amount to much, and if promptly attended to can easily be cured; but neglect is often

ollowed by consumption or diphtheria.

acts so quickly and surely in such cases as PERRY DAVIS' PAIN KILLER. The prompt use of this invaluable remedy has saved thousands of lives.

PERRY DAVIS' PAIN KILLER is

not an experiment. It has been before the public for forty years, and is most valued where it is best known.

A few extracts from voluntary testimonials read as follows:

PAIN KILLER has been my household remedy for colds for the past twenty-seven years, and have never known it to fail in effecting a cure.—
L. S. CROCKER, Williamsville, N. Y.
For thirty years I have used PAIN KILLER, and found it a never-failing remedy for colds and sore throat.—BARTON SEAMAN.
Have received immediate relief from colds and sore throat, and consider your PAIN KILLER an invaluable remedy.—GEO. B. EVERETT, Dickinson, N. Y.

invaluable remedy.—Geo. B. Everett, Dickinson, N. Y.

I have just recovered from a very severe cold, which I have had for some time. I could get no relief until I tried your Pain Killer, which relieved me immediately. I will never again be without it.—C. O. Force, Lowndes, Ga.

Have used Pain Killer in my family for forty years, and have never known it to fail.—Ransom Lewis, Waynesboro, Ga.

I began using Pain Killer in my family twenty-five years ago and have used it ever since, and have found no medicine to take its place.—B. W. Dyer, Druggist, Oneida, N. Y.

For whooping-cough and croup it is the best preparation made. We would not be without it.—A. P. Routs, Liberty Mills, Va.

For twenty-live years I have used Pain Killer for colds and chapped lips, and consider it the best medicine ever offered.—Geo. Hooper, Wilmington, N. C.

I was suffering severely with bronchitis, and my

medicine ever offered.—GEO.HOOPER, Wilmington, N. C.

I was suffering severely with bronchitis, and my throat was so infiamed I could scarcely swallow any food. I was advised to try your Pain Killer, and after taking a few doses was completely cured.—T. Wilkinson.

Dr. Walton writes from Coshocton: Your Pain Killer cures diphtheria and sore throat, so alarmingly prevalent here, and has not been known to fail in a single instance. This fact you should make known to the world.

Mrs. Ellen B. Mason writes: My son was taken violently sick with diphtheria, high fever, and cold chills. So many children have died here, I was afraid to call a physician, and tried your Pain Killer. He was taken on Sunday, and on Wednesday his throat was clear. It was a wonderful cure, and I wish it could be known to the poor mothers who are losing so many children.

For Chills and Fever PAIN KILLER has

For Chills and Fever PAIN KILLER has no equal. It cures when everything else fails. Delays are often dangerous. A bottle of PAIN KILLER in the house is a safeguard that no family should be without.

All druggists sell it at 25c., 50c., and \$1.00 per bottle.

CHARLOTTE, N. C., SUNDAY FEBRUARY 12, 1882.

Hom -made Mannres for Cotton. THE N. C. AGRICULTURAL EX- ) PERIMENT STATION,

RALEIGH, N. C., Feb. 9th, 1882. The interest in home-made manures is rapidly increasing. A host of farmers tried the formulas recommended last year, and in spite of the bad season they report very satisfactory results. Using such materials as were found on the farm and supplementing them with such chemicals as could be obtained, numerous different mixtures have been tried. The aim of all, however, was to apply about 25 pounds of phosphoric acid, 10 to 12 pounds of nitrogen and 12 to 15 pounds of potash to the acre. Let me present here just one general and one special case, by way of illus-

Every cotton farmer has cotton seed and stable manure, and every one is able to get some dissolved bone or dissolved s. c. phosphate and a potash salt. A mixture like the following was tried by a great many farmers last year:

800 pounds acid phosphate, about \$10.00 100 " muriate of potash " 2.50 600 " or about 20 bus. cotton seed, stable manure, making a ton of 2,000 pounds, costing, not counting the home materials and

labor, \$12.50. One farmer who applied 300 pounds of this per acre writes: "I am wonderfully pleased with the results. I made, in spite of the drought, 850 pounds seed cotton on land that last year made 700 pounds per acre, highly manured with a commercial fertilizer. I had a tenant whose crop joined mine (land equally as good), who used the — guano and made about 500 pounds per acre. My experience is that it is equally as good for corn as for cotton." Many farmers added 100 pounds sulphate of ammonia to similar mixtures. This was necessary on some soils when stable manure and cotton seed were insufficient. But no farmer ought ever to buy all or even a large part of his nitrogen. It is now the costly ingredient of commercial fertilizers and it is destined to get dearer every year unless farmers save up the home sources of nitrogen better than they do. With the proper diversity of crops, with grass, cattle and sheep, farmers ought to have a plenty of nitrogen, without buying a pound.

I have frequently recommended 400 pounds kainite as a substitute for the muriate of potash in this formula, under similar circumstances for limitwherever it could be obtained cheaply Kainite has become very popular with cotton planters. It probably acts both directly and indirectly.

The sulphate of potash it contains is quite a stimulating food to the cotton plant. It distinctly promotes the regular and early ripining of the cotton.

Kainite may be used with advantage therefore both upon the moist low-lands of the system part of the State lands of the eastern part of the State and upon the hill sides of the west where cotton is out of its natural kingdom and has to be hastened to maturity. The common salt, it contains also, acts only indirectly, I suppose, in sup-plying plant food. It reacts upon the soil and renders available the plant

food locked up in insoluble compounds.
While all this is probably true in all cases, let me speak a warning against the continual use of kainite alone upon the same land. Its cheapness and the good results it produces the first year empts the farmer to apply it again and again. But these good results will prove ensnaring, if it is continued too ong. It must be remembered that it supplies only a single element of plant food, or counting the magnesia and soda as directly useful, only some subordinate elements at best. These are stimulating and exhaustive of the soil when used alone, as explained. Whiskey may make a man strong for an all commissions of sale, and the Senate hour so, but its continual use, to pro-

salt, digestive. It hastens the breaking up of organic matter especially, and turns over its plant-food to new plants. Hence its value upon new grounds, and upon peaty, sour low-lands. But it is eminently desirable to preserve the organic matter in the soil, to improve its mechanical condition, and as a basis of fertility to retain ammonia, salts and moisture in the soil. Our high sandy lands are usually deficient in organic matter. It is a suicidal policy which burns up all they do contain with lime in order to produce one crop. The continued use of any single compound upon soils is questionable. But the use of lime and potash alone are especially so for the reasons stated. The special case which I wish to cite shows how these things may be rightly used. When a heavy application of organic matter, like cotton seed, stable manure or even straw, leaves, muck, etc., can be made, this objection to lime is removed, of course. Where immediate results are desired from such application the use of lime and salt becomes advisable. Here is a case in point. A very successful farmer in an eastern county writes me as follows: "I took a piece of land that in its natural state was too poor to produce cotton and put upon the acre the following manure: 100 cart loads of muck, 15 hushels of cotton seed, 100 pounds of kainite, 100 pounds of salt and 200 cart loads of salt and 200 cart loads of muck, 15 in Red Oak District and in Brunswick connty two deaths have occurred. pounds of lime. The result was I made about 1,000 pounds of seed cotton. It grew as high as my shoulders. Where there was no manure, it did not grow higher than my hand. I am sure it was cut off at least one-third by the drouth." The lime and salt supplied the large amount of food contained in the vegi-table matter rapidly to the growing plants. The gentleman thinks the common salt may be omitted, as there is enough in the kainite, and that the application would be improved by the addition of 100 pounds of acid Hall Committee it was announced that certainly be very good manuring.

A Snake in His Stomach.

CHAS. W. DABNEY, JR. Director.

Minneapolis Journal. Mrs. T. G. Salisbury, of this city, to-day received a letter from Miss Cora Lee, of Butte, which contains information of a remarkable statement. The writer is a daughter of William C. Lee, a former well-known resident of Minneapolis. After stating that his health | tional. is much better than it has been for some time, she says that about a month since her father was awakened from his sleep one night by an unpleasant sensation in his throat. Feeling in his mouth for the cause, he pulled therefrom a live snake, eight inches long and as big as his little finger. The reptile lived for more than an hour, and when disturbed would show fight. Mr. Lee thinks that he took the snake in his stomach five years ago while in the employment of the government in the Yellowstone region. Those who are acquainted with the writer of the letter will not question the truthfulness of the statement,

HISTORY OF SMALL-POX.

A Plague that has Held Sway for

Twelve Centuries. Of all the plagues which have arisen from time to time, or infested cities or countries, none is more dreaded, none is more persistent, none is more easily communicable or fatal than was small-pox a century ago. But whence or how the disease arose it is not so easy to say. Other plagues have vexed the earth for a time and then passed away, leaving no vestige of their ravages, as did the great plague at Athens during the Peloponnesian war, or the plague in the England of of Charles II. But small-pox, not content with twelve centuries of sway, still holds its own despite the discoveries of science.

It is unquestionably true that diseases of such contagious nature generally arise among filty and ill-conditioned people, confined in narrow quarters. This was the case with the Athenian plague, and it was again the case in the Jewish quarters of European cities. Contagious diseases were compara-tively rare among the Romans and Greeks of the illustrious periods, owing to the free public baths and excellent sanitary and gymnastic habits of the

It was reserved for the middle or dack ages to furnish the most dreadful examples of pestilence. Small-pox arose in the very darkest period of mediæval times. It first invaded England in the ninth century; it was common in Arabia in the tenth; the crusades carried through all Southern Europe; it reached Norway in the fourteenth century; in 1517 it was carried to St. Do-mingo by the Spaniards along with slavery, the Inquisition, the rack, and a host of other blessings; three years later it crossed to Mexico and slew three millions; it invaded Iceland in 1707, and Greenland in 1783, slaying a fourth part of the residents in the former and and a large proportion of those in the latter country, and despite all that medical skill has done and is doing to cast it from the earth, it bids fair to retain its hold, in some measure, as long as popular ignorance, destitution, negligence, and carelessness continue to combat the physicians and the dictates

of common sense. Its hisrory is thus unique; other contagious diseases have proved as fatal ed periods; none have continued their climates from Mexico to Greenland. It is not unreasonable, therefore, that its approach should be hailed with terror as is the approach of almost no other disease . Yellow fever and Asiatic cholera, even, have caused no such potent and wide spread destruction. The very air it taints carries infection; garments in contact with patients carry their baneful power for years if shut up in tight closets; it can be communicated by mail or by the wind, by rai road by ocean voyage, by manifest means which can not be guarded against. It is not only dangerous but loathesome in its progress; it drives away one's friends, thrusts him into unutterable tortures, and leaves him often a wreck for life, with ruined health and disfigured countenance. When to all this is added its persistent reappearance at almost definite periods, it is not to be wondered at that small-pox scares are so common.

Readjuster Doings. RICHMOND, VA., Feb. 11.—The Readjusters caucus last night endorsed the bill for redistricting the State into twelve judicial circuits, the bill givbill repealing the whipping post law. duce this effect, will kill him.

I find exactly the same objection to

I find exactly the same objection to at length. Hale, one of the four Readjusters who "bolted" the caucus on adjusters who "bolted" the caucus on and for a similar reason. Lime is usually accounted among the elements of plant food, but its primary action upon the soil is like that of common the decision of the effort to dictate who should be Massey's clerks made a long speech and promised finally to abide by the decision of the caucus if Massey was given another chance. It was thereupon decided to rescind the previous action in nominating S. Brown Allen, and to take another vote for auditor next Tuesday night. The caucus adjourned at midnight.

Drunkenness in England, Norfolk Virginian As shown in these columns a few days ago, the government of England never tires in the manufacture of "outrages" in Ireland; yet we get a shocking glimpse of the nether side of English life in a census which was taken on the first Saturday evening of the year of the frequenters of public houses at Bristol. Out of a population of 206,000 there were 105,000 who entered the public houses on that one evening, between the hours of seven and eleven. Of this number 54,075 were men, 39,803 women and 13,415 children. And the Pall Mall Gazette says there is no reason to believe that Bristol is worse than any other large town. This is a terrible exhibit for a country that boasts of its civilization and morals.

New Cases of Small-Pox.

There are now fifteen patients in the hospital.

The authorites of the Nerfolk and Western Railroad in consequence of the prevalence of small-pox have issued an order prohibiting the carrying of passengers on freight trains.

phosphate per acre to supply the de- John Kelly would leave for Florida tomands of the plant, before the organic day. He goes South by the advice of matter is decomposed. This would physicians.

> Cotton Strike Ended. NEW ORLEANS, Feb. 11.-The labor troubles at the cotton presses are ended. All the presses are working with full forces of skilled laborers.

Pronounced Unconstitutional. NASHVILLE, TENN., Feb. 11.—A special says the Supreme Court has decided that the funding act is unconstitu-

"Be candid, doctor," said the patient, when found with a bottle of Dr. Buil's cough syrup. "You know it is a good medicine," and the M. D.

PREMATURE LOSS OF THE HAIR May be entirely prevented by the use of BUR-NETT'S COCOAINE. No other compound possesses the poculiar properties hich so exactly suit the various conditions of the human hair. It softens the hair when haish and dif. scothes the irritated scalp. It affords the richest lustre. It prevents the hair from fe'ling off. It promotes its healthy, vigorous growth. It is not greasy nor sticky. It leave no disagreeable odor. It kills dandruff. Burnett's Flavoring Extracts areknwn to be the THE TALK OF THE TOWN.

Columbus, Ga., Feb. 4, 1881. H. H. Warner & Co.: Sirs-Your Safe Kidney and Liver Cure beats all the medicines I have ever heard of for kidney and liver diseases. It has cured a genuine case of Bright's Disease here in Columbus (Judge F. M. Brooks), and that is proof enough for me. It is the talk of the tewn. J. N. GILBRET, M. D.

ONE EXPERIENCE FROM MANY. I had been sick and miserable so long and had caused my husband so much trouble and expense, no one seemed to know what alled me, that I was completely disheartened and discouraged. In this frame of mind I got a bottle of Hop Bitters and used them unknown to my family. I soon began to improve and gained so fast that my husband and family thought it steemes and uncompletely had and family thought it strange and unnatural; but when I told them what had helped me, they said, "Hurrah for Hop Bitters! long may they prosper, for they have made mother well and us happy."— The Mother.

DISINFECTANTS ARE ABSOLUTELY ecessary, especially in cases of Diphtheria, Scarlet, Typhoid, Yellow and Malarial Fevers. Darbys Prophylactic Fluid is the great disinfectant and purifier. It affords protection from contagion, it is a relief and cure in the sick room, will purify the air and destroy vile odors without creating another. As a household remedy it is invaluable.

WHY WEAR PLASTERS? They may relieve, but they can't cure that lame back for the kidneys are the trouble and you want a remedy to act directly on their secretions, to purify and restore their healthy condition. Kidney Wort has the specific action—and at the same time it regulates the bowels perfectly. Don't wait to get sick, but get a package to day, and cure yourself. Either liquid or dry for sale at the druggists.—Binghamton Republican.

A Down Town Merchant. Having passed several sleepless nights, disturbed by the agonies and cries of a suffering child, and becoming convinced that Mrs. Winslow's Soothing Syrup was just the article needed, pro-cured a supply for the child. On reaching home and acquainting his wife with what he had done, she refused to have it administered to the child, as she was strongly in favor of Homocopathy.

That night the child passed in suffering, and the
parents without sleep. Returning home the day
following, the father found the baby still worse;
and while contemplating another sleepless night,
the mother stepped from the room to attend to
some domestic duties, and left the father with the child. During her absence he administered a por-tion of the Soothing Syrup to the baby, and said nothing. That night all hands slept well, and the little fellow awoke in the morning bright and hap-py. The mother was delighted with the sudden and wonderful change, and although at first offend-ed at the decention practiced, upon her has coned at the deception practiced upon her, has con-tinued to use the Syrup, and suffering crying babies and restless nights have disappeared. A single trial of the Syrup never yet failed to relieve the baby, and overcome the prejudices of the mother. Sold by all Druggists. 25 cents a bottle.

"ROUGH ON BATS." The thing desired found at last. Ask druggist for Rough on Rats. It clears out rats, mice roaches, files, bed-bugs, 15c boxes.

An Article of True Merit .-- "Brown's Bronchial Troches" are the most popular article in this country or Europe for Throat Diseases and Coughs, and this popularity is based upon real merit.
