The Anti-Prohibitionists.

Printed circulars were yesterday distributed from the anti-prohibition party in this city, requesting the chairman of the township committees of Mecklenburg, to call meetings in their townships at once for the purpose of electing delegates to the county convention. The time set for holding the county convention in Charlotte, is May 31. Mr. J. M. Sims is the chairman.

Thanks.

In the hurry and bustle of the hour THE OBSERVER representative as one of the committee has neglected to return thanks to the proprietor of the McAdoo house, in Greensboro, for the handsome manner which that gentleman entertained the committee appointed to receive Senator Bayard and his escort. Though late it is none the less deserved, and we make the amende now.

Troubled About Geese and the Fence Law.

Once in a while when some people want to express themselves over some loss or grievance in a "notis," and being afraid that a printing office cannot do it justice, sit down and work it out themselves, it results in something good, and like a woman's letter, the pith is always in the postscript. One of our police yesterday captured this notice and brought it to the newspaper man:

> March the 11th 1882 Notis

The subscriber having Lost four geese too whit ganders too pidded geese constitue four geese in number Straded Stolen or killed the first week in the year 1882, said geese are younge the apprehension of said geese to me will be rewarded to let me know of such

N. B.-that is the adventege of stock Law a child can pen stock or geese then the pay must come but it ought to go the other So, on, so, on.

Nuggets from the Mines.

Sheriff. M. E. Alexander has sold his gold mine to a New York and Boston company, who have already begun preparations to work it on a large scale, in the purchasing of engines, hoisters, crushers and other necessary machinery. This mine is located near the old Capps mine, about six miles from the city and is said to be a fine gold producer.

-Capt. John Wilkes is now working the old Capps mine, with good results. -Mr. S. C. Johnston is working the

An examination of cal ingenuity. It is about three feet the prisoner's wounds showed at first high and mounted on four small wheels glance that they were mortal, all of the and is a perfect fire engine. A handfull

four balls having entered his body. He lived several hours after the shooting, his death occurring sometime in the forepart of that night. We could not learn the name of the

person who had his fingers broken, nor did our informant know any of the names except the sheriff and Mr. Binford. The latter was severely hurt by the blow and had to receive attention from the doctors, but we have since heard that he was not seriously injured. These are the particulars of the affair as well as we could gather them from the passengers who came in on the train from Monroe. The negro is said to have been a notoriously desperate character and would have thought nothing of killing the sheriff and his party could he have done so. "To kill somebody" had been his frequent

copper mine, in the vicinity of the Capps, for a Philadelphia party, and is getting out the copper in great quantities.

-There are several other mines in this locality to sell and under negotiation for sale, and everything indicates that there is shortly to be a great revival of the mining interests in our county. The coming year will see more mines in operation and on a greater scale than has yet been known in Mecklenburg.

A Blockader Arrested. Ed Sparkling, the negro whose name has figured in our public reports for the past few days, gives us one more local before subsiding. He runs a sporting house on College street, and the other night the officers raided his premises and found that his establishment was equiped with a regular bar-room, where Ed. would pass the liquor to his customers on the sly. He did not even pretend to have a license and was brought before Mayor DeWolfe, who turned him over to United States Commissioner T. M. Pittman under a bond of \$250 for his appearance at the next term of the Federal court. He was lucky enough to give bond and was released. This is the second time he has been in trouble for blockading, having served out a three months sentence of imprisonment for his first offence. Ed had been selling the stuff on the sly right along and was quite cunning about it, but not enough so to escape the viligance of our city police.

Lo! the Poor Indian.

Mr. F. H. Andrews, an old Charlotte boy who has been out in New Mexico for sometime past, called in to see us last night and talk a little "Injun." He had read in yesterday's OBSERVER a telegraphic account of how the red men are fleeing from Mexico to New Mexico on account of the reward of \$300 which is offered by the Mexican Government for each Indian scalp, and his account of the state of affairs in that country is quite interesting. That Territory is very thinly settled, the population being made up mostly of miners, and they have all abandoned their mines and are making the collection of Indian scalps a special business, finding it more profitable to dispose of a dozen or two scalps per day at \$300 each, than to toil with the pick. At first they confined themselves to the rifle as a means for procuring 'scalps, but this proving too slow to suit their tastes they resorted to a little strategy.

The Indians are very fond of canned fruit, and being aware of this the inhuman miners go to a canning factory and have a great number of cans put up with poison in the fruit. Taking a supply of these they visit some settlement and trade off the cans to the uneditors of Our Church Paper, published suspecting redskins, and on the next
