ROAD STOCK. Richmond & Danville stock was listed at the exchange in New York on or about the 7th of November last, and when first placed upon the list was quoted at 1.161/2. Almost from the very day of the first transaction it took an upward tendency and continued in that direction until it reached 2.57 in February, when it weakened and has since gone down more rapidly than it advanced, until yesterday, when it was quoted at 1.10-61/2 lower than the figure when it was first put on 'change. Just what influences have been at work is unknown to us, but the rapidity with which it advanced, and the exceedingly high price reached, together with the sudden collapse, leaves the impression that a job was put up and perhaps somebody has been hurt by it.

Mr. Harang, of New Orleans, claims to have invented a process by which the bagasse, or sugar cane after the juice has been taken out, may be utilized, and the fiber be preserved for the manufacture of bagging, ropes, &c. By the same method he utilizes sorghum cane and swamp reeds, all of which he claims can be made of untold value, though now worthless.

The leading Scientists of To-day agree that most diseases are caused by disordered Kidney or Liver If, therefore, the Kidneys and Livers are without regard to its effect upon the public faith of the government, pledged by an act in which the, Senate took its share to the Emperor of China.

Ingalls offered an amendment providing that the act shall not go into effect until 90 days after its passage, and the amendment was adopted.

On motion of Bayard amendments adopted making the 22nd section read as follows:

Liver If, therefore, the Kidneys and Livers are kept in perfect order, perfect health will be thetresuit. This truth has only been known a short time and for years people suffered great agony wi hout being able to find relief.
