According to the Railway Age, the American Bell Telephone Company has now no less than 189,374 instruments in use by customers. It has 592 exchanges in operation, 70,525 subscribers and 48,-168 miles of wire. These figures show an enormous increase in the past year. The chief difficulty of extending the service in great cities appears to be that of conveying the innumerable wires through the streets. The company is still experimenting in regard to the use of underground wires, and, if successful in this direction, will be able to greatly increase the extent and efficien- cludes thus: cy of the service.

LYNCH GOES IN.

The contested case of Lynch (colored) sentatives by the ousting of Chalmers and the swearing in of Lynch, by a strict party vote. This result was not unanticipated, as the drift of the a determination on the part of the Republicans to seat Lynch, whether he Robeson boldly asserted that Congress had the right to ignore State laws, overwho may or may not hold a seat in that body, whether claiming a seat in conformity with law or not. He held the doctrine that Congress had the right to because he claimed that he would have had a majority if his supporters had cast their ballots as they desired to do. In this case it was claimed that intimidation was used to keep colored voters from casting their ballots for Lynch, which ballots, if they had been cast, would have elected him, taking it for granted that every colored man was a Republican and a supporter of Lynch. Under this action all defeated Republican candidates in the South where the negroes have any strength as to claim the election on the ground that there were negroes enough in the district to elect them if they voted, and their not voting is prima facie evidence that they were bulldozed and deterred from voting. This is in substance what the Republican majority in Congress said yesterday when they voted to seat

Lynch. We remarked above that the result was not unanticipated, for from the moment notice was given of the contested seats from the South in the House it became apparent that the Republicans intended to go to any length to seat Republican contestants, and thus make sure of the majority in the House against contingencies. We look for a similar result in other cases. It is part of a deep laid conspiracy and will be carried out. They are The New York railroad companies perfectly unscrupulous as to the methods employed, and as they refused to but the Arizona scalpers seem to be go behind the returns when they wanted to count Hayes in, they now go behind them to count Democrats out. PRESIDENT FRED GRANT.

Fred Grant seems to have gotten into a predicament by his connection with the collapsed Boston Electric light company, which is denounced in that city as a first-class fraud. He was re. The pugilist sullivan, who sent Ryan | cently interviewed by a reporter of one of the papers as to his connection with it and made the following statement:

It is true that I was there when the company was organized, and that I did consent to the use of my name as president for the purpose of organization. I acted as its president for one day, and then resigned. They assured me that they would select some one else, but whether they did or not I do not know. I have had nothing to do with it since I resigned. I think this is merely a scheme to advertise their company, and that they are using my name because they think it will do them some good. Mr. A. H. Stephens, of Georgia, who If I had been plain John Jones I hardly it was announced some time ago had think I should have got mixed up with it in this way.

From all of which it would seem that Fred went into the scheme deliberately and lent them his name, because it was supposed that his name on account of letters urging him to run for Governor. his relationship to his illustrious pa. would boost them along in their efforts to rope the unsophisticated in. If he had been plain John Jones he would the six Chinese companies engaged in not have been asked to lend his name, and if he had been plain John Jones he wouldn't have done it if he had been asked until he was satisfied the company was all right and not a swindle. They got the use of his name as other schemes got the use of his father's name, no doubt for a consideration. His name in this instance don't seem to have helped the concern much, but it may possibly give him some trouble when the duped stockholders go into court and demand redress.

He then procured a boat and "went for his prize" — He was astonished to find, after raising this king of the feathery tribe from the water, that he held in his iron grip one of those "speckled beauties" - a trout -weighing about five pounds. CONGRESS YESTERDAY.

Senate Not in Session-The House Closes the Contested Case by Ousting Chalmers and Seating Lynch.

House.-A message from the Senate announced the passage by that body, with amendments, of the House bill to execute certain treaty stipulations relating to the Chinese. Page, of California, moved to concur with the Senate amendments.

Hooker, of Mississippi, objected on the ground that it was not wise legislation to act upon such an important measure without some time being given

to consider the amendments. Page then obtained an order for the printing of the bill and amendments. and gave notice that he would ask for their consideration Monday. On motion of Williams, of Wisconsin, a resolution was adopted authorizing the committee on foreign affairs to the purpose of examining witnesses in the Chili-Peru investigation. The House then resumed the consid-

eration of the Mississippi contested election case of Lynch vs. Chambers, and the previous question having been ordered, Calkins of Indiana, took the loor to close the debate. He premised his argument with a brief review of the present condition of the colored race. Old fallacies and sophistries were gone and to-day the idea that all men are created equal before the law was the accepted doctrine of the Republic. "Except the Chinese," suggested Buchanan, of Georgia.

Calkins: Whenever the Chinese, as tude, no man on this side of the chamber will refuse them the fellowship of mankind. Turning to the consideration of the case, Calkins exhibited a man of Mississippi to show the chamber of Mississippi to show the case and the case of a people, shall stop the system of servimap of Mississippi to show the gerrymandering which had been resorted to in order to throw a large majority of colored people into the "shoestring" district, and some good-natured colloquies ensued as to the system of re-districting in vogue in Indiana and Ohio.

Calkins spoke nearly two hours and was frequently applauded by his party friends. In conclusion he reviewed the benefits granted to the colored people by the Republican party and assured that people that the party would continue to encourage them and stand by them and in each advancing step in civilization would invoke God's blessing upon them and their children.

The conclusion of his speech was greeted with loud and long applause on the Republican side and in the galleries. in which a large number of colored men were assembled.

The vote was then taken on the resolution of the minority of the committee on elections declaring Chalmers entitled to retain his seat, which was rejected-yeas 104; nays 125, a party vote. About thirty pairs were announced on

At Dogs have killed upward of twenty first there was a disposition shown on And a ing on this question and on the first roli call not more than 20 Democrats voted, among them Randall, House, Tucker, Carlisle and Holman.

of all diseases arise from deranged kidneys and

liver, and it strikes at once at the root of the diffi-

culty. The elements of which it is composed act

directly upon these great organs, both as a FOOD

and RESTORER, and, by placing them in a healthy

condition, drive disease and pain from the sys-
