HARRIS REMEDY CO. For Register of Deeds. I hereby announce myself a candidate for the office of Register of Deeds for Mecklenburg county, in the cause of the Anti-Prohibition Moral Party.

NOON DISPATCHES. BY THE ASSOCIATED PRESS. THE ISTHMUS EARTHQUAKE. More Disastrous Than at First Apprehended. New York, Sept. 8.—The Central and South American Telegraph Company, although they have not yet thrown open their lines, which have been completed to the public, furnish to the press the following additional particulars of the earthquake which occurred yesterday on the Isthmus of Panama, and which was more disastrous than yesterday's brief dispatch reported.

Forty-Eight New Cases at Brownsville --Abating at Matamoras. BROWNSVILLE, Texas, Sept. 8.—There were forty-eight new cases of yellow fever and two deaths at Matamoras, within the 24 hours ending at midnight last night. There are also four new cases among the troops at Fort Brown.

A Call for Relief From Pensacola. PENSACOLA, Fla., Sept. 8.—The board of health bulletin announces nine cases of yellow fever to-day, the eleventh day of the scourge. If the disease becomes epidemic, which the gloomy aspect threatens, they will be in great need of pecuniary relief, a large proportion of our residents being strangers to this people and climate. If this relief comes too late it might as well not come, as witness Mexico and the Isthmus of Panama, therefore we appeal to benevolently disposed to contribute to our threatened necessity through the New York Herald.

Rain Storm and Flood in Texas. NEW ORLEANS, Sept. 8.—A Pleiade special from San Antonio, Texas, says a violent rain storm commenced there at 4 p. m. Wednesday and continued until midnight. The rainfall was six inches, and the water in the San Antonio river rose eight feet and many houses in the lower part of the city were flooded. San Pedro creek, passing through the western portion of the city, rose rapidly, washing away all the bridges and houses on its banks. It also carried away 500 bales of cotton. One man is reported drowned. The International Water Company has several small bridges destroyed and there were no trains over that road yesterday. The water is rising rapidly. The Rio Grande overflowed the towns of Eagle Pass and Camargo and is higher than before since 1858. Apprehension is felt for the safety of Brownsville and Matamoras.

The First Bala in Petersburg. PETERSBURG, Va., Sept. 8.—The first bale of new cotton was received here this morning. It was raised on the farm of J. F. Rainey, in Northampton county, N. C. and sold for 10 cents and was classed middling.

Real Cholera, but Sporadic. NEWPORT, R. I., Sept. 8.—Three physicians pronounced the case of the son of H. B. Anthonios, a Asiatic cholera, but unmistakably a sporadic case.

The Mormons will Resist the Edmunds Law. In an address to the Church of Latter-Day Saints, made on Thursday last, the "first presidency," consisting of John Taylor, Geo. Q. Cannon and Joseph E. Smith, commended the faithful to persist in the practice of "celestial marriage," notwithstanding the anti-polygamy provisions of the Edmunds law passed at the last session of Congress. The leaders of the Mormon church remind their people that "the institution of marriage which the law is aimed at has been revealed by the Almighty," and that the laws of our religion, interwoven with our dearest and holiest hopes connected with eternity. They announce consequently in formal terms that they "have no compromise to make" at all with the "one unbroken phalanx" maintain their political status, and as patriots "operate together in defense of what few liberties are left" to them. The animus of the address is unmistakable. There will be no surrender of the peculiar tenet of the Latter-Day Saints. The official utterance does not specify the means to be employed to evade the Edmunds law, but it is thought in some quarters that methods have been devised to that end which will be successful. The few actual polygamists will, it is said, make a show of compliance with the law; while the vast majority, and send away their extra wives—exchanging the open marital relation for some other less obnoxious to the law. Meanwhile the married and monogamous Mormons will be legitimate, and will, it is thought, manage as heretofore, to engross all elective offices. Things will go on pretty much as before, and when after a few years the anti-polygamy zeal of the government shall have weakened, the old order will be openly restored. It is to be regretted, perhaps, that the law in aiming at the excellent purpose of extirpating polygamy should endanger its success by containing provisions which tend to create in Utah a "carpet-bag" office-holding minority, petted by the government and hated by the great mass of the people.

"A wonderful thing is a seed." Says some song writer, and then he adds: "You can sow to-day, to-morrow will bring the blossom that proves what sort of thing is the seed, the seed that you sow."

Constitutional salt disease is a scorbic character and is successfully treated with Dr. Benson's Skin Cure, internal and external treatment, both pleasant. It certainly removes scrofula, eruptions, dandruff and tan and makes the skin smooth and healthy.

Not an experiment or cheap patent medicine is Benson's Iron Bitters. It is prepared by one of the oldest and most reliable chemical firms, and will do all that is claimed for it.

GEN. GORDON, OF GEORGIA. Business Better Than Honors—His Heroic Wife. Washington Cor. Brooklyn Eagle. The talk that Gen. Gordon will succeed the late Senator Ben Hill seems to be without authority or probability. I do not say a gentleman well acquainted with Gen. Gordon, and he laughed when the question of Gordon's re-election to the Senate was mentioned. "Why," he said, "it is nonsense to think of it. Gordon was Senator and resigned, and there is much greater reason now that he should refuse to be a Senator than there was then."

A Remarkable Duel. From the San Francisco Call. Speaking of Dick Winship recalls his famous duel with the Frenchman at Marseilles. Dick was then second lieutenant of our Scorpion, stationed there at the time, and, as usual, kept the whole of half the town on his feet through his endless practical jokes. The slang expression for Frenchmen in those days were "frog-eaters," and the wife of a French captain of militia had presented her lord with twins. Dick had the nerve to tender the happy father, at a public banquet, a stuffed group consisting of a big frog holding on its knee a couple of smaller ones. Of course the lady and her husband, and the captain's amused Winship, as the challenged party, gravely insisted on the duel being fought in the dark, with pistols, one shot only being allowed for each side, and a pistol in hand. The Code made a terrible stir, but as Dick held firm the Frenchman was finally forced to submit. On the appointed day, after dinner, the principals were placed in a room at a hotel from which every particle of light had been excluded. At a given signal on the closed door the two contestants entered the arena. Dick, dressed in absolute darkness, listening to the beating of their own hearts and each afraid to fire first, but for fear of thus exposing his location to the other, Dick quickly took off his shoes and feeling for the chimney—in front of which he had taken care to place—a trap door in the rear stepped into a carriage and rejoined his dinner party, which at once devoted itself to making a night of it in the highest glee possible. The next morning they returned to the hotel and opened the room, which had been silent as the grave all night. Kneeling in his corner, every muscle quivering with the ardor of his exertions, was the militia captain, his auburn hair turned white by the horrors of that interminable night.

The Race Question at Carlisle. CARLISLE, Pa., Sept. 7.—A question has been sprung upon the school board of this town which is giving some anxiety to the teachers of the public schools. The accommodations at the Indian school at Carlisle are entirely insufficient for the entire number of children that have been sent from the various reservations, and about 50 of them have been hired out as servants to citizens of Carlisle, one of the conditions being that they are to attend the common schools. A number of farmers having the Indians in their employ have therefore made application to the school board for permits to send them to school.

Blaine on Civil Service Reform. WINTERPORT, ME., Sept. (6.—Mr. Blaine, at a mass-meeting to-day, in referring to civil service reform, local office-holders of the latter he should be glad to see every federal officer, however honorable, appointed for a specific period, during which he could not be removed except for cause, which cause should be specified and proved. He should be glad to see the tenure of all subordinate officers made longer, at least than a presidential term, so that the removal of a new administration be not crippled or injured. Seven years would be a good length term, and would effect the desired end. He did not believe that life tenure would be wise even if practicable, and it was sure it was not practicable, because it means pension in the end, and might create a privileged class.

Refined and educated women will sometimes suffer in silence for years from kidney disease, or constipation and piles, which could easily be cured by the use of Dr. Benson's Female Compound. A woman to be found that does not at some time suffer from some of the diseases for which this great remedy is a specific. It is put up in liquid and dry form, equally efficient—Springfield Union.

DR. PRICE'S BAKING POWDER. Made by STEELE & PRICE, Chicago, Ill., and St. Louis, Mo. For Scariet and Typhoid Fevers, Diphtheria, Salivary Gland, Ulcerated Sore Throat, Small Pox, Measles, and all Contagious Diseases. Persons waiting on the sick should use it freely. Scalet Fever has been known to spread where the Fluid was used. Yellow Fever has been cured with it after being thought incurable. The most successful cases of Diphtheria yield to it.

DARBY'S PROPHYLACTIC FLUID. A Household Article for Universal Family Use. For Scariet and Typhoid Fevers, Diphtheria, Salivary Gland, Ulcerated Sore Throat, Small Pox, Measles, and all Contagious Diseases. Persons waiting on the sick should use it freely. Scalet Fever has been known to spread where the Fluid was used. Yellow Fever has been cured with it after being thought incurable. The most successful cases of Diphtheria yield to it.

Diphtheria Prevented. The physicians here use Darby's Fluid very extensively in the treatment of Diphtheria. A. STOLLMEYER, Greenboro, Ala. Tetter dried up. Cholera prevented. Ucers purified and healed. In cases of Death it should be used about the corpse—it will prevent any unpleasant smell.
