

DON'T WANT ANY CHANGE.

The Republican members of Congress have caucused upon the question of reducing the internal revenue taxes, and have decided that it is not advisable at present to interfere with the tax on spirits, tobacco, cigars, &c., but refrained from expressing an opinion on the abolition or reduction of taxes on other articles now subject to tax.

There are political reasons for this action. The repeal of the tax on these articles would of course wipe out the occupation of the vast number of men who constitute the internal revenue force, nearly every one of whom is a useful agent in carrying out the schemes of the leaders of the Republican party. They are, so to speak, the right arm of that party, and their loss would be an irreparable one to it. The victories of the Republican party for years past were won mainly through the active services of, and the organization effected through the instrumentality of the revenue department, which had its servants in every locality, and required every one of them to be a worker for the party. In the South they have been and are to-day the main dependence of that party, and if they were legislated out of existence officially, the party would be practically without any organization in this section. As the system stands now on the approach of an election for President or members of Congress, when it is thought important to influence results, the number of revenue men may be indefinitely increased and where they may be made useful, men are picked up and appointed temporarily drawing pay from the government for the political services they render. This has been carried on to such a scandalous extent in the South that it has attracted the attention of the most indifferent observers. We have felt the power of the revenue gang in this State in every general election that has been held since the war, and whenever we have sustained a defeat we would trace it to the active work and powerful influence of that agency. It is a powerful political machine and the men that run it know its power. The men who sat in the caucus to which we alluded in the beginning of this article, know, too, how useful it is, and hence were not disposed to favor legislation that would deprive their party of such efficient workers who had rendered such good service in the past and who could be counted on for much good service in the future.

Republican politicians may favor the abolition of some taxes, but to expect them to disturb the pleasant relations that exist between whiskey, tobacco, cigars, &c., and the Republican party, at the present time or in the near future is expecting too much. They won't do it.

Durham is agitating the graded school question.

Emperor William, of Germany, is in his 80th year.

The Asheville News has a special correspondent at Higashiyama, Nagasaki, Japan.

President Arthur banqueted Gen. and Mrs. Grant at the White House Wednesday night.

It is thought by some that the Rev. John Foley, of Baltimore, will be the successor of Bishop Lynch, of Charleston.

A negro was arrested in Macon, Ga., the other day while engaged in the peaceful avocation of making counterfeit nickels.

The courts of Ohio do not recognize the grave-yard insurance business which was so extensively carried on in Pennsylvania.

Hinton Rowan Helper, formerly of this State, now a resident of St. Louis, keeps pegging away at his Three Americas Railway project.

A misplaced figure in the special from Washington yesterday, about the vote on Cooper's confirmation in the Senate made it read 42 against in instead of 24, as it should have been.

The act authorizing the punishment at the whipping post of wife-beaters has passed both branches of the Maryland legislature, and only waits the signature of the Governor to become a law.

Augusta Chronicle: It will be news, to most of our readers at any rate, that the Peruvian Company, which so nearly caused a war between the United States and Chili, was organized under a Georgia charter. Shipper states that they obtained this charter because it offered such extraordinary advantage.

A Boston company claims the ownership of a patent which covers the use of glucose as an ingredient in the manufacture of candy, and are notifying confectioners to this effect. The confectioners, however, in some cities, are not disposed to recognize the Boston monopoly and are going to contest it.

The Boston Post grimly remarks that it is a gross violation of property to put the cost of champagne, brandy, cocktails and cigars into a bill for funeral expenses; that they belong under the head of stationery. The difficulty was that a stationery establishment could not be conveniently conducted on a Pullman palace train.

A ranch of 8,000 acres, located near Bexar county, Texas, is used for the breeding of saddle ponies. There are on the ranch forty-five Shetland mares and one hundred Zacaecas ponies, all for breeding purposes. The Zacaecas spotted Mexican ponies are a small, hardy race, raised in the mountains of Mexico, and universally good saddle ponies. The Shetland, Arab and Zacaecas ponies are hardy as goats, cost no more to raise, and are very gentle.

White Rossi, the Italian actor, was playing in Philadelphia Monday night, a candle was knocked over and the lace on a mirror caught fire, creating a little panic among the audience. But Rossi pulled down the lace, extinguished the fire, and then stepping to the front of the stage remarked in a side voice, apparently confident to those on the front seats, "et es all right; et es in ze play," which restored confidence and the play proceeded.

Though only forty-five years of age, Jacob R. Shipherd has served an apprenticeship in many schools that teach cunning and chicanery. He began as a preacher, served a few months in the army, was elected president of the Freedman's Union Aid Commission, in Chicago. After the war he founded a religious weekly newspaper called The Advance, which he soon gave up to establish a real estate office in Chicago, and was next heard of at Long Island as a railroad president and land speculator. Falling in all these pursuits he studied law and was admitted to the bar. His last venture was as president of that stupendous bubble, the Peruvian Company.

IN CONGRESS.

THE MISSISSIPPI RIVER COMING TO THE FRONT WITH A \$6,000,000 APPROPRIATION.

The Senate Passes the Life-Saving Service Bill and Resumes the Tariff Discussion.—The House Talks Over the Mississippi Improvement and Takes up the Private Calendar.

WASHINGTON, March 24.—SENATE.—Vest, from the committee on territories, reported favorably Macey's bill to authorize the President, in conjunction with the State of Texas, to lay out and mark the boundary lines between a part of the territory of the United States and the State of Texas, and to complete the survey authorized by the act of 1858.

After a speech from Sherman in which he cited the recent decision of the Supreme Court in sugar coloring cases as a striking evidence of the necessity for a general revision of tariff legislation, an arrangement was effected by which the general debate on the bill is to close at 4 o'clock Tuesday, after which amendments may be offered under the five minute rule for debate. The bill was then laid aside informally.

The House resumed the tariff discussion, the bill was received from the House and signed by the President, the bill having previously received the signature of the Speaker of the House, now to the President.

After executive session, adjourned on Monday.

Wilson, of West Virginia, a member of the committee, stated that the resolution had not yet been reported because the committee desired to obtain all necessary information. There were no laches on the part of the committee.

Robinson replied that that would make his question of impeachment unnecessary.

The House then proceeded to the consideration of private business.

The Senate resumed the consideration of the morning hour upon the life-saving service bill.

The Florida Senators insisted upon the provisions for stations at points on the Atlantic coast of Florida as follows:

Key West, Jupiter Inlet, Cape Canaveral and St. Augustine, and one on the Gulf coast near the mouth of Apalachicola river, five in all.

Conger, in charge of the bill, argued that this was unnecessary, and Johnson replied that the record showed 164 wrecks on the coast line just indicated. The proposition was agreed to—ayes 36; noes 17.

An amendment was adopted limiting the pay of jurymen at \$30 per month. The bill then passed—yeas 38; nays 8.

George asked and was granted an indefinite leave of absence.

Kellogg, La., from the committee on Mississippi River improvements, to whom were referred the bill for improvement of the Mississippi and Missouri rivers, and the bill for the construction, completion, repairing and preservation of the Mississippi levees referred to the committee, and the chairman unanimously agreed upon a substitute for these bills. The substitute went to the calendar with notice by Kellogg that he would ask their consideration at an early day. It is as follows:

Be it enacted, etc., that the Secretary of War, with the advice and under the direction of the Mississippi river commission, is hereby authorized and directed to expend the sum of six million dollars, five million thereof on the Mississippi river and one million on the Missouri river in deepening the channels and improving the navigation of said rivers in accordance with plans recommended by the said commission, and said sum of six million dollars is hereby appropriated out of any money in the treasury not otherwise appropriated, for purposes aforesaid, and so much thereof as the Secretary of War may determine to be necessary is hereby appropriated, and the Secretary of War is authorized to incur the expense of such work, to be made and submitted to Congress annual reports giving detailed statements of works done, expenditures incurred, and the effect of such work, together with such recommendations and estimates as may be necessary to present the whole subject fully to Congress.

Garland asked that all three bills be placed on the calendar in order that there might be a fair fight over them in the Senate. So ordered.

At 2:10 the tariff commission discussion was resumed, and Miller, N. Y., proceeded to give some of the reasons for his belief in protection; reasons he said, which were held by a great majority of the people of New York.

Thomas, of Kentucky, from the committee on Mississippi levees, reported a bill appropriating \$6,000,000 to be expended according to the plans of the Mississippi river commission for the

improvement of the navigation and commerce of the Mississippi river, and the construction of works of improvement to the amount of \$6,000,000 between the mouth of the Ohio and the Illinois river, \$500,000 between the Illinois and Des Moines rapids and \$750,000 between Des Moines rapids and Saint Paul. Referred to the committee of the whole.

The House then at 1:10 p. m. went into committee of the whole on the private calendar.

Another debate arose upon the next bill for the relief of the heirs next of kin of James B. Armstrong, the opposition to the measure being based upon the fact that the heirs were disloyal.

Pending action, the committee rose and reported to the House the Alabama bill, which was passed.

The House then at 4:30 took a recess until 7:30, the evening session being for the consideration of the pension bill on the private calendar.

Popular Education in the South.

WASHINGTON, March 24.—The Senate and House committees on education and labor held a joint session today to hear arguments presented by the members of the national educational convention now in session in this city in advocacy of their appeal for a congressional grant of immediate aid to the States for the purpose of supplementing their efforts to provide for the educating of all children within their respective borders. Among those who addressed the committee in advocacy of an appropriation were Dr. Dickinson, secretary of the United States Education Office, State Superintendent G. F. Orr, of Georgia, O. S. Thompson, city superintendent of Charleston; Mayor Courtney, of Charleston; Mr. Bryan, son of United States District Judge Bryan of South Carolina; Dr. Porter, of Charleston, and several prominent Northern educators.

Senator Blair, chairman of the committee in the Senate addressed several questions to the delegates as to the amount of money they desired, the period during which it should be afforded, and the modes of distribution.

In reply it was stated that \$15,000,000 for ten years would be the smallest sum needed to effectually supplement the efforts of the States.

Two Brothers Executed and Die Game.

HARRISBURG, Pa., March 24.—Frank and Henry Rumberger, were hanged at 10 a. m. today in the State prison, at Daniel Troutman in November, 1880. There were no incidents or accidents; everything was done with mechanical precision, and there were no leave takings or remarks from the scaffold. One of the brothers had his eyes closed, the other had his eyes open but said nothing. Neither showed a sign of fear.

Peruvian Shepherd Sick.

WASHINGTON, March 24.—Jacob R. Shipherd, the Peruvian, who has been in the affairs committee this morning a physician's certificate of illness, and the Peruvian investigation was adjourned subject to the call of the chairman.

The signal service station at Hatteras, N. C., has been ordered by Lawrence from Apalachicola for Philadelphia, lumber land, ashore on Hatteras. The crew was saved.

Whitaker Discharged.

WASHINGTON, March 24.—The Secretary of War has issued a special order discharging I. C. Whitaker from the Military Academy, on the recommendation of the admiralty board, to cause deficiency in studies.

Death of the Poet Longfellow.

BOSTON, March 24.—Henry W. Longfellow died at Cambridge at 3:15 this afternoon.
