The letter of Secretary Folger, published in yesterday's OBSERVER, might have been written by Mr. Hubbell, for Mr. Hubbell certainly could not have written one that would have answered his purposes better. It is cunningly, phrased, to hold out the idea that employes in the treasury department will not be punished by dismissal for refusing to respond to the assessments made upon them, but gives the aforesaid employes to understand that, if they believe in the soundness of the principles of the Republican party and desire its perpetuation they may make such contributions as their judgment suggests, just as if they were in a meeting house and the preacher presented some cause which sought the aid of the charitable, and asked them to contribute. Generally speaking people who refuse to contribute in such cases are not regarded as over disposed to "lend to the Lord' in fact not to have quite as much of the spirit of religion in them as they ought to have, and he who fails to attest his belief in the "soundness of the principles of the Republican party," by a reasonable contribution for the perpetuation of the party will be regarded as lacking in the quantity of Republicanfor the sovereigns of Pennsylvania to ism that all men who hold place in the gift of the party ought to have. > will be taken of it, and that they who refuse to respond as called upon will be marked for future consideration notwithstanding all the mere hollow talk of President Arthur and Secretary Folger. If he had tried Secretary Folger could not have found a more forcible way of telling the employes in his own department and other departments of the government, that they should not only subscribe but should subscribe cheerfully to the cause, in the triumph of which all good Republicans should take a lively interest. The demand and the giving both have his entire approbation, while he gives the assessed individual the poor option of refusing to contribute if he has the moral courage to refuse, in face of the influence that he will be subjected to. The only pretense that the refuser can offer for not complying will be poverty and inability, which pride will keep many from

Rumor says the programme in South Carolina is to nominate Wade Hampton for Governor, elect him, swear him in, then re-elect him to the United States Senate, and let the Lieutenant Governor serve out the term. If that is to be the understanding there may be an unseemly rush for the office of Lieutenant Governor.

suggests that a law be passed requiring, in addition to the usual precautions, all poisonous drugs to be kept and sold in bottles of a trangular prism shape, and that bottles of this shape be used for no other kind of medicines. This form would give a danger signal the moment it was picked up, even in the dark; and, while it would cost a trifle more than tages gained.

There is one way of accounting for the unfortunate financial condition of Egypt. All Europeans in that country are favored by exemption from taxation. English, French and Italian merchants own the finest cotton and sugar plantations and employ hundreds of hands without paying one para of tax to the State. This concession was obtained by Napoleon in 1799, to run one hundred years, and it has been respected ever since by Governor and Pasha. It is not strange that the native Egyptians, who are ground down unmercl fully by taxation, should have so fierce a hatred of the privileged Europeans.

Admiral Nicholson in a report to the Navy Department, says the riot in Alexandria on June 11th, began in a dispute between a Greek or Maltese and an Arab. The Bedouins outside the walls rushed in for plunder, and that order was restored by the authorities as soon as they could. Commander Batcheller, only three or four vacant rooms in the of the Galena, writes that he gave refuge to all Europeans who had no vessels of their own country to take refuge in. On June 30th there were not more than six Americans in Egypt, most of whom were office-holders. During the riot seven officers of the Galena were on shore but were not molested. He says that from all the information he could gather nine-tenths of the native population of Alexandria and Cairo were heart and soul with Arabi Pasha.

ROBINSON VS. ROBESON.

Robeson of New Jersey, familiarly known as Secor Robeson, in a debate in the House last Thursday sneeringly alluded to the deafness of W. E. The following morning Mr. Robinson rose to a question of personal privilege and got in the following sledge hammer reply:

LET NORTH CAROLINA BE REP. RESENTED.

The National Mining and Industrial Exposition to be held at Denver, Colorada, in October, promises to be a grand affair. Buildings have been erected on a most colossal scale, and nothing has been left undone to make it a success in every particular.

Why may not North Carolina be represented at that exposition? As a central point of the great mining field of the West it would be a splendid place to show what North Carolina can do in the way of minerals. Any exhibit she would make would be sure to attract attention in a section where the mineral resources of our State are quite unknown. We believe that such an exhibitition as she could make, if some competent person were to take the matter in hand, would compare favorably with any that the mineral sections out there could produce, and would bring North Carolina to the front, and result in great benefit. The opportunity should never be neglected of having our State represented at such an exposition, for it pays, and we trust the suggestion we make may meet with the consideration of those who desire to see our mining interests advanced.
