

W. T. BLACKWELL & CO.
Durham, N. C.
Manufacturers of the Original and Only Genuine
DURHAM TOBACCO

Our claim for merit is based upon the fact that a chemical analysis proves that the tobacco grown in our section is better adapted to make a GOOD PURE, satisfactory smoke than ANY OTHER tobacco grown in the world; and being situated in the HEART of this fine tobacco section, WE have the PICK of the offerings. The public appreciate this; hence our sales EXCEED the products of ALL the leading manufacturers combined. None genuine unless it bears the trade-mark of the Bull.

The Charlotte Observer.
TUESDAY, MARCH 21, 1882.

STATE NEWS.

Asheville Citizen: We are informed that imposing the tax upon the property and franchises of the Western, North Carolina railroad, the board of commissioners of Rowan declined to impose any tax until the road is completed. Irrell county levies a tax up to the extent of the sum—\$2,000—agreed on in the general compromise; and Catawba fixes the levy at \$1,000 per mile.

Jackson county put in its appearance this week through the Pioneer Water house as a tobacco producing county. There seems now to be no end to the counties putting forth their claims to recognize in that department. "The woods are full of them." There is a great tobacco future for this transmontane region.

We learn that an unfortunate shooting affair occurred in Franklin, Macon county, on the 2d inst. It seems that Messrs. Robert Foster and Isaac Ashe, in settling up some old business matters got into an altercation, bringing on a fight and in the scuffle Ashe shot Foster giving him a serious, but it is hoped not a dangerous wound in the thigh. Both parties were partners in business and we learn that it was purely accidental that Mr. Ashe had the pistol on his person. He had loaned a pistol to a deputy sheriff and it had just been returned to him.

Raleigh News and Observer: Work on the new court house will begin next week.

About a dozen negroes were before the Mayor yesterday, charged with gambling on Sunday. They were fined \$7 to \$12 each.

Twelve or eleven churches for white people, and a like number for colored. Twenty-two churches is a good number for a place of this size.

We are glad to note that Col. J. McLeod Turner's condition has much improved. The great weight he lost was broken in Asheville, last fall, after the surprise of the physicians, knitting rapidly. Col. Turner is very cheerful and is certainly getting on nicely.

Col. Walker Clark has lately received two beautiful presents from a friend in Jerusalem. One of them was gathered on the Mount of Olives, the other in the Garden of Gethsemane. They came by mail, and were fastened upon common cardboard. They were just thirty days in transit, and look remarkably fresh after their long journey from over the sea.

A colored man, in Orange county, has wheat on his farm 24 inches high.

Grasshoppers and other insects are troubling wheat growers in some parts of the State.

Last week's cotton receipts were 2,136 bales.

AN INVITING FIELD.

What North Carolina Offers to the Tourist and Capitalist.

We clip the following from a letter of Col. Pardee to the New Haven, Connecticut, Register:

Within two years the Babun Gap road will be finished, and much of the romance as well as the roughness of a journey through that part of the country will be gone, but nothing is to be destroyed or impaired the grandeur of the mountains, the beauty of the waterfalls, and the extraordinary natural attractions of that entire region. Now there is here any part of the South, where the great mountain chains of Western North Carolina. Four railroads are under construction, and making rapid progress toward completion, which will connect with or intersect each other and open up the mineral forest and agricultural wealth of that territory, giving it outlets through Georgia, Tennessee, both Carolinas and Virginia, to the markets of the world. Of all the minerals on exhibition at Atlanta, none attracted so much attention as the iron ore, and the undeveloped country which, as compared with the rest of the State, is almost as unknown land. What it will be when these railroads force open its doors and compel it to disclose its resources to the rest of the world, no one can imagine if not foretold. A land of iron and copper, of soapstone, marble and granite, of mica and corundum, of gold and precious gems; a land whose mountains are covered with pine, and whose valleys verdant; a land where the winters are never severe and the summers always tempered by cool refreshing winds; such is the country for tourists to visit, and for capital to seek, and such is western North Carolina.

COST OF A RAILROAD WAR.
The Recent Trans-Montane Fight Made at an Expense of \$100,000,000.

Philadelphia Record.

From the many interesting paragraphs in the memorial of the Maritime Exchange, yesterday, the following extract is taken, showing the enormous cost of the late "railroad war":

The amount of grain moved east by rail during the year 1880 was 205,500,000 bushels, equal to an average of fifty-five pounds to the bushel, to 5,651,250 tons. Add 33 per cent. for the tonnage in provisions and other merchandise, then deduct 25 per cent. for the three months before the freight war was inaugurated, and we have a total tonnage for the nine months as above, say, of 5,651,250 tons. At the beginning of this war, grain and similar freight was 30 cents per 100 pounds, and it was quickly reduced to 7 cents per 100 pounds. The average reduction would be fairly stated at 20 cents per 100 pounds, or \$4 per ton; making a total loss of \$22,605,000 to the four trunk lines and their Western connections from Chicago and similar points east in nine months. It is useless to say that this compelled the railroads to work without profit on this trans-montane volume of traffic. They worked at a very serious loss we need not undertake to demonstrate; and we would ask whether four years of such work would not go very far toward wiping out all the railroads in this section of the country.

"In these calculations we have not estimated the result of the widespread distrust engendered in our commercial credit; nor of shaken confidence in our national securities; nor of the blow given to the real-estate interests and general prosperity of the country; nor has account been taken of the tremendous decline in the value of the bonds and stocks of these railroads themselves, and the consequent loss to and sufferings of individuals, including widows and orphans, who had their funds invested therein. Do we overstate the case when we say the total loss, in all its ramifications, would be nearer \$100,000,000 than \$22,605,000?"

The Key to Health.
Have you found the key to perfect health and strength? It is Kidney-Wort, the only remedy that overcomes it once the action of the kidneys is restored. It purifies the blood by cleaning the system of all humors and by giving strength to the liver, kidneys and bowels to perform their regular functions. See displayed advertisements.

KIDNEY-WORT
THE ONLY MEDICINE IN EITHER LIQUID OR DRY FORM That Acts at the same time on THE LIVER, THE BOWELS, AND THE KIDNEYS.

WHY ARE WE SICK?
Because we allow these great organs to become clogged or torpid, and poisonous humors are therefore forced into the blood that should be expelled naturally.

KIDNEY-WORT
WILL SURELY CURE KIDNEY DISEASES, LIVER COMPLAINTS, PILES, CONSTIPATION, URINARY DISEASES, FEMALE WEAKNESSES, AND NERVOUS DISORDERS.

By causing free action of these organs and restoring their power to throw off disease.

Why suffer Bilious pains and aches? Why tormented with Piles, Constipation? Why frightened or disordered Kidneys? Why endure nervous or sick headaches? Use KIDNEY-WORT and rejoice in health.

It is put up in Dry Vegetable Form, in tin cans one package of which makes five quarts of medicine. And in liquid form, very convenient for those that cannot readily prepare it.

It acts with equal efficiency in either form.

The River Still Rising.
NEW ORLEANS, March 20.—A special from Vicksburg to the Times (Democrat) dated midnight says: "The river has risen an inch in the past 24 hours, but is now stationary. Telegrams from New Orleans say no change in the condition of affairs there.

The steamer Carolias arrived there to-day with 350 mules and other stock, and 150 refugees from the overflowed country. It is believed that the river at Yazoo City will be at a stand to-morrow. It has fallen an inch at Rick's place above there.

The steamer Head-Light, from Davis's bend, brought to Vicksburg 200 head of stock and 100 people, a majority of whom are in the most destitute condition.

Shepherd, Kamock, Hurricane and Big Block Islands are completely submerged, not a strip of land being visible in that entire section.

At Palmyra and Davis's Bend about 30 acres of land are still above water.

The steamer, Dickson, from Eagle Bend, brought 75 head of stock and 75 people, and reports a levee immediately broken last night. The crevasse is now one thousand yards wide.

When the "Belle of Memphis" passed Eddington place last evening, the water was running over the levee.

At other places of the river, so many of whom are in the most destitute condition.

The leading Scientists to-day agree that most diseases are caused by disordered Kidney and Liver. If, therefore, the Kidneys and Livers are kept in perfect order, perfect health will be maintained. This truth has only been known a short time and for years people suffered great agony without being able to relief. The discovery of Warner's Safe Kidney and Liver Cure marks a new era in the treatment of these troubles. It is a simple, natural, and safe remedy, containing just the elements necessary to nourish and invigorate both of these great organs, and to restore and keep them in order. It is a POSITIVE REMEDY for all the diseases that cause pain in the lower part of the back—Sciatica, Rheumatism, Jaundice, Dropsy, Gravel, Fever, Ague, Malaria, Fever, and all difficulties of the Kidneys, Liver and Urinary Organs.

It is an excellent and safe remedy for females during Pregnancy. It will control Menstruation and is invaluable for Leucorrhoea or Falling of the Womb.

As a Blood Purifier it is unequalled. It cures the eruptions that mark the blood.

This Kidney and Liver Cure is put up in the LARGEST SIZED BOTTLE of any medicine upon the market, and is sold at all dealers at \$1.00 per bottle. For wholesale inquiries apply to H. H. WARNER & CO., Proprietors, 110 N. 3rd St., Rochester, N. Y.

Salaries of New York Clergymen.
New York Letter to the Hartford Times.

Speaking of salaries, the Broadway Tabernacle has advanced the pastor (Taylor) to \$16,000, which is the largest salary in New York. This is a judicious method of keeping him from accepting any other offer.

Trinity has been giving its rector (Dix) \$12,000 and a house worth \$3,000 a year. He will probably be advanced to \$20,000.

St. Paul has \$10,000, but will soon be advanced in a proportionate degree.

Paxton, formerly of Washington, has been called by one of our prominent Presbyterian churches at \$10,000 a year. One Broadway preacher (McArthur) is said to be equally well paid, while two of this denomination (Bridgeman and Armitage) have each \$10,000. Others receive from \$5,000 down to half that sum.

Ample Machinery to Elect the Extra Member.
Cor. East 4th News and Observer.

The Council of State having settled the question as to this matter upon the precedents in previous Congresses and other States, nothing more need be said. But, in looking into our own Acts, it seems that the case is expressly provided for by sections 50-51, chapter 375, laws 1875-77.

This is an original vacancy occurring by act of Congress instead of by death or resignation. The same rules apply to any other vacancy, and Congress has only exercised its legitimate authority by providing that this vacancy may be filled by the State at large. There was no need to spend public money upon so fine a spun point.

THE APPROPRIATION OF AMERICAN FORESTS
Industrial World.

To make shoe-pegs enough for America we consume annually 100,000 cords of timber, and to make lucifer matches 300,000 cubic feet of the best pine are required every year. Lasts and boot-tops take 500,000 cords of birch, beech and maple, and the candle-makers consume 500,000 more. The baking of bricks consumes 24,000,000 cords of wood, or what would cover with forests about 50,000 acres of land. Telegraph poles already up represent 800,000 cords. The ties of railroads consume annually thirty years' growth of 75,000 acres, and to fence all the railroads would cost \$45,000,000 with a yearly expenditure of \$15,000,000 for repairs. These are some of the ways in which American forests are being cut down. There are others. The manufacture of packing boxes, for instance, costs, in one year, \$22,000,000, while the timber used each year in making wagons and agricultural implements, is valued at more than \$100,000,000.
