vices in Arkansas.

Texas preachers are said to be very eccentric, and their mild unnaturalness has given rise to a great many remarks and a few stories. The following narrative was told us by a slanderer!

A minister arose before a large audi-ence, took his text and began preach-ing. A brisk firing of pistols began on the outside of the church.

"Brother Deacon," said the minister, "I believe those fellows are castng in-sinuations at me. In fact I am very nearly convinced," he continued, as a piece of plastering fell from the wall close to his head.

"I think, parson, that it refers to some one else," replied the worthy dea-

whittling, arising and pulled at the waist of his pants like a man who had just straightened up after setting out a row of tobacco across a broad field. "Got on an extra?"

"Yes," "Unlimber."

The whittling preacher handed over large Remington pistol, which the insulted preacher took, and drawing one from his belt started out. After going out there was an immediate improvment in the firing business. It was de-cidedly more life-like, insomuch that the deacons sat working their fingers. After a while the minister returned, and placing an ear and a nostril and a half of a nose on the pulpit, remarked: "He that hath ears to hear let him behave himself." The sermon then proceeded without interruption.

favor sinks into insignicance. What earling bene-faction can compare with one which protects from "That dire disease whose rothbass power Withers beauty's transient flower?" Which gives ease for pain, joy for sorrow, smiles for lears, the roves of health for the pallor of dis-ease, the light elastic step for dranging weariness, hights of soft repose for heavy hours of tossing restlessness, bounding vigor for languishing dull-ness, the swelling lines of full grown beauty for the sharp and withered form of emagiation, a long life of mental, physical, social and domestic en-joyments for a few said days of pain and gloom, ending in an early grave? Such is the mission, such are the results of Dr J. Braditeld's Female Hegulator, which is hence truly and appropriately styled "Woman's Best Friend." "Whites," and all those irregularities of the womb so destructive to the health, happiness and beauty of women, disappear like maic before a single bottle of this wonderful compound. Physi-cians prescribe it. Prepared by Dr. J. Braditeld, Atlanta, Ga. Price: trial size, 75e; large size, \$1.50. For sale by all druggists.

Greenville (S. C.) News.

About six years ago a colored girl who now lives with Judge S. J. Douthit, fell to the ground very heavily, and having her mouth open ran something into it, which she probably thought at the time did not remain. Recently an abscess has formed in her throat which she could not account for, and Dr. John H. Maxwell was called upon to examine it. After he had investigated the case he came to the

About two weeks ago Mr. Smith living a few miles of Calhoun, Ga., on the Oostanaula river, lost a heifer about three years old, and as it was fine stock made diligent search, but could not find it. A few days ago a party of young men fishing on the river were attracted by the smell of a dead carcass, and upon examining the cause, lo and behold they found a monster catfish, which had Graw. swallowed the calf, and the horns of the calf becoming entangled in the fish's gills had drowned the fish. The fish

Raising Cucumbers. Wilmington Star.

Many persons now raise their crop of cucumbers entirely by the "barrel method," which requires but little space, and is never injured by drouth. The plan is this; take an old barrel, fill it half full or broken and irregular pieces of rock; then fill it nearly to the top with stable manure and rich earth, well mixed. Plant seed all around the edge of the barrel and pour several buckets of water-enough to fairly cover the rocks, and allow the bottom of the earth to be saturated. Shade the barrel a few days, and when the vines begin to run train then over the sides of the barrel. By this method cucumbers can be raised on the top of the house if the roof be flat. A tub or half barrel is better than a full barrell, as there need not be so much standing water.

#### England's Suez Canal Stock.

Disraeli paid \$100 a share for the 176,-602 shares of Suez canal stock he bought for the British government. Ten years ago, Mr. Gladstone, who was then Premier, was offered the Khe dive's shares at \$45, but refused to take them at that low rate, because he was afraid of foreign complications. Disraeli's investment has paid England about \$25,000,000, and 82 per cent. of the tonnage passing through the canal is hers. This investment is of course werth fighting for aside from England's claims on the Egyptian government for loans to Ismail made by Engishmen.
