Who is Mrs. Winslow? As this question is frequently asked, we will simly say that she is a lady who for upwards of formis as a Female Physician and nurse, principally mong children, she has especially studied the and this of this numerous class, and, as a result of this effort, and practical knowlor children teething. It operates like magic— tying rest and health, and is moreover, sure to egulate the bowels. In consequence of this aras a benefactor of her race; children certainly do se up and bless her; especially is this the case this city. Vast quantities of the Soothing Syrup are daily sold and used here. We think Mrs. Winslow has immortalized her name by this invaluable article, and we sincerely believe thousands of children have been saved from an early we by its timely use, and that millions yet un-moving share its benefits, and unite in calling to he suffering little one. In our opinion, until she has given it the benefit of Mrs. Winslow's Soothing syran. Try it, mothers—try it now.—Ladles' Visitor New York City. Sold by all druggists. 25

Night before last a shifting engineer at the Air-Line depot in this city was thrown from his engine, and the machine went it alone for a little while, getting about two miles away before it stopped. The only damage was to the engineer, who was bruised about the shoulders rather seriously.

Death of Mrs. Lucas.

Mrs. Mary J. Lucas died in this city last night at nine o'clock. The funeral will take place from St. Peter's Episcopal church this evening at four o'clock. Friends and acquaintances are respectfully invited to attend.

Personal.

-Miss Fannie May Witt, the pert little representative of "Our Boys and Girls of the South," published at Atlanta, was in Charlotte several days this week in the interest of her paper.

-Prof. Seals, of The Sunny South, Atlanta, Ga., was in the city yesterday. -Prof. Blake, of Davidson College, was registered at the Central yesterday.

Another Humpty Dumpty.

Col. Robinson's Humpty Dumpty is advertised to be at the Opera house in this city next Monday night, 27th. The Baltimore Herald says the cast of characters in the play is all that could be desired to make up an evening of good amusement. The four clowns, one of which number, Marco, the smallest female clown in the world, takes an active part. The whole play fairly bubbles over with fun and is a treat for the old as well as for the young folks.

Trouble in Freight Movements.

In Tuesday's OBSERVER appeared a complaint about the irregularity in the delivery of freight at points along the Atlantic, Tennessee and Ohio Railroad and we are requested to make a statement of the causes of the trouble. The delay has in a great measure been due to an unusual block in freight movements for points on the Air-Line Divi- ly upon us? By what power is it done, sion, the freights accumulating to such a degree as to render difficult the moving of cars with any regularity. It is stated that the cause of the complaint alluded to was the breaking down of a car on which certain freight was loaded, necessitating a delay for repairs. The difficulties heretofore existing have to a great extent been overcome, and the assurance is given that every effort will be made in the future, as in the past, to have freights moved promptly

Looking for Better Lights.

In giving a report of the proceedings of the last meeting of the board of er, northwesterly winds, stationary or Aldermen an important matter was omitted. The mayor stated to the board that in view of the complaints about the street lights he had entered into communication with the Brush, Electric Light Company, of Columbus, Ohio, with a view of ascertaining the probable cost of having the streets of Charlotte illuminated with electric lights instead of gas.

There has been much complaint about the inferior street lights in this city, and we are of opinion that any movement looking to an improvement in this direction will meet with the approval of the public-at least with the progressive portion. The present lights are very little better than none at all, and if satisfactory arrangement can be made for the introduction of the electric light it is to be hoped that it will meet with the approbation of the board of

Aldermen. But won't we put on frills when our in the mountains of this State which I want settled. I am induced to make the electric light? It will be just a pavements are bathed in the halo of the electric light? It will be just a little too beyond, to say the least.

Colored Men on Juries.

To the Editor of the Observer. As you have always shown kindness by giving us a hearing, please allow me to inquire why it is that the colored people of this county are excluded every year from the privilege of sitting upon the jury in all courts held here, except the United States Court? Why is this injustice practiced so persistentand who is responsible? We suppose the chairman of the county commis sions can answer this. If we have done anything of ourselves we wish to know it in order to rectify mistakes. Our people are being tried here daily and often convicted, with no representative of their race upon the jury. Is this right? Is it justice? We mean no disrespect to any one, but as private colored citizens of Mecklenburg county, we desire those persons whose business it is to draw the juries to explain why it is that colored men are excluded from the jury. Another Offer to the Jewish Exiles.

PHILADELPHIA, Feb. 22.-Another offer of land for Russian refugees was received by Mayor King this morning in a communication from Calvin J. Cowles, of Charlotte, North Carolina. He says: "Observing the very liberal offer of free homes for the persecuted Russian Jews, expected on the steamship Illinois, made by Hamilton Diss-ton, president of a Florida land company, and having large bodies of land famlies, forty acres to each family in fee simple. The lands I offer are situated in the counties of Alexander and Wilkes and are adapted to corn, wheat, tobacco, etc; well watered and covered

HOW MUCH THREAD IS MADE IN A YEAR ?

"A prominent advertiser of spool cotton has furnished some figures in advertising that he makes sufficient bread every day to go four times around the world, upon which to form an estimate. Let us see how much thread it takes to go four times around the world.

One dozen of thread of 200 yards contains 2,400 yards. Now, the world at the equator is 380 degrees of 89 1.5 statute miles, or 24.912 miles in circumference, 1,760 yards to the mile, or 43,345,120 yards. It requires, therefore, 18.389 dozens to go around the world, and a daily product of four times that quantity amounts to 73,076 dozens per day, or with three hundred working days in the year, the prodigious quantity of 21,922,800 dozens for one company alone. How they wind it all does not appear, for the automatic winding machinery, of which they boast that they have seventy-eight machines, turning out 6,000 to 7,000 spouls per day, can, at their highest esti-7,000 spouls per day, can, at their highest esti mate, turn out 45,500 dozen per day, or 18,650, OOO dozen per annum.

This is one company alone, and not the largest exhibitor at Atlanta. How much thread is made

in a year? Who knows?" The manufacturers of Clark's "O.N.T Spool Cotton are the "prominent advertisers" referred to, and their advertisement from which the author quoted
