughout the whole year, but fluctuated violently. Labor was in demand, wages were paid promptly, and disputes between workmen and their employers were rare and unimportant.

The census year 1880 will long be remembered as a year of general prosperity for our iron and steel industries, and as one which witnessed the beginning and end of a most exciting epoch in their history."

PERSONAL ITEMS.

Mr. Thos. R. Jones, of Raleigh, has invaded the classic precincts of Georgetown and plucked therefrom one of its choicest treasures in the person of Miss Minnie Davis.

The happy couple were married on last Thursday and left direct for home, with the best wishes of a host of friends to cheer them through life.

Mr. Hamilton Raynor, son of Solicitor Raynor, will in a few days leave for Texas, which he intends to make his future home.

He has a half interest in cattle-herding.

Mr. J. H. Wheeler, the historian of North Carolina, lives here. His health is far from good.

The touch of 70 winters have frosted his hair and bent his frame. His eyesight is also rapidly failing.

Ten thousand eight hundred and ninety-seven of the resident population of Alabama and two hundred ninety-four of the resident population of the District of Columbia were born in North Carolina.

POSTAL NOTES.

Postoffice officials are seriously considering the project of consolidating the Salem and Winston postoffices.

The offices are only one mile apart, and the pay of the postmaster is respectively \$1,200 and \$800.

It is contemplated to establish an office midway the present sites, make the office Presidential and thus save upwards of \$800.

If the consolidation is made, the offices in the postoffice against both offices and when simmered down they show that mail has been detained at each office which was intended for the other.

His health is far from good. The touch of 70 winters have frosted his hair and bent his frame. His eyesight is also rapidly failing.

Postmasters' commissions sent: Mrs. Julia Corubs, Zimmerman, N. C.; Squire M. D. Farris, Flat River, N. C.; William H. Farris, Spring Hill, S. C.; Daniel Sander, Walterborough, S. C.; James Seaborn, Fair Play, S. C.

PICKUP.

Freelinghousen's Timidity.

Chicago Tribune, Blaine County.

The advent of Freelinghousen as the head of Arthur's cabinet, judging by the results, can hardly seem otherwise than unfortunate both for the country and the suitable to advise the president of this Republic upon any question outside of the slow formula of routine.

The old whig party tried to make a leader and a statesman of the elder statesman by giving him the name of Freelinghousen.

There is not a third class government on earth which will not smile at the weak, timorous, fickle judgment of the executive of the United States and which will not be surprised at the remarkable revocation of an invitation of the American nations to a conference lest some European power may be offended.

Arthur's dread lest the British government might be displeased by the cause not invited to attend a gathering of the family of American States, to consult upon purely American subjects, will tend to bring this country into premature contempt.

PREMATURE LOSS OF THE HAIR.

NETT'S COCAINE. No other compound possesses the peculiar property of curing so quickly and so completely the loss of the hair.

It softens the hair when harsh and dry, soothes the irritated scalp, it affords the richest luster, it prevents the hair from falling out. It promotes its healthy, vigorous growth. It is not greasy nor sticky, it leaves no disagreeable odor. It kills dandruff.

Burnett's Flavoring Extracts are known to be the best.

Kentucky's Coal.

Kentucky has \$1,968,537 invested in coal mines, a maximum capacity of yearly production of 2,435,776 tons; produced in 1880, 946,289 tons, valued at \$1,124,900; value of material used in mines, \$95,995; wages paid, \$687,474; men employed, 2,826; value of machinery, \$51,150; working capital \$276,000; value of plant, \$732,252; value of real estate, \$602,885.

Kentucky's bituminous coal product is 2,322 per cent of the whole product of the United States, which is 40,311,459 tons.

Only two States, Kansas and Alabama—exceed Kentucky in production of bituminous coal products. The figures are: Alabama, 2,836; Kansas, 2,217; Kentucky, 521.

Caused by a Coal Explosion.

New York, Feb. 9.—A Herald Coal-field Va. special says: "It is the settled opinion of leading miners that the disaster was caused by the accumulation of carburetted hydrogen in one of the drifts during the dinner hour and one of the men carried a light into it when going to work at one o'clock, causing the explosion."

ONE EXPERIENCE FROM MANY.

I had been sick and miserable so long, and had caused my husband so much trouble and expense, so one seemed to know of any cure, that I was completely disheartened and discouraged.

In this frame of mind I got a bottle of Hop Bitters and used them until I was cured. I was so improved and gained so fast that my husband when I told them what had happened, said: "I wish for Hop Bitters long, may they prosper, for they have made mother well and us happy."

THEY WERE FLASTERS?

They may relieve, but they cure that lame back for the kidneys are the trouble and you need a remedy to act directly on their secretions, to purify and restore their healthy condition.

Kidney-Wort has the specific action—and at the same time it cures the bowels and doesn't want to get sick, but get a package to-day, and cure yourself. Either liquid or dry for sale at the drug-store—Singer's Dispensary.

"BOUGH ON RATS."

The thing desired found at last. Ask druggist for Rough on Rats. It clears out rats, mice, roaches, flies, bed-bugs, 15c boxes.

Lotteries.

Particular Notice.

All the drawings will hereafter be under the exclusive supervision and control of GENERALS G. T. BRAUREGARD and J
